DEPARTMENT OF COMMERCE.

HERBERT HOOVER, SECRETARY OF COMMERCE.

BUREAU OF THE CENSUS.

Chief functions.

The taking of the decennial census covering population, agriculture, manufactures, mines and quarries, and forest products.

Decennial report on wealth, public debt, and taxation, including principal financial statistics on Federal, state, county, city, and township governments.

Annual financial statistics of state and municipal governments—Sources of revenue, objects of payments, debt and tax levies.

Decennial statistics relating to inmates of institutions, including paupers, insane, prisoners, and juvenile delinquents.

A census of agriculture in each middecennial year, a biennial census of manufactures, a quinquennial census of electrical public utilities, statistics of marriage and divorce.

Annual statistics of births, deaths, causes of death, etc., in the registration area of the United States.

Quarterly statistics of leaf tobacco stocks and of production, stocks, and consumption of fats and oils.

Monthly or semimonthly statistics of cotton ginning; cotton stocks and consumption; the production, stocks, and consumption of hides and leather; the production of shoes; and statistics of active textile machinery and of movements in an increasing number of other industries.

The compilation and publication, in the "Survey of Current Business," of monthly commercial and industrial statistics.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE.

Chief functions.

The compilation of timely information concerning world market conditions and openings for American products in foreign countries secured through commercial attachés and trade commissioners of the Department of Commerce and the foreign service of the Department of State. The distribution of such information to American business through weekly "Commerce reports," special bulletins, confidential circulars, the news and trade press, correspondence, and personal contact.

The maintenance of commodity, technical, and geographical divisions to afford special service to American export industries.

The compilation and distribution of names of possible buyers and agents for American products in all parts of the world and the publication of weekly lists of specific sales opportunities abroad.

The maintenance of district and cooperative offices in many cities in the United States to expedite delivery of market information to business men and to keep the department advised as to the urgent requirements of American trades and industries.

The publication of official statistics on imports and exports.

The study of the processes of domestic trade and commerce, with a view to their improvement and the dissemination of information obtained for the benefit of the public, as well as of those directly concerned.

BUREAU OF STANDARDS.

Chief functions.

Custody of standards of measurement, quality, performance, or practice adopted or recognized by the Government. Development and construction of such standards when necessary. Testing and calibration of apparatus and comparison of standards used by scientific or other institutions with those in the custody of the bureau.

Determination of physical constants and properties of materials.

The testing of materials and the establishment of standards and processes in cooperation with commercial firms or organizations.

Researches covering structural, engineering, and miscellaneous materials, radio, radium, mechanical appliances, sugar technology, leather, paper, rubber, and textiles, clay products, glass, and refractories, metals and metallurgy, and similar groups of subjects.

The collection and dissemination of information showing approved methods in building, planning, and construction, including building materials and codes and such other matters as may encourage, improve, and cheapen construction and housing.

Studies on simplified commercial practices and the establishment of such practices through cooperative business organizations.

The Bureau publishes six series of scientific and technical publications, reporting the results of its researches and giving technical data fundamental to industry.

The Director of the Bureau has supervision of the preparation of technical specifications through the Federal Specifications Board.

BUREAU OF FISHERIES.

Chief functions.

The propagation of useful food fishes, including lobsters, oysters, and other shellfish, and their distribution to suitable waters.

Investigations of fish culture, fish diseases, and for the conservation of fishery resources and the development of commercial fisheries.

The study of the methods of the fisheries and fishery industries and the utilization of fishery products.

The collection of statistics of fisheries.

The administration of the Alaska salmon fisheries and the fur-seal herd on the Pribilof Islands.

The administration of the law for the protection of sponges off the coast of Florida.

BUREAU OF LIGHTHOUSES.

Chief functions.

The establishment and maintenance of lighthouses, lightships, buoys, and other aids to navigation on the sea and the lake coasts and on the rivers of the United States, including Alaska, Hawaiian Islands, and Porto Rico.

The publication of Light Lists, Buoy Lists, and Notices to Mariners, including information regarding all aids to navigation maintained by the Lighthouse Service.

COAST AND GEODETIC SURVEY.

Chief functions.

The survey of the coasts of the United States and the publication of charts needed for the navigation of the adjacent waters, including Alaska, the Philippine Islands, Hawaii, Porto Rico, the Virgin Islands, and the Canal Zone.

A comprehensive geodetic system, extending into the interior, connects and coordinates the surveys of the coasts, and is designed to furnish accurately determined points and elevations in all parts of the country. These are available as a basis for Federal, state, and municipal surveys, and engineering projects of every kind. The magnetic declination has been determined at a large number of stations throughout the country and the results are available for the use of surveyors and engineers.

The technical operations include base measure, triangulation, traverse, precise leveling, the determination of latitude and azimuth, the determination of difference of longitude by telegraph or radio, magnetic observations and researches, the preparation of magnetic maps, the determination of the force of gravity, topography, hydrography, deep-sea soundings, water temperatures, tidal and current observations.

The results are published in the form of charts on various scales, annual reports, coast pilots, tide tables (published annually in advance), current tables, digests of geodetic publications, and special publications.

BUREAU OF NAVIGATION.

Chief functions.

General superintendence of commercial marine and merchant seamen.

Supervision of registering, enrolling, licensing, numbering, etc., of vessels under the United States flag and the annual publication of a list of such vessels.

The enforcement of the navigation and steamboat inspection laws and the laws governing radio communication, as well as duties connected with fees, fines, tonnage taxes, refunds, etc., originating under such laws.

STEAMBOAT INSPECTION SERVICE.

Chief functions.

The inspection of vessels, the licensing of the officers of vessels, and the administration of laws relating to such vessels and their officers.

The certification of able seamen who form the crews of merchant vessels.

The inspection of vessels, including the types of boilers; the testing of all materials subject to tensile strain in marine boilers; the inspection of hulls and of life-saving equipment.

Circulars listing the publications of the various bureaus will be mailed on application to the bureau.

SUMMARY FOR THE UNITED STATES, BY DIVISIONS AND STATES—POPULATION, AGRICULTURE, MANUFACTURES, MINING 2
CENTERS OF POPULATION, 1790–1920, AND CENTERS OF FARMS, AGRICULTURAL PRODUCTS, AND MANUFACTURES, 1850–1920 6

POPULATION.

NUMBER AND DISTRIBUTION OF INHABITANTS.

Page.
SUMMARY TABLES:
Population of Kentucky: 1790 to 1920 7
Population of principal cities from earliest census to 1920 8
Urban and rural population: 1920, 1910, and 1900 8
DETAILED TABLES:
1. Area and population of counties: 1850 to 1920 11
2. Population of counties by minor civil divisions: 1920, 1910, and 1900 13
3. Population of incorporated places: 1920, 1910, and 1900 20
4. Population of wards of cities and towns of 5,000 inhabitants or more: 1920 22
5. Urban and rural population of counties: 1920, 1910, and 1900 23
MAPS:
Increase or decrease in total and rural population, by counties: 1910 to 1920. 9
Density of total and rural population, by counties: 1920 10

COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

SUMMARY TABLES:
1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900 26
2. School attendance, state and urban and rural population: 1920 and 1910. 26
3. Age, for the state and urban and rural population: 1920 and 1910 27
4. Illiteracy, for the state and urban and rural population: 1920 and 1910 .. 28
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910 29
6. Country of birth of foreign-born white, for state and principal cities: 1920 29
7. Indians, Chinese, and Japanese: 1920, 1910, and 1900 29
8. Age, for cities of 10,000 or more: 1920 30
DETAILED TABLES:
9. Composition and characteristics of the population, for counties: 1920 ... 31
10. Composition and characteristics of the population, for cities of 10,000 or more: 1920 43
11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920 44
12. Country of birth of the foreign-born white, for counties and for cities of 10,000 or more: 1920 46
13. Composition and characteristics of the population, for wards of cities of 50,000 or more: 1920 47
14. Age, by quinquennial periods, with single years for persons under 25, for the state: 1920 49
15. Marital condition of the population 15 years of age and over, for the state: 1920, 1910, and 1900 50
16. Total, white, and Negro population, with state of birth for natives, for the state: 1920 51
17. Country of birth of the foreign-born population, with citizenship of the foreign-born white, for the state: 1920 51
18. Year of immigration of the foreign-born population, for the state: 1920. 51
19. Foreign-born white population unable to speak English: 1920 51
20. School attendance, by age periods, for the state: 1920 52
21. School attendance, by single years from 5 to 20, for the state: 1920 52
22. Illiteracy of the population 10 years of age and over, by age periods, for the state: 1920 52
23. Country of origin and mother tongue of the foreign white stock, for the state: 1920 53
24. Ownership of homes, for counties and places having 10,000 inhabitants or more: 1920 53
25. Total males and females 10 years of age and over engaged in each selected occupation, classified by color or race, nativity, and parentage, and age periods, for the state: 1920 54
26. Women 15 years of age and over in each principal class of the population engaged in gainful occupations, classified by marital condition, with a distribution of the married by age periods, for the state: 1920. 58
MAP: Per cent of Negroes in total population, by counties: 1920 30

AGRICULTURE.

FARMS AND FARM PROPERTY 59
Map showing counties, principal cities, rivers, and mountains 60
Explanation of terms 61
Number of farms, acreage, and value 61
Farms by size 62
Farms by tenure 62
Farms by sex, race, and nativity of farmer 63
Farm mortgages 64
Farm expenditures for labor, fertilizer, and feed 64
LIVE STOCK ON FARMS AND ELSEWHERE 64
LIVE-STOCK PRODUCTS 66
CROPS 67
MISCELLANEOUS ITEMS (from second series of tabulations):
Age of farmers 70
Farmers classified by number of years on farm 70
Cooperative marketing and purchasing 70
Farm facilities—Motor vehicles, telephones, water, and light on farms 70
Pure-bred live stock on farms 70
Calves, pigs, and lambs raised on farms 71
Domestic animals sold or slaughtered on farms 71
Sales of selected crops 71
Fruit products of farms 71
Forest products of farms 71
Nurseries and greenhouses 71

AGRICULTURE—Continued.

Page.
COUNTY TABLES:
I.—Farms and farm property, 1920, with selected items for 1910 and 1900 .. 72
II.—Live stock on farms and ranges, 1920; live-stock products, 1919 84
III.—Domestic animals not on farms or ranges: 1920 84
IV.—Value of all crops, and acreage and production of principal crops: 1919. 90
V.—Mortgage debt, 1920; expenditures for labor, fertilizer, and feed, 1919 .. 108

DRAINAGE.

