Description of the International Trade Statistics Program: U.S. Trade with Puerto Rico and U.S. Possessions

INTRODUCTION

This description covers the FT895: U.S. Possessions Foreign Trade Statistics Program.

Source of Information

Statistics on shipments from the United States to Puerto Rico and the Virgin Islands, and on shipments from Puerto Rico to the United States, are compiled from information furnished by Electronic Export Information (EEI), which must be filed with customs officials, and shipments by qualified exporters who submit data directly to the Census Bureau.

Statistics on shipments from the U.S. Virgin Islands and other U.S. possessions to the United States are compiled from automated data submitted through the Customs Automated Commercial System and from import documents filed with Customs officials.

Data on shipments from the United States to other U.S. possessions, as well as between the possessions, are not compiled.

Coverage

Statistics are separately published covering shipments (1) between the United States and Puerto Rico, (2) between the United States, and the U.S. Virgin Islands, and (3) from other U.S. possessions to the United States. "U.S. possessions" refer to those listed in Schedule C, Classification of Country and Territory Designations for U.S. Foreign Trade Statistics.

Trade with Foreign Countries

Puerto Rico is a customs district within the U.S. Customs Territory and its trade with foreign countries is included in the U.S. export and import statistics. The U.S. export and import statistics include merchandise trade between the U.S. Virgin Islands and foreign countries even though the Virgin Islands of the United States are not officially a part of the U.S. Customs Territory. Data on trade of other U.S. outlying possessions with foreign countries are not compiled by the United States.

Valuation

Note that the "- " indicates that the value is more than 1 kg and less than 1,000 kg (base is 1,000 kg and data below 1,000 kg are rounded up to 1,000 kg).

Customs Import Value

The customs import value is the value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of the Tariff Act of 1930, as amended. This value is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. The term "price actually paid or payable" means the total payment (whether direct or indirect, and exclusive of any costs, charges, or expenses incurred for transportation, insurance, and related services incidental to the international shipment of the merchandise from the country of exportation to the place of importation in the United States) made, or to be made, for imported merchandise by the buyer to, or for the benefit of, the seller.

In the case of transactions between related parties, the relationship between buyer and seller should not influence the customs value.
In those instances where assistance was furnished to a foreign manufacturer for use in producing an article that is imported into the United States, the value of the assistance must be included in the value reported for the merchandise. Such "assists" include both tangible and intangible assistance, such as machinery, tools, dies and molds, blue prints, copyrights, research and development, and engineering and consulting services. If the value of these "assists" is identified and separately reported, it is subtracted from the value during statistical processing. However, where it is not possible to isolate the value of "assists," they are included. In these cases, the unit values may be increased because of the inclusion of such "assists."

F.A.S. Export Value (Excluding Exports to Canada)

The free alongside ship (F.A.S) value is the value of exports at the U.S. seaport, airport, or border port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. The value, as defined, excludes the cost of loading the merchandise aboard the exporting carrier and also excludes freight, insurance, and any charges or transportation costs beyond the port of exportation.

Statistical Month

The month of importation is the month in which the U.S. Customs and Border Protection releases the merchandise to the importer. The month of exportation is based on the date when the merchandise leaves the United States. (For vessel or air shipments, it is the date when the carrier departs or is cleared from the port of export.)

Commodity Classifications

The export statistics are initially collected and compiled in terms of approximately 9,000 commodity classifications in Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. Schedule B is a U.S. Census Bureau publication and is based on the Harmonized Commodity Description and Coding System (Harmonized System).

The import statistics are initially collected and compiled in terms of approximately 18,000 commodity classifications in the Harmonized Tariff Schedule of the United States Annotated for Statistical Reporting Purposes (HTSUSA), an official publication of the U.S. International Trade Commission. The HTSUSA is the U.S. import version of the Harmonized System.

QUANTITY AND SHIPPING WEIGHT

Quantity

Units of quantity shown are published in terms of the units specified in the HTS and Schedule B for each classification. When two units of quantity are required for an item in the HTS or Schedule B, the first or primary unit is shown along with the value.
Also, specific to the FT895 tables, a "0" in the "Net Quantity" column means that no quantity has been reported for that particular commodity.

Shipping Weight

Shipping weight represents the gross weight in kilograms of shipments, including the weight of moisture content, wrappings, crates, boxes, and containers (other than cargo vans and similar substantial outer

containers). Shipping weight information is available for shipments by vessel and air only.

