Explanation:

The total number of DEAF MUTES *in each State as reported in the Census is reduced to thousandths, and the number of thousandths of each sex in each decade of life, is represented by the distance measured on the horizontal lines, severally, from the perpendicular base line.*

The males are on the left of the base line, and the females on the right.

The lowest horizontal line represents the first decade, under ten years of age, and the highest over one hundred years.

The sex which preponderates is shaded.