INTRODUCTION 113
MAP SHOWING APPROXIMATE LOCATION AND AREA OF OPERATING DRAINAGE ENTERPRISES 114
DRAINAGE ON FARMS 115
Explanation of terms 115
Farms and farm land 115
DRAINAGE ENTERPRISES 115
Explanation of terms 115
Operating and nonoperating enterprises 116
Location of enterprises 116
Condition of land in enterprises 116
Size of enterprises 116
Character of enterprises 117
Drainage works 118
Maintenance of works 118
Date of organization 119
Crops 119
COUNTY TABLES:
I.—Drainage on farms: 1920 119
II.—Operating drainage enterprises: 1920 121

MANUFACTURES.

EXPLANATION OF TERMS 123
GENERAL STATISTICS:
General character of the state 125
Comparative summary 126
Statistics for the state, by counties 127
Principal industries, ranked by value of products 128
Persons engaged in manufacturing industries 129
Average number of wage earners for selected industries, with per cent, by sex and age 129
Average number of wage earners, by sex and age, and value of products for cities of 10,000 inhabitants or more 130
Wage earners, by months 130
Wage earners, by months, for selected industries and for cities 130
Average number of wage earners, by prevailing hours of labor per week, for selected industries and for cities 131
Size of establishments, by average number of wage earners, for selected industries and for cities 133
Size of establishments, by value of products 133
Size of establishments, by value of products, for selected industries 134
Size of establishments, by value of products, for cities of 10,000 inhabitants or more 135
Character of ownership, for selected industries and for cities 136
Manufactures, by population groups, in cities of 10,000 inhabitants or more .. 137
Principal industries in cities of 50,000 inhabitants or more, with per cent of total for state 137
Number and horsepower of types of prime movers 138
Fuel consumed 138
SPECIAL STATISTICS:
Flour-mill and gristmill products 139
Lumber and timber products 139
Blast furnaces 139
Steel works and rolling mills 139
Slaughtering and meat packing 139
Printing and publishing 140
Leather, tanned, curried, and finished 140
Laundries 141
Dyeing and cleaning 141
Custom gristmills 141
Custom sawmills 141
GENERAL TABLES:
Table 29.—Comparative summary for selected industries and for cities: 1919, 1914, and 1909 142
Table 30.—Detailed statement of all industries combined and specified industries: 1919 144

MINES AND QUARRIES.

EXPLANATION OF TERMS 153
STATISTICS FOR THE STATE 154
GENERAL STATISTICS:
Comparative summary, producing enterprises: 1919 and 1909 155
Principal industries, producing enterprises, ranked by value of products: 1919 155
Character of organization, for selected industries, producing enterprises: 1919 155
Size of producing enterprises, by average number of wage earners, for selected industries: 1919 156
Number of producing enterprises and average number of wage earners, by prevailing hours of labor per week, for selected industries: 1919 156
Wage earners, by months, for selected industries: 1919 156
DETAILED STATISTICS FOR MINING INDUSTRIES: 1919 157

SUMMARY FOR THE UNITED STATES, BY GEOGRAPHIC DIVISIONS AND STATES,

	Division and State.	Population, Jan. 1, 1920.

[1] The number of whites and Negroes is less than total population, because of the inclusion in the total of other nonwhites (Indians, Chinese, Japanese, and "all other").

[2] Continental United States only. The total population of the United States, including outlying possessions, is 117,823,165, as follows: Continental United States, 105,710,620; Alaska, 55,036; Hawaii, 255,912; Porto Rico, 1,299,809; American Samoa, 8,056; Guam, 13,275; Panama Canal Zone, 22,858; Philippine Islands, 10,314,310 (Dec. 31, 1918); Virgin Islands, 26,051 (Nov. 1, 1917); military and naval, etc., services abroad, 117,238.

FOR POPULATION, AGRICULTURE, MANUFACTURES, AND MINES AND QUARRIES.

[*Table continued on following page.*]

POPULATION, JAN. 1, 1920.									AGRICULTURE.							
POPULATION 21 YEARS OF AGE AND OVER.												LAND IN FARMS, 1920				
All classes.				Foreign-born white.			Negro.									
Total.	Illiterate.		Native white.	Total.	Naturalized.	Per cent illiterate.	Total.	Per cent illiterate.	Farm population, 1920	Number of farms, 1920	Per cent operated by tenants.	Total (acres).	Average per farm.	Improved (acres).	Per cent improved.	
	Number.	Per cent.

[1] The gross value of farm products, obtained by adding the value of crops, live-stock products, etc., contains a considerable amount of duplication, on account of crops fed to live stock. It is roughly analogous to the value of products in manufactures, with its duplication on account of the use of the products of one establishment as materials in another.

[2] These include dairy products, wool and mohair, eggs and chickens, and honey and wax.

[3] Estimated value of domestic animals sold by farmers and animals slaughtered on the farms, whether for sale or for home consumption.

[4] These include forest products of farms valued (for the United States) at $394,321,828, nursery products valued at $20,434,389, and greenhouse products valued at $77,380,230.

FOR POPULATION, AGRICULTURE, MANUFACTURES, AND MINES AND QUARRIES.

MANUFACTURES.*											MINES AND QUARRIES.*								
Number of establishments.	Average number of wage earners. Total.	Rank.	Per cent distribution.	Male.	Female.	Wages. (Expressed in thousands.)	Cost of materials. (Expressed in thousands.)	Value of products. Amount. (Expressed in thousands.)	Rank.	Per cent distribution.	Number of establishments.	Number of mines and quarries.	Number of wells.	Average number of wage earners.[5] Total. KENTUCKY.

NUMBER AND DISTRIBUTION OF INHABITANTS.

Population of the state.—According to the Fourteenth Census, taken as of January 1, 1920, the population of Kentucky is 2,416,630, which represents an increase of 126,725, or 5.5 per cent, over the 1910 figure. During the same period the population of the United States increased by 14.9 per cent. The following summary shows the population of Kentucky from 1790 to 1920, inclusive, with the increase in each decade, in comparison with the per cent of increase for the United States as a whole:

POPULATION OF KENTUCKY: 1790 TO 1920.

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.	
1920	2,416,630	126,725	5.5	14.9
1910	2,289,905	142,731	6.6	21.0
1900	2,147,174	288,539	15.5	20.7
1890	1,858,635	209,945	12.7	25.5
1880	1,648,690	327,679	24.8	30.1
1870	1,321,011	165,327	14.3	22.6
1860	1,155,684	173,279	17.6	35.6
1850	982,405	202,577	26.0	35.9
1840	779,828	91,911	13.4	32.7
1830	687,917	123,600	21.9	33.5
1820	564,317	157,806	38.8	33.1
1810	406,511	185,556	84.0	36.4
1800	220,955	147,278	199.9	35.1
1790	73,677	.....	.....	.....

Counties.—Kentucky has 120 counties, of which 64 show decreases as compared with 1910. (See Table 1.)

A new county, McCreary, was organized between 1910 and 1920 from parts of three others, Pulaski, Wayne, and Whitley. It has been necessary, therefore, in preparing the maps following, showing rates of increase or decrease in total and rural population of counties during the past decade, to combine the four counties named.

Density of population.—The total land area of the state is 40,181 square miles. The average number of inhabitants to the square mile in 1920 is 60.1 (see Table 1), as against 57 in 1910 and 53.4 in 1900.

Minor civil divisions.—The political units into which the counties are divided are collectively termed "minor civil divisions." The primary divisions of the Kentucky counties are the magisterial districts, which number 755. There are also 391 secondary

HISTORICAL NOTE.—The word "Kentucky" is of Indian origin and has been variously defined as signifying "prairie or meadow land," "the hunting grounds," "at the head of a river," "river of blood," and "the dark and bloody ground." The last definition is the most generally accepted.

The region now constituting Kentucky was included within the limits of Virginia by the charters granted that colony by the English Crown in 1609 and in 1612. The French also laid claim to this territory, together with the rest of the Mississippi Valley on account of the explorations made by Marquette, Joliet, La Salle, and others in the latter part of the seventeenth century. All French claims to land east of the Mississippi were, however, relinquished in favor of Great Britain in 1763, at the close of the French and Indian War. In 1768, by the treaty made at Fort Stanwix, N. Y., the Six Nations together with certain other dependent tribes of Indians ceded to Great Britain their rights to territory south of the Ohio River, including all but a small part of the area now known as Kentucky.

The first white man to visit what is now Kentucky was probably La Salle, a French explorer, who is said to have sailed down the Ohio to the Louisville Rapids in 1669. Capt. Thomas Batts, of Virginia, may also have reached Kentucky on his trip of exploration to the western wilderness in 1671. The first white men known to have discovered this region, however, were the French missionaries, Marquette and Joliet, who in 1673 passed along the western boundary of Kentucky on their trip down the Mississippi. The first extensive explorations within the state were made in 1750 by Dr. Thomas Walker, and in 1751 by Christopher Gist. They were followed within the next 20 years by a number of explorers and surveyors, the most prominent among whom was Daniel Boone. In 1774 settlement began at various points, notably at Harrodsburg, and in 1775 Boonesborough was founded and fortified.

In 1775 a code of laws for the newly settled region was drawn up by the settlers, but this was not authorized by the legislature of Virginia, and in the following year Kentucky County, with Harrodsburg as the county seat, was organized, from a part of Fincastle County, Va. Eight years later the three counties then existing in this region were united into Kentucky district, with a district court of its own.

In spite of the hostility of the Indians the Kentucky settlements grew, and in 1786, twelve years after the period of settlement began, Virginia passed the first of four successive enabling acts giving conditional consent to the organization of Kentucky as a separate state. In 1792, under authority of an act passed by Congress in the preceding year, Kentucky adopted a constitution, and with its present boundaries was admitted to the Union as the fifteenth state.

divisions, comprising 63 cities, 327 towns, and 1 village. Each of 8 cities and 1 town is coextensive with the magisterial district in which located, while each of 25 cities and 25 towns comprises 2 or more districts or parts of districts. (See Table 2.)

Cities.—Kentucky has 63 cities, of which Louisville, with a population of 234,891, is the largest, and Covington, with 57,121, is the second in size. The only remaining cities having more than 25,000 inhabitants are Lexington and Newport. (See Tables 3 and 4.)

The following summary shows, for each city having 15,000 or more inhabitants in 1920, the population at each census for which figures are available, together with the number and per cent of increase during the preceding decade:

POPULATION OF PRINCIPAL CITIES FROM EARLIEST CENSUS TO 1920.

[1] Not returned separately.

Urban and rural population.—The Census Bureau defines urban population as that residing in cities and other incorporated places having 2,500 inhabitants or more, and rural population as that residing outside such incorporated places.

