Abstract

This document describes a quick method for estimating Annual Survey of Manufactures sample weights for the 1963 and 1967 Census of Manufactures surveys, and briefly discusses the patterns of the sample weights over time. These sample weights are missing from the 1963 and 1967 Census of Manufactures microdata files, and are needed for any research using the Annual Survey of Manufactures sample in 1963 and 1967.

Relevant Datasets:

MECS, ASM, CMF

Required Dataset Permissions:

ASM 1963-2000; CMF 1963 & 1967
