The above table, and several others in the present series that precede and follow, have been framed upon the plan of those in the admirable work of Professor Tucker on the Progress of the United States in Fifty Years, published in 1843. They were all, however, worked anew, and a great many typographical errors, &c., detected and rectified, and the whole brought down to date, by an experienced and accurate accountant, whose entire time and services in the Census Office have been bestowed upon the tables.

* In all of the ratio tables that have been framed in the office no attention has been paid to the fact that between 1830 and 1839 only nine years and ten months elapsed, nor have the accretions of population from annexations of new territory, &c., been taken into consideration. These matters are worthy of separate and special attention, for which time does not now admit.

The annexed tables have been prepared in the Census Office from the annual reports of the State Department, and with no little pains and labor. A few years have been selected, in order to enable the reader to form an average calculation of the proportions of the sexes and of ages, and of occupations, the place of birth, and the place of arrival, of the persons who annually reach our country from abroad. By the place of arrival is only meant the shipping ports, and not the place of ultimate destination. Those who are stated as born in the United States are citizens returning from foreign travel, etc. Those who died upon the passage are included in the State reports, and therefore, to preserve the aggregates, are retained in the table. These statistics ought to be completed in this shape for all of the years, and should hereafter be aggregated annually in the State Department in the same manner, instead of in the form now adopted, which is far from being clear or condensed. They have an important bearing upon the tables of nativities obtained from the schedules, and published in another part of this volume.

NOTE.—It will be recollected that the change of the day of taking the Census, from the 1st of August to the 1st of June, the periods referred to in the three last columns, wants two months of the terms mentioned.

METEOROLOGY OF THE UNITED STATES.

The tables on the next page were prepared at the Smithsonian Institution, under the direction of Professor Blodget, at the request of the Census Office. It was desired to frame them for the year 1849–50, in order to illustrate the Mortality table of the Census by any light which might be shed from such a quarter. The observations for that period, however, proved to be insufficient, and, as the best that could be done, the year 1851 was selected.

The tables are very valuable, and are the most complete ever published of the kind. They embrace points within the Republic several thousand miles apart—from Vermont to Texas; from New Orleans to Santa Fe, California, and Oregon—and condense the labors and observations of more than twenty scientific gentlemen. The brief space they will occupy could not be better employed.

INDIAN STATISTICS OF THE UNITED STATES—1789, 1825, 1853.

The following statement was made up on the 10th of November, 1853, at the request of the Superintendent of the Census, by the Commissioner of Indian Affairs. It will be very interesting in showing the past and present location of the Indian tribes which form a portion of the inhabitants of the territory of the United States, though they are not included in any of the Census enumerations, except in a few individual cases, which cannot affect the general correctness of the table.

STATEMENT SHOWING THE NUMBER OF INDIANS WITHIN THE TERRITORY OF THE UNITED STATES AT DIFFERENT PERIODS, NUMBER IN EACH TRIBE, PRESENT AND PAST LOCATION, ETC.

NAMES OF TRIBES, AND LOCATION IN 1825.	1789. Number.	1825. Number.	1853. Number.	Present location, and remarks.
The various tribes	76,000	.....	.....	Obtained from report of Hon. H. Knox, Secretary of War, to the President of the United States, dated June 15, 1789, to be found in volume of "American State Papers." Names of the tribes, &c., not given in detail.
St. John's Indians, Maine	.....	300		Obtained from report of T. L. McKenney, esq., head of the Indian Office, to the Secretary of War, dated January 10, 1825. Of late years these tribes have either become extinct or so reduced in number as to be lost sight of by the government in their tribal character.

NOTE.—The great difference in the several aggregates must be accounted for in the extension of the territorial limits of the United States by the acquisition of Texas, &c., bringing with it an increased Indian population; and, further, in the fact that the report of Mr. McKenney for 1825 does not appear to have embraced the tribes of Mississippi Valley, the Plains, Oregon, &c., then a part of the United States.