The following summary presents, for the last three censuses, figures showing the urban and rural population of the state distributed among places grouped according to specified limits of population. The classification for each census is based upon the population of the various places as shown by the returns of that census. Consequently the territory comprised within any one class of cities or that designated as urban or as rural does not remain fixed, because any given place may, through the growth or the decline of its population, pass from one class to another at successive censuses. The proportion of the population of Kentucky living in places of 2,500 or more increased from 21.8 per cent in 1900 to 24.3 per cent in 1910 and to 26.2 per cent in 1920.

[1] CHANGES IN BOUNDARIES, ETC.

ANDERSON.—Part of Washington annexed between 1880 and 1890.
BALLARD.—Part taken to form Carlisle in 1886.
BATH.—Part of Menifee annexed in 1878.
BELL.—Name changed from Josh Bell between 1870 and 1880. Part of Knox annexed in 1872.
BREATHITT.—Part taken to form part of Knott in 1884.
CARLISLE.—Organized from part of Ballard in 1886.
CLAY.—Part taken to form part of Leslie in 1878.
CUMBERLAND.—Part annexed to Russell in 1876.
ESTILL.—Part annexed to Powell between 1890 and 1900.
FLOYD.—Parts taken to form part of Martin in 1870 and part of Knott in 1884.
GRANT.—Part of Owen annexed between 1870 and 1880.
HARLAN.—Part taken to form part of Leslie in 1878.
JOHNSON.—Part taken to form part of Martin in 1870.
KNOTT.—Organized from parts of Breathitt, Floyd, Letcher, Magoffin, and Perry in 1884.
KNOX.—Part annexed to Bell in 1872.
LAUREL.—Part of Whitley annexed in 1876.
LAWRENCE.—Part taken to form part of Martin in 1870.

[2] Less than one-tenth of 1 per cent.

TABLE 1.—AREA AND POPULATION OF COUNTIES: 1850 TO 1920—Continued.

[1] CHANGES IN BOUNDARIES, ETC.

LESLIE.—Organized from parts of Clay, Harlan, and Perry in 1878.
LETCHER.—Part taken to form part of Knott in 1884.
MCCREARY.—Organized from parts of Pulaski, Wayne, and Whitley in 1912.
MAGOFFIN.—Part taken to form part of Knott in 1884.
MARTIN.—Organized from parts of Floyd, Johnson, Lawrence, and Pike in 1870.
MENIFEE.—Parts annexed to Bath and Morgan in 1878; parts of Powell and Wolfe annexed in 1880.
MORGAN.—Part annexed to Wolfe in 1878; part of Menifee annexed in 1878.
OWEN.—Part annexed to Grant between 1870 and 1880.
PERRY.—Parts taken to form part of Leslie in 1878 and part of Knott in 1884.
PIKE.—Part taken to form part of Martin in 1870.
POWELL.—Part annexed to Menifee in 1880; part of Estill annexed between 1890 and 1900.
PULASKI.—Part taken to form part of McCreary in 1912.
RUSSELL.—Part of Cumberland annexed in 1876.
WASHINGTON.—Part annexed to Anderson between 1880 and 1890.
WAYNE.—Part taken to form part of McCreary in 1912.
WHITLEY.—Part annexed to Laurel in 1876; part taken to form part of McCreary in 1912.
WOLFE.—Part of Morgan annexed in 1878; part annexed to Menifee in 1880.

TABLE 2.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920, 1910, AND 1900.

[District means magisterial district. Counties showing no comparative figures for magisterial districts for 1910 or 1900 have been redistricted at some time between the censuses. For other changes in boundaries, etc., between 1910 and 1920, see footnotes; for those between 1900 and 1910, see Reports of the Thirteenth Census: 1910, Vol. II, Table 1, p. 706. For population of incorporated places, see Table 3.]

MINOR CIVIL DIVISION.	1920	1910	1900
Adair County	**17,289**	**16,503**	**14,888**
District 1, Casey Creek	2,625	2,236	1,931
District 2, White Oak	2,987	2,785	2,527
District 3, Glenville	2,295	2,100	2,120
District 4, Gradyville	2,742	2,790	2,240
District 5, Keltner	1,428	1,377	1,688
District 6, Cane Valley, including Cane Valley town	1,990	2,118	1,624
District 7, Columbia, including Columbia town	3,222	3,097	2,758
Allen County	**16,761**	**14,882**	**14,657**
District 1, Scottsville, including Scottsville town	6,795	5,565	5,117
District 2, Butlersville	2,099	1,650	1,649

[12] LARUE.—District 2, Athertonville, returned as district 3, and district 3, Buffalo, returned as district 2, in 1910.

[13] LAUREL.—London town not returned by districts; total population of districts 1 and 2 can not, therefore, be shown separately.

[14] LETCHER.—District 7 organized from part of district 1, and district 8 from part of district 2, since 1910. Name of district 1 changed from Whitesburg, and district 2, from Millstone, since 1910.

TABLE 2.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920, 1910, AND 1900—Continued.

[District means magisterial district. Counties showing no comparative figures for magisterial districts for 1910 or 1900 have been redistricted at some time between the censuses. For other changes in boundaries, etc., between 1910 and 1920, see footnotes; for those between 1900 and 1910, see Reports of the Thirteenth Census: 1910, Vol. II, Table 1, p. 706. For population of incorporated places, see Table 3.]

MINOR CIVIL DIVISION.	1920	1910	1900
Lewis County	**15,829**	**16,887**	**17,868**
District 1, including Concord town	1,816	2,045	2,449
District 2, including Vanceburg town	4,189	4,169	4,264
District 3, including Quincy town	2,859	3,097	2,965

[1] Name changed from Mount Pleasant since 1910.
[2] Part in Grant County: 105 in 1920; 108 in 1910; 121 in 1900. Part in Owen County: 28 in 1920; 42 in 1910; 47 in 1900.
[3] Part in Bracken County: 56 in 1920; 52 in 1910; 59 in 1900. Part in Pendleton County: 7 in 1920; 13 in 1910; 22 in 1900.
[4] See county footnote, Table 2.
[5] Part in Shelby County: 168 in 1920; 21 in 1910. Part in Spencer County: 151 in 1920; 136 in 1910. Returned in 1900 as located wholly in Spencer County.
[6] Parts of districts 2 and 8 (population 3,631 in 1920) annexed to Owensboro city Jan. 26, 1920. Total population of Owensboro, including this annexation, 21,055.
[7] Corrected figures.

TABLE 3.—POPULATION OF INCORPORATED PLACES: 1920, 1910, AND 1900—Continued.

[The absence of population figures for 1910 or 1900 indicates that the place was incorporated at some date between the censuses, unless otherwise explained by footnote. Places which in 1910 were incorporated but, through surrender of charter or for other reasons, have no corporate existence in 1920 are not presented in this table.]

[1] Population of part of Corbin city (see Table 3).
[2] Less than *one-tenth of 1* per cent.
[3] Comprises all counties in which there were no incorporated places having 2,500 inhabitants or more in 1920. These counties are Adair, Allen, Anderson, Ballard, Bath, Boone, Bracken, Breathitt, Breckinridge, Bullitt, Butler, Calloway, Carlisle, Carroll, Carter, Casey, Clay, Clinton, Crittenden, Cumberland, Edmonson, Elliott, Fleming, Floyd, Gallatin, Garrard, Grant, Grayson, Green, Greenup, Hancock, Hart, Henry, Hickman, Jackson, Johnson, Knott, Larue, Laurel, Lawrence, Lee, Leslie, Lewis, Lincoln, Livingston, Lyon, McCreary, McLean, Magoffin, Marshall, Martin, Meade, Menifee, Metcalfe, Monroe, Morgan, Nelson, Nicholas, Ohio, Oldham, Owen, Owsley, Pendleton, Pike, Powell, Robertson, Rockcastle, Rowan, Russell, Spencer, Taylor, Todd, Trigg, Trimble, Washington, Wayne, Wolfe, and Woodford.

COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

This section gives detailed statistics as to the composition and characteristics of the population on January 1, 1920. It contains detailed tables which present statistics of color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, dwellings and families, and country of birth, for the state, and for its counties and cities. There are, besides, eight summary tables which reproduce from the detailed tables the more important state and city totals, and, also, tables which cover the following subjects, not included in the second series of state bulletins: Marital condition, state of birth, year of immigration, inability to speak English, country of origin, mother tongue, and ownership of homes. The full presentation of all these subjects is contained in Volume II of the Fourteenth Census Reports.

The principal occupations, as reported for persons 10 years of age and over, are given by sex, color or race, nativity, parentage, and age periods, followed by a summary, by marital condition and age groups, of women gainfully occupied.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented here.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

The statistics of marital condition relate only to persons 15 years of age and over, as the number of persons under 15 who are married, widowed, or divorced is naturally insignificant. The terms refer only to the marital status of the population on the census date.

The returns as to state of birth are valuable mainly for the light they throw on the migration of the native population within the United States; they show, for each state, the population residing there on January 1, 1920, distributed as born in the state or elsewhere.

Since the foreign-born population consists mainly of foreign-born whites, the statistics for citizenship relate to this class only. The classification embraces four groups, namely, persons reported as naturalized, persons reported as having taken out first papers; persons reported as aliens, and persons for whom citizenship was not reported.

The inquiry as to year of immigration supplies a means for determining what proportion of the immigrants who arrived during a given year or period of years were still alive and residing in this country on the census date.

The foreign white stock comprises the total of three classes, the foreign-born whites, the native whites of foreign parentage (both parents born abroad), and the native whites of mixed parentage (one parent native and the other foreign born). The term "country of origin," as used in this report, signifies the country of birth of the father of a foreign-born person or the foreign-born parent or parents of a native. The term "mother tongue" means the language of customary speech in the homes of immigrants before immigration.

[1] Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; and drivers for bakeries and laundries are classified with deliverymen in trade.
[2] Many of the "Clerks in stores" probably are "Salesmen."
[3] Includes, also, managers and superintendents of retail stores.
[4] Includes only those resident in continental United States at the date of the enumeration.

TABLE 25.—TOTAL MALES AND FEMALES 10 YEARS OF AGE AND OVER ENGAGED IN EACH SELECTED OCCUPATION, CLASSIFIED BY COLOR OR RACE, NATIVITY, AND PARENTAGE, AND AGE PERIODS, FOR THE STATE: 1920—Con.

SEX AND OCCUPATION.	Total.	COLOR OR RACE, NATIVITY, AND PARENTAGE.					AGE PERIODS.					
		Native white.		Foreign-born white.	Negro.	Ind., Chi., Jap., and all other.	10 to 17 years.	18 and 19 years.	20 to 24 years.	25 to 44 years (includes age unknown).	45 to 64 years.	65 years and over.
		Native parentage.	Foreign or mixed parentage.

