NEGRO POPULATION, BY COUNTY: 1960 AND 1950

This report presents a compilation of data from the 1960 Census on the distribution of the Negro population in the United States. Table 1 shows data for regions, divisions, and States; table 2 shows figures for counties. Both tables give the total, nonwhite, and Negro population and the percent change in the Negro population between 1950 and 1960.

All areas shown are as defined in April 1960. For Alaska, data on the Negro population are not available for 1950. For Hawaii, data on the Negro population for 1950 are available for the State total but not for counties.

The tables are based on data which appear in the separate State parts of U.S. Census of Population: 1960, Volume I, Characteristics of the Population, and U.S. Census of Population: 1950, Volume II, Characteristics of the Population.

Detailed information on the characteristics of the Negro population is published in the 1960 Census report PC(2)-1C, Nonwhite Population by Race.* A guide to the sources of 1960 Census data on the Negro population appears in the report PC(S1)-46, Subject Guide to 1960 Census Data for the Negro Population.† A map showing the percent change in the Negro population by county between 1950 and 1960 is shown in the report PC(S1)-49, Distribution of the Negro Population.† The most recent figures on the Negro population published by the Bureau of the Census are presented in Current Population Reports, Series P-20, No. 145, "Negro Population: March 1965"* which gives figures for the United States as a whole.
