MAP
SHOWING THE PROPORTION OF THE
FOREIGN
TO THE AGGREGATE POPULATION.
Compiled from the Returns of Population at the Ninth Census
OF THE UNITED STATES 1870.
BY
FRANCIS A. WALKER.
Explanations.
The Blue Lines indicate the boundaries of Groups of Population.
The Figures in Blue 2 18 18-45 45+ express the number of inhabitants to the Square Mile found within each group.
The Shaded Lines in Blue indicate the outside limit of a population of 2 or more to the Square Mile. The shading points towards the regions, which have a population of less than 2 to the Square Mile.
Note. The occasional abrupt intervals between the shaded portions and the line of no population are doubtless due in many cases to errors in the Census returns, incident to the sparseness of settlement.