AGRICULTURE—KENTUCKY.

INTRODUCTION.

In the following pages are presented all of the published results of the 1920 census of agriculture for this state and its counties, except certain detailed tabulations for the state which appear in Volume V of the Fourteenth Census Reports and a few minor items which have been published in special bulletins. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	2,416,630	2,289,905	126,725	5.5
Rural [2]	1,783,087	1,734,463	48,624	2.8
Urban	633,543	555,442	78,101	14.1

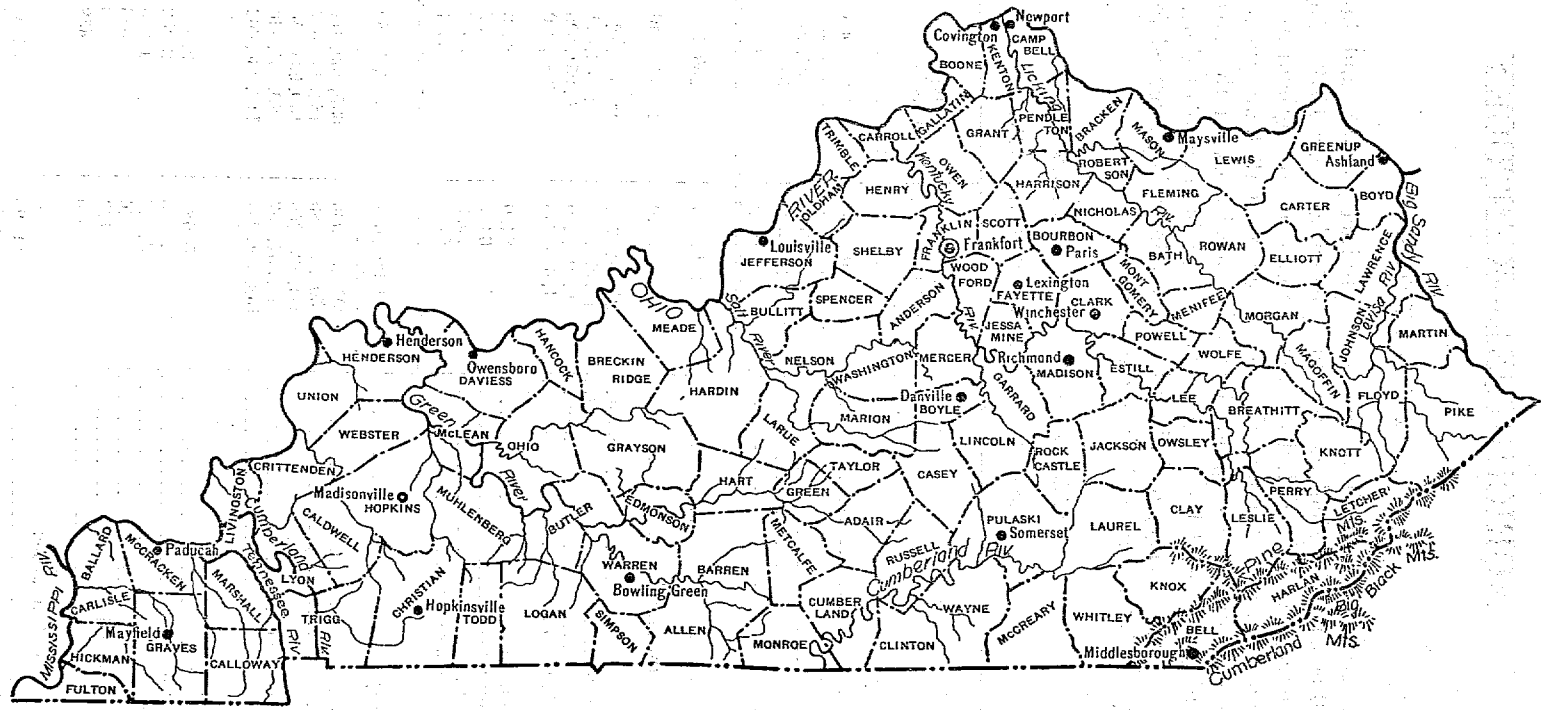
Improved land in farms ... acres	13,975,746	14,354,471	−378,725	−2.6
Woodland in farms ... acres	6,018,280	6,951,626	−933,346	−13.4
Other unimproved land in farms ... acres	1,618,746	883,030	735,716	83.3
Per cent of land area in farms	84.0	86.3		
Per cent of farm land improved	64.7	64.7		
Average acreage per farm	79.9	85.6	−5.7	−6.7
Average improved acreage per farm	51.6	55.4	−3.8	−6.9
Value of all farm property	$1,511,901,077	$773,797,880	$738,103,197	95.4
Land and buildings	1,305,158,936	635,459,372	669,699,564	105.4
Land alone	1,050,752,680	484,464,617	566,288,063	116.9
Buildings	254,406,256	150,994,755	103,411,501	68.5
Implements and machinery	48,354,857	20,851,846	27,503,011	131.9
Live stock	158,387,284	117,486,662	40,900,622	34.8
Average value per farm:				
All farm property	5,587	2,986	2,601	87.1
Land and buildings	4,823	2,452	2,371	96.7
Land alone	3,883	1,869	2,014	107.8
Buildings	940	583	357	61.2
Implements and machinery	179	80	99	123.8
Live stock	585	453	132	29.1
Average value per acre of land in farms:				
All farm property	69.95	34.87	35.08	100.6
Land and buildings	60.39	28.64	31.75	110.9
Land alone	48.62	21.83	26.79	122.7
Buildings	11.77	6.80	4.97	73.1
Implements and machinery	2.24	0.94	1.30	138.3
Live stock	7.33	5.29	2.04	38.6

[1] A minus sign (−) denotes decrease.
[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,713,145. For this territory, the increase in population between 1910 and 1920 was 4.1 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

KENTUCKY

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

CENSUS YEAR.	FARMS.		LAND IN FARMS.

Tenants	90,330	87,860	82,898	81,837	158	262	7,274	5,761

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	179,327	170,332	8,995	5.3	100.0	100.0
Free from mortgage	116,613	135,505	−18,892	−13.9	65.0	79.6
Mortgaged	40,615	33,039	7,576	22.9	22.6	19.4
Unknown	22,099	1,788	20,311	.....	12.3	1.0

[1] A minus sign (−) denotes decrease. Per cent not shown when more than 1,000. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890

Free from mortgage	116,613	135,505	120,219	118,080	65.0	79.6	81.7	95.9
Mortgaged	40,615	33,039	22,574	4,991	22.6	19.4	14.6	4.1
Unknown	22,099	1,788	5,766	.....	12.3	1.0	3.7	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	35,531	25,846	9,685	37.5
Value of land and buildings	$230,557,435	$81,315,441	$149,241,994	183.5
Amount of mortgage debt	$67,116,481	$23,411,430	$43,705,051	186.7
Ratio of debt to value, per cent	29.1	28.8	.....	.....
Average rate of interest paid, per cent	6.0	.....	.....	.....
Average value per farm	$6,489	$3,146	$3,343	106.3
Average debt per farm	$1,889	$906	$983	108.5
Average equity per farm	$4,600	$2,240	$2,360	105.4

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	76,953	91,642	−14,689	−16.0	28.4	35.4
Fertilizer	86,687	56,783	29,904	52.7	32.0	21.9
Feed	119,689	65,693	53,996	82.2	44.2	25.3

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$18,152,309	$12,243,851	$5,908,458	48.3
Amount in cash	15,292,169	10,007,302	5,284,867	52.8
Value of rent and board furnished	2,860,140	2,236,549	623,591	27.9
Fertilizer	3,597,449	1,350,720	2,246,729	166.3
Feed	16,016,669	4,014,998	12,001,671	298.9

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk,* although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Kentucky the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 514,917, as compared with 409,834 "cows

kept for milk" reported for April 15, 1910. This represents an increase of 105,083, or 25.6 per cent. The number of "beef cows" reported for January 1, 1920, was 134,680, as compared with 101,232 "cows not kept for milk" reported for April 15, 1910, representing an increase of 33,448, or 33 per cent. The percentage of increase shown for dairy cows would doubtless have been larger, except for the change in classification mentioned above, and the percentage of increase shown for beef cows correspondingly smaller.

Farms reporting domestic animals: 1910.—Horses were reported by 175,945 farms in Kentucky in 1910, mules by 97,796 farms, cattle by 220,608, sheep by 45,697, and swine by 172,846. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Kentucky increased from 259,185 in 1910 to 270,626 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

CLASS.	FARMS REPORTING.		ANIMALS.

All other hogs, 6 months old and over	76,053	28.1	450,266	5,975,057	13.27

TABLE 24.—POULTRY AND BEES ON FARMS: 1920 AND 1910.

ITEM.	FARMS REPORTING, 1920.		NUMBER REPORTED.[1]		Value, 1920	Average value, 1920
	Number.	Per cent of all farms.	1920 (Jan. 1)	1910 (Apr. 15)		
Poultry, total	241,489	89.2	11,020,231	[2] 8,764,204	$9,256,715	$0.84
Chickens	241,313	89.2	10,477,598	8,000,457	8,407,680	0.80
Turkeys	36,185	13.4	168,326	188,292	533,065	3.17
Ducks	15,712	5.8	99,577	98,706	76,508	0.77
Geese	23,576	8.7	177,420	399,932	191,311	1.08
Guinea fowls	12,733	4.7	74,698	46,721	41,185	0.55
Pigeons	1,932	0.7	22,612	29,613	6,966	0.31
Hives of bees	34,665	12.8	156,889	152,991	567,230	3.62

[1] The numbers of the different classes of poultry are not strictly comparable for the two censuses, since a considerable number of fowls are killed between Jan. 1 and Apr. 15.
[2] Includes a small number of peafowls.

TABLE 25.—SELECTED CLASSES OF DOMESTIC ANIMALS ON FARMS: 1920 AND 1910.