Also, specific to the FT895 tables, a "0" in the "Shipping Weight" column means that no shipping weight has been reported for that particular commodity.

LOW-VALUE STATISTICS

Exports

Export statistics are fully compiled on shipments to all countries, except Canada, where the value of commodities classified under each individual Schedule B number is $2,500 or more. Value data for such commodities valued under $2,500 are estimated for individual countries using factors based on the ratios of low- value shipments to individual country totals for past periods. The estimates for low- value shipments are shown under a single Schedule B number and are omitted from the statistics for the detailed commodity classifications.

Imports

Import statistics are fully compiled on shipments valued $2,500 and over or, under certain textile programs, for any article that must be reported on a formal entry. Value data for shipments that are valued under $2,500 and that do not have to be reported on formal entries are estimated for individual countries, using factors based on the ratios of low- value shipments to individual country totals for past periods. The estimates for low- value shipments are shown under a single HTS number. They are omitted from the statistics for the detailed commodity classifications.

TRANSPORTATION STATISTICS

Method of Transportation

The transportation statistics are presented in terms of three categories (vessel, air, and all methods), based on the method of transportation by which the merchandise

arrived in or departed from the United States. In some instances, shipments between the United States and countries abroad enter or depart through Canada or Mexico. Such shipments are recorded under the method of transportation by which they enter or depart the United States regardless of the transportation mode between Canada or Mexico and the country of origin or destination.

There are some differences in the coverage of these statistics, primarily as follows:

1. The data for all methods of transportation include exports and general imports by vessel, air, truck, rail, air mail, parcel post, and other methods of transportation.

2. The data for vessel and air exports and general imports represent waterborne and airborne shipments only (merchandise actually leaving or arriving in the United States aboard a vessel or an aircraft).

3. Imports and exports of (a) vessels moving under their own power or afloat and (b) aircraft flown into or out of the United States are included in the all methods data but excluded from the vessel and air statistics.

4. Mail and parcel post shipments (including those transported by vessel or air) are included in the all methods data but excluded from the vessel and air statistics.

5. Low- value shipments are included in the all methods data but excluded from the vessel and air statistics.

Shipments Not Classified by Commodity

Single classifications are provided for the following shipments without commodity detail:

1. Exports to all countries, except Canada, valued under $2,500.

2. Exports to Canada, reported on Canadian documents having a total shipment value less than $900 (Canada).

3. Exports to all countries, except Canada, valued $2,500 through $10,000 that are reported on Electronic Export Information (EEI) without a valid Schedule B number.

   (The United States/Canada data exchange allows that portion of the value formerly shown under this classification as exports to Canada to be distributed among the appropriate commodity classifications.)

4. Exports of goods of Canadian origin being returned to Canada.

5. Exports of goods of other foreign origin being returned to Canada.

6. Import transactions valued under $2,500 (and not requiring formal entry).

Classifications other than those listed above exclude the information shown under these provisions and are undercounted to the extent that such shipments are made.

ADDITIONAL INFORMATION

Sources of Error

The procedures used to compile the statistics include processing checks designed to protect the accuracy of the statistics to the fullest practicable extent. Export and import figures are subject to the possibility of errors that may arise from incorrect reporting and/or processing of information as to commodity classification, net quantity, value, and other statistical factors, month of inclusion (see subsection entitled "Carryover,") and errors that may result from the estimation of certain shipments. (See the subsection entitled "Low- Value Statistics.")

Carryover

Carryover is the term used to identify the trade records received and/or processed too late for inclusion with records for that transaction month. There are several causes for carryover. Among them is the customs procedure that allows importers to file import documentation up to 10 workdays after the date of release of the merchandise. Processing problems, such as rejection of a shipment because the data failed to meet certain edit criteria established to protect the accuracy of the statistics, also contribute to carryover. The current carryover rate is 0.1 percent for exports and 0.7 percent for imports.

Each month, in the Summary of U.S. Export and Import Merchandise Trade (FT900) only, the total import, export, and trade balance figures, as well as the end- use totals for the prior month, are adjusted for carryover. SITC and country detail data are not revised.

SOURCES OF FURTHER INFORMATION ABOUT INTERNATIONAL TRADE STATISTICS
