Table C-1.—NUMBER OF PERSONS AND HOUSEHOLDS IN SAMPLE, FOR THE STATE, BY SIZE OF PLACE: 1960

[The term "in sample" includes only those cases which were readable by the computer after the various processing steps and after the replication of households. Some households were canceled, and others were replicated to replace them. Cancellations were made because of bias in average size of sample households or lack of sample information. Canceled persons are omitted, but replicated persons are counted only once for this statistic]

Table C-2.—PERCENT OF NONRESPONSE AND ALLOCATION FOR SELECTED CHARACTERISTICS, FOR THE STATE, BY SIZE OF PLACE: 1960

[Data are based on final weighted sample figures after all replications. The term "nonresponse" denotes the absence of an entry on the schedule, or an entry that was poorly marked or was otherwise not readable by the mechanical equipment, or an entry that was inconsistent with another entry. The term "allocated" means that a characteristic was assigned during tabulation because of nonresponse. See text for further explanation. Percent not shown where less than 0.1 or where base is less than 200]