CLASS.	NUMBER.		INCREASE.[1]	
	1920 (Jan. 1)	1910 (Apr. 15)	Number.	Per cent.
Horses:				
Total, excluding spring colts reported for 1910	382,442	425,884	−43,442	−10.2
Colts under 1 year old on Jan. 1 of census year	18,526	38,089	−19,563	−51.4
Horses 1 year old and over on Jan. 1 of census year	363,916	387,795	−23,879	−6.2
Mules:				
Total, excluding spring colts reported for 1910	292,857	216,915	75,942	35.0
Mule colts under 1 year old on Jan. 1 of census year	23,450	21,240	2,210	10.4
Mules 1 year old and over on Jan. 1 of census year	269,407	195,675	73,732	37.7
Cattle:				
Total, excluding spring calves reported for 1910	1,093,453	898,444	195,009	21.7
Calves under 1 year old on Jan. 1 of census year	266,348	233,767	32,581	13.9
Cows and heifers 1 year old and over on Jan. 1 of census year	649,597	511,066	138,531	27.1
Steers and bulls 1 year old and over on Jan. 1 of census year	177,508	153,611	23,897	15.6
Sheep:				
Total, excluding spring lambs reported for 1910	707,845	778,154	−70,309	−9.0

[1] A minus sign (−) denotes decrease.

TABLE 26.—DOMESTIC ANIMALS NOT ON FARMS: 1920 AND 1910.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING.		Number or quantity.	Unit.	Value.
	Number.	Per cent of all farms.			
Dairy cows on farms Jan. 1, 1920, total	206,048	76.1	441,346	Head	
On farms reporting milk produced	182,365	67.4	392,745	Head	
On farms not reporting milk produced	23,683	8.8	48,601	Head	
Average production of milk per dairy cow, 1919 [1]			310	Gals	
Specified dairy products:					
Milk, as reported 1919			131,495,154	Gals	
1909			125,566,917	Gals	
Increase, 1909-1919			5,928,237	Gals	
Per cent of increase			4.7		
Total production of milk, including estimates 1919			146,561,464	Gals	
Butter made 1919	191,825	70.9	34,080,415	Lbs	$14,355,559
1909	194,299	75.0	38,130,687	Lbs	$7,117,905

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, including the percentage of increase for the decade in acreage, production, and value.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Kentucky in 1919 for which the acreage was reported was 6,303,182, which represents 45.1 per cent of the total improved land in farms (13,975,746 acres). The total crop acreage reported for 1909 was 6,046,028, or 42.1 per cent of the improved land in farms (14,354,471 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 40,891 acres of mature crops grazed or "hogged off" and 400 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	Number. 1909	Per cent of all farms. 1919	Per cent of all farms. 1909	ACRES HARVESTED. 1919	1909	Per cent of increase.[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase.[1]	Value. 1919	1909	Per cent of increase.[1]

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100.
[2] Excluding 931,451 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] The 1909 figures include a small quantity of emmer and spelt.
[4] Less than one-tenth of 1 per cent.
[5] Principally oats and peas grown and harvested together.
[6] Includes small quantities of sunflower seed (1919 and 1909) and of flaxseed and tobacco seed (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.
[7] The total values include the value of small quantities of flower and vegetable seeds. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[9] Includes millet and Hungarian grass.
[10] The 1919 figures represent vegetables raised for sale only.
[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[12] These crops comprise ginseng (1919 and 1909) and willows and hops (1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	3,247,167	3,436,340	3,319,257	2,960,382	3,021,176
Oats	229,464	174,315	316,590	645,316	403,416
Wheat	839,987	681,323	1,431,027	898,694	1,160,108
Hay and forage	[1] 2,084,909	976,038	683,139	661,705	300,251
Potatoes	50,069	55,750	37,160	49,366	
Tobacco	634,038	469,795	384,805	274,587	226,120

[1] Includes 931,451 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 1,153,458 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

Walnuts (Persian or English)	66	106	(3)	(3)	304	1,227	Lbs.	2,839	35,825	711	1,499

[1] Includes apricots, quinces, and (for 1910) mulberries. Since these fruits were not called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] The figures for 1910 and 1909 include grapefruit, olives, and Japanese persimmons.
[3] Less than one-tenth of 1 per cent.
[4] The figures for 1910 and 1909 include almonds, and also black walnuts and several other varieties of nuts not called for by the 1920 schedule.

Age of farmers.—A farmer or farm operator, as defined for census purposes, is a person who operates a farm. The number of farm operators, for which the age distribution is shown in the following table, is therefore the same as the number of farms.

TABLE 40.—FARM OPERATORS CLASSIFIED ACCORDING TO AGE, COLOR, AND TENURE: 1920 AND 1910.

AGE AND COLOR.	TOTAL.		OWNERS.		MANAGERS.		TENANTS.	
	1920	1910	1920	1910	1920	1910	1920	1910

Farmers classified by number of years on farm.—In the following table the farmers of the state are classified according to the number of years they had been on the farms which they were operating when the census was taken. The purpose of this classification is to show the relative stability of the different classes.

TABLE 41.—FARM OPERATORS CLASSIFIED ACCORDING TO NUMBER OF YEARS ON FARM, BY COLOR AND TENURE: 1920 AND 1910.

NOTE.—In 1920 the date of enumeration (January 1) came just before the period during which changes from one farm to another are commonly made in most localities, and hence at a time when many farmers had almost, but not quite, completed one, two, or more years on their farms. Considerable numbers of these farmers reported one, two, or more full years, in place of reporting the correct number of months (or years and months). In 1910, however, the enumeration date (April 15) was late enough so that, in localities where the common moving time was in the early part of the year, the number of years of occupancy was accurately reported. These differences seriously affect the comparability of the returns, especially for the first two years of occupancy. Hence these two years, which were tabulated separately and are so published in Volume V of the Fourteenth Census Reports, have been combined in the following table.

NUMBER OF YEARS ON FARM AND COLOR.	TOTAL.		OWNERS.		MANAGERS.		TENANTS.	
	1920	1910	1920	1910	1920	1910	1920	1910

Cooperative marketing and purchasing.—Cooperative marketing of farm products or cooperative purchasing of supplies through farmers' organizations in 1919 was reported by 4,543 farms in Kentucky, including 1,299 farms which reported both sales and purchases, 2,199 farms which reported sales only, and 1,045 farms which reported purchases only.

TABLE 42.—COOPERATIVE MARKETING AND PURCHASING THROUGH FARMERS' ORGANIZATIONS: 1919.

ITEM.	FARMS REPORTING.		AMOUNT.	
	Number.	Per cent of all farms.	Total.	Average per farm.
Marketing or purchasing	4,543	1.7	.....	.....

Purchasing	2,344	0.9	381,406	163

Farm facilities—Motor vehicles, telephones, water, and light on farms.—The following table indicates the extent to which the farmers of Kentucky used motor vehicles and telephones, and the extent to which the farm homes were supplied with water and modern lighting facilities.

TABLE 43.—MOTOR VEHICLES, TELEPHONES, WATER, AND LIGHT ON FARMS: 1920.

ITEM.	FARMS REPORTING.		Number reported.	Number per 1,000 of all farms.
	Number.	Per cent of all farms.

Water piped into house	5,139	1.9	.....	.....
Gas or electric light	5,925	2.2	.....	.....

Pure-bred live stock on farms.—The inquiry relating to pure-bred live stock called for registered animals only, but it seems evident, from a study of the returns, that some animals merely eligible for registry (but not actually registered) were included in the reports.

The number of farms in Kentucky in 1920 was 270,626, of which number 253,144 reported domestic animals of some kind, and 11,379 reported pure-bred live stock.

TABLE 44.—PURE-BRED LIVE STOCK CLASSIFIED ACCORDING TO BREED: 1920.

NOTE.—Pure-bred horses reported in Kentucky represented 0.9 per cent of all horses on farms (see Table 23); pure-bred cattle, 1.8 per cent of the total; pure-bred sheep, 0.8 per cent; and pure-bred swine, 2.2 per cent.

BREED.	Number.	BREED.	Number.
Horses, total	3,491	**Sheep, total**	5,549

[1] Includes animals reported as pure bred, with breed not specified.

Calves, pigs, and lambs raised on farms.—The figures presented include young animals born in 1919, which were retained on the farm, sold to others, or slaughtered for food, but do not include young animals purchased or those that died.

TABLE 45.—CALVES, PIGS, AND LAMBS RAISED ON FARMS: 1919.

ITEM.	FARMS REPORTING.		ANIMALS RAISED.	
	Number.	Per cent of all farms.	Number.	Average per farm.

Pigs	120,498	44.5	1,605,133	13.3
Lambs	25,157	9.3	491,700	19.5

Domestic animals sold or slaughtered on farms.—The number of cattle, swine, and sheep slaughtered on farms was reported for both 1919 and 1909, but the farm schedule for 1919 carried no inquiry with regard to the value of the animals slaughtered, or with regard to the number or value of the animals sold by farmers. The total value of domestic animals sold or slaughtered on farms in Kentucky in 1919 has been estimated, however, at $96,800,000, as compared with $54,733,377, the value reported for 1909.

TABLE 46.—DOMESTIC ANIMALS SLAUGHTERED ON FARMS: 1919 AND 1909.

ITEM AND CENSUS YEAR.	FARMS REPORTING.		ANIMALS SLAUGHTERED.		Meat and meat products sold (pounds).

[1] Includes vinegar other than that made from cider.

Forest products of farms.—Forest products, as defined on the farm schedule, include firewood, fence posts, crossties, pulp wood, saw logs, poles, etc., and standing timber sold and cut during the years indicated. The figures cover only forest products of farms and do not represent by any means the total value of all forest products cut in the state during the census years.

TABLE 49.—FOREST PRODUCTS OF FARMS: 1919 AND 1909.

ITEM.	1919	1909
Forest products of farms:

[1] The fact that the farm acreage shown for certain counties exceeds the total land area of the county is accounted for partly by the fact that the irregular boundaries of the counties make it difficult to compute exactly the total land area, partly by inaccurate farm surveys which exaggerate the farm acreage, and partly by the fact that the farms situated on the county line are included entirely in one county or the other.

DRAINAGE—KENTUCKY.

INTRODUCTION.

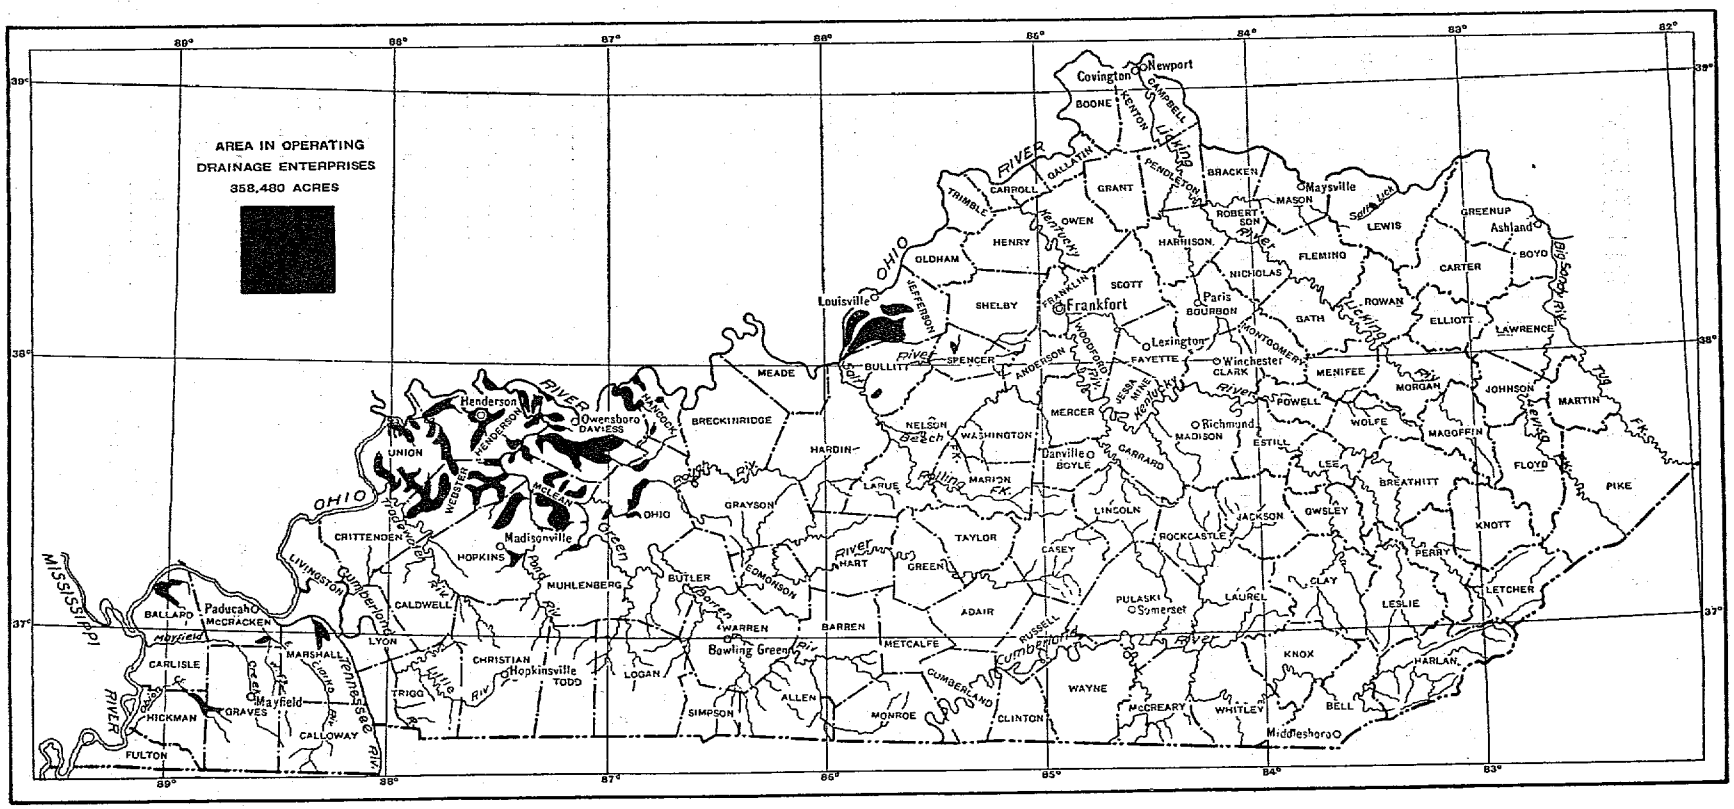
The following pages present the statistics of drainage for Kentucky collected at the census of 1920. The figures relate to conditions on January 1, 1920, except where indicated otherwise. No census of drainage has been taken heretofore, so there are no comparable figures for previous years. The data relate to the artificial drainage of land in farms and of other land that ultimately will be used for agricultural purposes. The organized drainage enterprises may include considerable areas of timbered and other unimproved land not yet in farms. The statistics for drainage on farms were collected in the general census of agriculture, while the statistics for drainage enterprises were obtained in a special canvass of those enterprises. Since drainage on farms may be either inside or outside an organized enterprise, and the drains that each individual owner installs upon his own farm may be either supplemental to or entirely independent of the works installed by an enterprise, the figures for the two parts of the drainage census are presented separately.

TABLE 1.—SUMMARY FOR THE STATE: 1920.

ITEM.	Amount.	Per cent of total.
DRAINAGE ON FARMS.		
Number of all farms in the state	270,626	100.0
Farms reporting land having drainage	5,817	2.1
Farms reporting land needing drainage	19,592	7.2
All land in farms ... acres	21,612,772	100.0
Improved land in farms ... acres	13,975,746	64.7
Farm land reported as provided with drainage ... acres	225,228	1.0
Farm land reported as needing drainage ... acres	573,299	2.7
Needing drainage only ... acres	84,189	0.4
Needing drainage and clearing ... acres	489,110	2.3
DRAINAGE ENTERPRISES.		
Approximate land area of the state ... acres	25,715,840	100.0
All land in operating drainage enterprises ... acres	358,480	1.4
Improved land ... acres	245,334	1.0
Per cent of all improved land in farms	1.8	.....
Timber and cut-over land ... acres	92,495	0.4
Other unimproved land ... acres	20,651	0.1
Swampy, subject to overflow, seeped, or alkali ... acres	69,413	0.3
Suffering a loss of crops from defective drainage ... acres	36,723	0.1
Improved land prior to drainage ... acres	181,915	0.7
Increase since drainage began ... acres	63,419	0.2
Land in nonoperating enterprises ... acres	113,394	0.4
Open ditches in operating enterprises ... miles	741.5	100.0
Completed ... miles	664.5	89.6
Additional under construction ... miles	77.0	10.4
Tile drains in operating enterprises ... miles	87.2	100.0
Completed ... miles	86.2	98.9
Additional under construction ... miles	1.0	1.1
Total capital invested in and required for completion of operating enterprises	$1,820,996	100.0
Capital invested in these enterprises to Dec. 31, 1919	1,521,725	83.6
Additional capital required to complete these enterprises	299,271	16.4
Average cost per acre when completed	5.08	.....

KENTUCKY

Approximate Location and Area of Operating Drainage Enterprises.



DRAINAGE ON FARMS.

Explanation of terms.—To secure uniformity in the returns relating to drainage on farms, the Bureau of the Census supplied its enumerators with certain definitions, which are substantially as follows:

Drainage of agricultural land was defined, for census purposes, as the act or process of drawing off an excess of water by underground conduits, pipes, or tiles, or by open or covered trenches in the surface of the ground, for the purpose of improving the condition of the soil and crops.

The area provided with drainage, in farms, is the acreage actually benefited or made of more value for agricultural purposes by artificial drainage, but does not include land on which only temporary work has been done, such as "bedding" the fields or laying out "dead furrows" to hasten the surface flow.

The area needing drainage, in farms, comprises the additional land not now suitable for crops which could be made available for cultivation (1) "by drainage only," which is the acreage needing no clearing or which is covered with grass, weeds, or other annual growth, and (2) "by drainage and clearing," which is the acreage covered with trees, stumps, or perennial woody shrubs.

Improved land in farms includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland in farms includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

Farms in drainage and levee districts are those for which the operators have answered affirmatively the question, "Has any part of this farm been afforded drainage or protection against overflow by a drainage or levee district, or by the state, the county, or a private company or individual." Levee districts, however, generally are not included in the enterprises for which data are given in this report (see definition of drainage enterprises, below).

Farms and farm land.—The acreage shown for drainage on farms represents land where drainage is actually in operation and which has actually become more fully available for growing crops by reason of the drainage. This is to be distinguished from the area merely provided with outlet facilities by organized drainage enterprises. Drainage on farms represents in most cases the result of work done by the farm owner, either independently or supplemental to the work done by a drainage enterprise, but the acreage would include also any farm land receiving similar benefits directly from the works of an enterprise.

DRAINAGE ENTERPRISES.

Explanation of terms.—The more important terms used in connection with the census of drainage enterprises were defined as follows:

Drainage enterprises comprise public corporations and local improvement districts formed under state laws, commercial enterprises draining swamp or overflowed land for sale, other organizations that may be engaged in extensive land-drainage work, and also tracts of 500 acres or more drained by individual owners. Enterprises such as levee districts that have not authorized the construction of open ditches or tile drains are not included.

Enterprises located in more than one county were divided, for tabulation, and the part in each county treated as a separate enterprise, though the capacities of drainage pumping plants are given only in the counties in which the plants are located.

Operating enterprises, as designated in this bulletin, are those that had completed the drainage works authorized, or had at any rate begun actual construction work, on or before January 1, 1920; enterprises that had been established but had not begun construction are termed "nonoperating."

Land in drainage enterprises comprises the area that has been benefited or is to be benefited by the improvement works constructed by the enterprises. In the case of overlapping enterprises, deduction has been made for the amount of duplication.

All land in drainage enterprises is divided, without regard to drainage condition, into (*a*) improved land; (*b*) timber and cut-over land, which would require clearing to be thoroughly fit for cultivation; and (*c*) all other unimproved land, which would not require expensive clearing before cultivation.

The assessed acreage for any single enterprise is the same as the area in that enterprise. However, the total assessed acreage may be considerably greater than the total land in enterprises, for in summing up the assessed acreage in the county or state, deduction was not made for acreage assessed in more than one enterprise.

Improved land in drainage enterprises consists very largely of improved farm land, though it may include some other improved land receiving benefit from the works of the enterprises.

Timber and cut-over land includes farm woodland of natural or planted forest trees as well as other timber land or areas that would need clearing of trees, stumps, or perennial woody shrubs.

Land designated as swampy or subject to overflow includes all land permanently or generally too wet for cultivation, land subject to periodical inundation by stream floods, seeped and alkali land in irrigated regions, and all other land unfit for cultivation by reason of insufficient drainage. This classification is without respect to the conditions as to improvement or timber.

The area suffering loss of crops is intended to include only land devoted to planted crops which suffer damage, either partial or complete, because of defective drainage. Land which would be cultivated if drained or protected against overflow is not included.

Capital invested, for the purpose of this investigation, was defined as cost, including charges for engineering, organization, rights of way, construction of drainage works, damages, land and buildings except those held for sale or farming, and any other expenditures properly chargeable to drainage and paid by the enterprise.

The drainage works of an enterprise include all varieties of underground conduits, pipes, or lines of tile, or drains of stone, wood, or other material; also open ditches and canals, together with accessory levees, dikes, dams, weirs, pumping machinery, gates, and other devices for the draining away or control of surface and soil waters.

Tile, as the term is here used, includes pipes of earthenware, concrete, or other material buried beneath the surface in such a way as to permit the excess water to flow away. The size, if circular, is expressed by the inside diameter in inches.

Ditches include all open artificial trenches, usually with sloping sides. The width is that of the bottom.

The type of drainage shows whether the drainage water from an enterprise is discharged by gravity or by pumping.

A pumping district is one where all or a part of the water from the drains collecting at a low point must be raised by some form of machinery in order that it may be removed from the area.

Drainage pumps include all kinds of machinery and devices for lifting the drainage water.

Pumping engines include all kinds of engines and motors for operating the drainage pumps.

Operating and nonoperating enterprises.—In most of the tables that follow, statistics are given for operating enterprises only. These enterprises, as already defined, include both those which have completed their drainage works and those with such works under construction; among the latter may be some that had completed the original plan of reclamation several years ago but were constructing extensions or enlargements on January 1, 1920. The nonoperating enterprises have a legal existence, though they have not yet accomplished any drainage. They may include districts that on the census date had completed their plans, sold bonds to cover the cost of the undertaking, and let contracts for the construction work, and also *districts that had just been established by court* decree and were still subject to considerable change in area, plan of drainage works, and cost.

TABLE 2.—LAND AND CAPITAL INVESTED IN ALL ENTERPRISES, CLASSIFIED AS BETWEEN OPERATING AND NONOPERATING ENTERPRISES: 1920.

CLASS.	LAND.		CAPITAL.[1]		
	Acreage.	Per cent of total.	To Dec. 31, 1919. Amount.	To Dec. 31, 1919. Per cent of total.	Additional required to complete.
All organized enterprises	471,874	100.0	$1,620,027	100.0	$1,825,513
Operating enterprises	358,480	76.0	1,521,725	93.9	299,271
With works completed	288,143	61.1	1,278,701	78.9	.....
With works under construction	70,337	14.9	243,024	15.0	299,271
Nonoperating enterprises	113,394	24.0	98,302	6.1	1,526,242

[1] The inquiry asked for the "total cost of the enterprise to Dec. 31, 1919," and for an "estimate of additional investment to complete."

Location of enterprises.—Almost two-thirds of the area in operating drainage enterprises in Kentucky are situated in Daviess and Henderson Counties and the counties adjoining. One-fourth of the area is in Jefferson County, and nearly all the rest is in the counties west of Tennessee River.

TABLE 3.—LAND AND CAPITAL INVESTED IN ALL ENTERPRISES, CLASSIFIED BY DRAINAGE BASIN: 1920.

DRAINAGE BASIN.	LAND.		CAPITAL.		
	Acreage.	Per cent of total.	To Dec. 31, 1919. Amount.	To Dec. 31, 1919. Per cent of total.	Additional required to complete.
All organized enterprises	471,874	100.0	$1,620,027	100.0	$1,825,513
Operating enterprises	358,480	76.0	1,521,725	93.9	299,271
Green River	138,829	29.4	629,517	38.9	46,869
Mississippi River	8,079	1.7	50,000	3.1	.....
Ohio River	203,392	43.1	760,042	46.9	252,402
Tennessee River	8,180	1.7	82,166	5.1	.....
Nonoperating enterprises	113,394	24.0	98,302	6.1	1,526,242
Green River	73,045	15.5	.....	.....	957,050
Mississippi River	21,143	4.5	50,000	3.1	500,000
Ohio River	19,206	4.1	48,302	3.0	69,192

One enterprise under private ownership in Lewis County is the only operating enterprise found in the eastern half of the state. From most of the enterprises the drainage water is discharged into one or another of the smaller tributaries of Ohio River.

Condition of land in enterprises.—In the extreme western end of the state the drainage enterprises are for the purpose of relieving the bottom land in the narrow stream valleys, which is subject to overflow in flood seasons. In the group of counties where the greatest amount of drainage has been done, in the region of Henderson and Owensboro, the enterprises are for draining rather broad tracts of swamp land caused by overflow of the larger tributaries of Ohio River. The lower courses of such streams as Green River and its principal branches have but slight fall, and the channels are not sufficient to carry the more rapid run-off from the rolling land lying to the south and east. The nature of the drainage problem in the vicinity of Louisville is similar to that just described. In all counties along the Ohio and the Mississippi, high water in those rivers causes overflow of considerable areas.

The usual purpose of an organized enterprise is merely to provide adequate outlets into which the landowners of the district may drain their farms, and to afford relief from overflow for the district as a unit. Therefore, the fact that an enterprise which has completed the construction of the drainage works authorized contains land still swampy or subject to overflow, or land that suffers damage to crops, does not show that the improvement works are inadequate.

TABLE 4.—LAND IN ALL ENTERPRISES, CLASSIFIED BY CONDITION: 1920.

CONDITION OF LAND.	OPERATING ENTERPRISES.				Nonoperating enterprises (acres).
	Total. Acreage.	Total. Per cent of total.	Works completed (acres).	Works under construction (acres).	
All land in enterprises	358,480	100.0	288,143	70,337	113,394
Improved land	245,334	68.4	209,468	35,866	67,526
Timber and cut-over land	92,495	25.8	71,152	21,343	28,539
Other unimproved land	20,651	5.8	7,523	13,128	17,329
Swampy or subject to overflow	69,413	19.4	37,429	31,984	55,339
Suffering loss of crops	36,723	10.2	26,673	10,050	875

Size of enterprises.—Presentation of the statistics by counties requires that an enterprise located in more than one county be divided, and the part in each county be considered a separate enterprise. In this way 179 operating drainage enterprises are counted in Kentucky, with an average area of 2,003 acres each. There are 18 such enterprises of 5,000 acres or more each, 100 of between 500 and 5,000 acres, and 61 of less than 500 acres each. There is no overlapping of the enterprises in this state.

TABLE 5.—LAND IN OPERATING ENTERPRISES, CLASSIFIED BY SIZE OF AREA ASSESSED: 1920.

SIZE GROUP.	Land in enterprises (acres).	ASSESSED AREA.	
		Acreage.	Per cent of total.
All operating enterprises	358,480	358,480	100.0
Less than 200 acres	1,651	1,651	0.5
200 to 499 acres	16,537	16,537	4.6
500 to 999 acres	23,143	23,143	6.5
1,000 to 4,999 acres	130,176	130,176	36.3
5,000 to 9,999 acres	79,592	79,592	22.2
10,000 to 49,999 acres	107,381	107,381	30.0

Character of enterprises.—Very nearly all of the drainage enterprises in Kentucky are drainage districts under the control of the county drainage commissioners, though the enterprises in Jefferson County are county drains under the fiscal court, and nine of the operating enterprises in the state are under individual ownership. The drainage law of 1912 provided that in each county where there is a public ditch, drain, levee, or similar improvement established, the county judge should appoint a board of three drainage commissioners. An amendment in 1918 provides for the appointment of one county drainage commissioner when the term of the existing board should expire.

The drainage districts, with one exception, have been established by decree of the county judges in accordance with the laws of July 10, 1893 (ch. 266), of March 23, 1900 (ch. 30), and of March 19, 1912 (ch. 132). Each of these superseded the earlier statute. The first of these acts was the first general drainage law of the state.

Under the first drainage law, one or more persons interested filed a petition for a drain, and the county judge appointed three viewers to examine the land that would be affected by the proposed work, to locate the drain, to assess benefits and damages, and to determine whether the proposed improvement would be of public utility and benefit. The judge ordered the district established or he dismissed proceedings, in accordance with the report of the viewers, except that in case of remonstrance a report was first obtained from reviewers specially appointed by the judge to review the work and findings of the first viewers. Construction of the drain was apportioned to the landowners in proportion to the benefits they would receive. For work not done by the landowners, contract was let by the county clerk and the costs were collected by the sheriff. The requirements and method of procedure under the law of 1900 were very similar to those under the law of 1893.

The law of 1912 required only that the petition for the drainage district be signed by one or more owners of land that would be assessed for the enterprise, but the amendment of March 28, 1918 (ch. 114), requires the signatures of at least 25 per cent of the landowners, or of the owners of not less than 25 per cent of the land to be affected. A board of three viewers appointed by the county judge makes such a survey of the proposed district as is necessary to report regarding the practicability and utility of the project and the boundary of the area that will be benefited. If the report is unfavorable, proceedings are dismissed at the cost of the petitioners. If the report is favorable, public hearing upon it is held by the county court before the order of establishment is issued. Appeals may be taken to the circuit court and to the court of appeals. The county board of drainage commissioners employs an engineer to make plans and specifications for the drainage improvements. Damages then are assessed by the original viewers, who also divide the land in the district into five classes for assessment of the cost of the district. The cost assessments per acre in the five classes are made in the ratio 5 : 4 : 3 : 2 : 1. When necessary, in order to secure substantial justice, the number of classes may be increased or diminished. Benefits to railroad companies are assessed as fixed sums. The amendment of March 28, 1918, permits the viewers to estimate the value of the benefits that will accrue to each tract instead of classifying the land. If the total cost averages less than 25 cents per acre, it is collected in one installment; if more than 25 cents per acre, the drainage commissioners issue bonds running 2 to 11 years for the amount of the cost assessments not paid within 30 days.

Separate drainage districts may be formed under the law of 1912, to be under the control of special commissioners elected by the landowners instead of under the county drainage commissioners. When the improvement works have been constructed and paid for, control of the enterprise passes to the county drainage commissioners. A special petition for such separate district must be filed at the time of filing exceptions to the viewers' preliminary report, and must be signed by the owners of at least 50 per cent of the land, who must comprise one-fourth or more of all the landowners in the district.

Drainage districts may be established by either the county courts or the circuit courts, under a law of March 26, 1918 (ch. 64), which also provides for a county board of three drainage commissioners. The petition for a district must be signed by 25 per cent of the landowners or by the owners of 25 per cent of the land in the proposed district. Viewers are appointed to make a preliminary report, as for districts organized under the law of 1912, and after the court orders the district established it is under control of the county drainage commissioners. Damages and benefits are assessed by a board of appraisers appointed by the court. The circuit court has appellate jurisdiction from judgments of the county court, and appeals may be taken from the circuit court to the court of appeals. After contract for construction has been let, the board of drainage commissioners assesses the estimated cost against the land in proportion to the

assessed benefits. The board may issue bonds of the district to run not more than 30 years.

County drains may be constructed to reclaim swamp land for benefit of health and for other purposes, under a statute of March 19, 1894 (ch. 97). The fiscal court has control over this work. The cost is paid by a general tax upon all property in the county subject to taxation for state purposes. The cost is limited to 2 per cent of the value of such property. If the probable cost will exceed the county revenue for the year in which the works will be constructed, the project must be approved by two-thirds of the votes cast at a special election. Should the proposed drainage affect but a small part of the county, a special taxing district may be formed to vote upon and to pay for the improvements, but this was not done in Jefferson County.

Laws of 1918, ch. 64	26,234	5.6	50,000	3.1	535,308

[1] Includes one enterprise under individual ownership.

Drainage works.—The total works completed by drainage enterprises to December 31, 1919, comprised 664.5 miles of open ditches, 86.2 miles of tile drains, and 0.2 mile of accessory levees; the additional lengths under construction were 77.0 miles of open ditches and 1.0 mile of tile drains. These figures do not include drains or levees installed by individual farm owners supplemental to the works of the enterprises, nor the works of flood-protection or levee districts that had not undertaken the construction of ditches or tile drains. There are no pumping districts for land drainage in Kentucky.

The average depth of the main or outlet ditch was reported for each enterprise. The maximum depth of outlet reported for any enterprise in the state and the maximum in each county are shown in line 15 of County Table II. The maximum length, width, and depth of outlet shown in that table for any county may not refer to the same enterprise.

In County Table II, line 16 shows the mean depth of branch ditches (open ditches only), which is a very crude indication of the depth of soil drainage that may be obtained in the enterprises as determined by the depth of outlet provided for farm drains. The mean depth was computed by giving each separate depth a weight in proportion to the acreage it serves. As most enterprises reported depths in whole numbers only, the occasional decimals were omitted in making these computations. Depths less than 3 feet were omitted; to include this group, computed as 3 feet, would show the mean depth for the state 5.0 instead of 5.1 feet.

5.0 to 5.9 feet	19,379	5.4
6.0 to 6.9 feet	21,444	6.0
7.0 to 7.9 feet	15,747	4.4
8.0 to 8.9 feet	13,579	3.8
Not reporting branches	221,566	61.8

Maintenance of works.—The drainage law of 1912 requires that all ditches, levees, and like public improvements under control of the board of drainage commissioners shall be kept in good repair by that board, which is authorized to appoint a superintendent of drainage to have charge of the work. Assessments for maintenance and repair work may be made, apportioned like the cost of original construction, but not to exceed in any year 10 per cent of that cost. The law of 1918 also provides for maintenance of drainage works by the board of drainage commissioners. Both statutes define as public ditches all watercourses into which any public drains empty, and place such streams under control of the county drainage commissioners. The later law does not limit such natural public drains to nonnavigable streams, as was done in the earlier statute.

TABLE 9.—LAND AND CAPITAL INVESTED IN OPERATING ENTERPRISES, CLASSIFIED BY METHOD OF MAINTENANCE: 1920.

METHOD OF MAINTENANCE.	LAND.		CAPITAL.		
			To Dec. 31, 1919.		Additional required to complete.
	Acreage.	Per cent of total.	Amount.	Per cent of total.	
All operating enterprises	358,480	100.0	$1,521,725	100.0	$299,271
By district forces [1]	221,674	61.8	896,795	58.9	37,000
By contract	79,959	22.3	309,932	20.4	8,780
By landowners	27,513	7.7	220,266	14.5	10,790
Not reporting [2]	29,334	8.2	94,732	6.2	242,701

[1] Includes 8,079 acres for which method of maintenance was not specified.
[2] Includes 1,514 acres reporting maintenance not provided.

Date of organization.—The progress in drainage is shown only roughly by the dates of the organization of the enterprises, which are the dates when the districts were established by the courts, since there may be a period of a year or more between the decree of establishment and the beginning of actual construction, and since the work of construction may occupy several years in a large district. It was not practicable, however, for the census to secure data as to the time of the beginning or the completion of the drainage works. Under the date of organization are tabulated the entire area, works, and capital of each enterprise, even including extensions made after the original plan of reclamation was completed.

TABLE 10.—LAND IN OPERATING ENTERPRISES, CLASSIFIED BY DATE ENTERPRISE WAS ORGANIZED: 1920.

[1] Includes works on 800 acres under individual ownership, on which drainage was begun in 1888.
[2] All under individual ownership.

Crops.—The principal crop grown upon the drained land in drainage enterprises is corn. Data were not secured to show the part of each enterprise planted to any crop, so the enterprises have been classified according to the principal crop, and the total area of improved land is shown thus classified in County Table II. No data were secured at the general census of agriculture to separate the crops grown upon land drained artificially from those produced upon land drained naturally.

[3] Includes 1,140 acres reporting 0.2 mile of accessory levees, also.
[4] Includes cost of 0.2 mile of accessory levees.

MANUFACTURES—KENTUCKY.

EXPLANATION OF TERMS.

Scope of census.—Census statistics of manufactures are compiled primarily for the purpose of showing the absolute and relative magnitude of the different branches of industry covered and their growth or decline. Incidentally, the effort is made to present data throwing light upon character of ownership, size of establishments, and similar subjects. When use is made of the statistics for these purposes it is imperative that due attention be given to their limitations, particularly in connection with any attempt to derive from them figures purporting to show average wages, cost of production, or profits.

The census did not cover establishments which were idle during the entire year or for which products were valued at less than $500, or the manufacturing done in educational, eleemosynary, and penal institutions.

Period covered.—The returns relate to the calendar year 1919, or the business year which corresponded most nearly to that calendar year, and cover a year's operations, except for establishments which began or discontinued business during the year.

The establishment.—As a rule, the term "establishment" represents a single plant or factory, but in some cases it represents two or more plants which were operated under a common ownership or for which one set of books of account was kept. If, however, the plants constituting an establishment as thus defined were not all located within the same city, county, or state, separate reports were secured in order that the figures for each plant might be included in the statistics for the city, county, or state in which it was located. In some instances separate reports were secured for different industries carried on in the same establishment.

Classification by industries.—The establishments were assigned to the several classes of industries according to their products of chief value. The products reported for a given industry may thus, on the one hand, include minor products different from those covered by the class designation, and, on the other hand, may not represent the total product covered by this designation, because some of this class of product may be made in establishments in which it is not the product of chief value.

As a rule, the same designation is used for the industry wherever it appears, although all of the products indicated by this designation were not manufactured in the state or city for which these statistics are presented. In some instances the wording is changed so as to more correctly describe the products represented. For a number of industries subclasses are shown which indicate more definitely the kind of products.

Selected industries.—The general tables at the end of this section give the principal facts separately for the industries of the state. A selection has been made of certain leading industries of the state for more detailed consideration. Sometimes an industry of great importance has to be omitted because it comprises so few establishments that a detailed presentation would reveal the operations of individual concerns.

Comparisons with previous censuses.—Owing to changes in industrial conditions it is not always possible to classify establishments by industries in such a way as to permit accurate comparison with preceding censuses. At the census of 1909 the figures for kindred industries were combined. This practice has been followed in compiling the statistics for 1919 and 1914 when placed in comparison with those for 1909 and prior years. The comparative summary for 1919, 1914, and 1909, therefore, does not show separately all the industries given for 1919 in the detailed statement for the state.

Influence of increased prices.—In comparing figures for cost of materials, value of products, and value added by manufacture in 1919 with the corresponding figures for earlier censuses, account should be taken of the general increase in the prices of commodities during recent years. To the extent to which this factor has been influential the figures fail to afford an exact measure of the increase in the volume of business.

Persons engaged in the industry.—The following general classes of persons engaged in the manufacturing industries were distinguished: (1) Proprietors and firm members, (2) salaried officers of corporations, (3) superintendents and managers, (4) clerks (including other subordinate salaried employees), and (5) wage earners. In the reports for the censuses of 1904 and 1899 these five classes were shown according to the three main groups: (1) Proprietors and firm members, (2) salaried officials, clerks, etc., and (3) wage earners. In comparative tables covering the census of 1904 it is of course necessary to group the figures according to the classification that was employed at the earlier censuses.

The number of persons engaged in each industry, segregated by sex, and, in the case of wage earners, also by age (whether under 16 or 16 and over), was reported for a single representative day. The 15th of December was selected as representing for most industries normal conditions of employment, but where this date was not a representative day an earlier date was chosen.

In the case of employees other than wage earners the number thus reported for the representative date has been treated as equivalent to the average for the year, since the number of employees of this class does not ordinarily vary much from month to month. In the case of wage earners the average has been obtained in the manner explained in the next paragraph.

In addition to the more detailed report by sex and age of the number of wage earners on the representative date, a report was obtained of the number employed on the 15th of each month, by sex, without distinction of age. From these figures the average number of wage earners for the year has been calculated by dividing the sum of the numbers reported for the several months by 12. The importance of the industry as an employer of labor is believed to be more accurately measured by this average than by the number employed at any one time or on a given day.

The number of wage earners reported for the representative day, though given in certain tables for each separate industry, is not totaled for all industries combined for any state, because, in view of the variations of date, such a total is not believed to be significant. It would involve more or less duplication of persons working in different industries at different times, would not represent the total number employed in all industries at any one time, and would give an undue weight to seasonal industries as compared with industries in continual operation. This total, however, is shown for the different cities, because the limited area and greater regularity of employment largely overcame the objection incident to its publication for the separate states or the United States.

In order to determine as nearly as possible the age distribution of the average number of wage earners for a given state as a whole, the per cent distribution by age of the wage earners in each industry for December 15, or the nearest representative day, has been calculated from the actual numbers reported for that date. The percentages thus obtained have been applied to the average number of wage earners for the year in that industry to determine the average numbers 16 years and over, and under 16, employed. These calculated averages for the several industries have been added to give the average distribution for each state as a whole and for the entire country.

Salaries and wages.—Under these heads are given the total payments during the year for salaries and wages, respectively. The Census Bureau has not undertaken to calculate the average annual earnings of either salaried employees or wage earners. Such averages would possess little real value, because they would be based on the earnings of employees of both sexes, of all ages, and of widely varying degrees of skill. Furthermore, so far as wage earners are concerned, it would be impossible to calculate accurately even so simple an average as this, since the number of wage earners fluctuates from month to month in every industry, and in some cases to a very great extent. The Census Bureau's figures for wage earners, as already explained, are averages based on the number employed on the 15th of each month, and while representing the number according to the pay rolls to whom wages were paid on that date, no doubt represent a larger number than would be required to perform the work in any industry if all were continuously employed during the year.

Prevailing hours of labor.—No attempt was made to ascertain the number of wage earners working a given number of hours per week. The inquiry called merely for the prevailing practice followed in each establishment. Occasional variations in hours in an establishment from one part of the year to another were disregarded, and no attention was paid to the fact that a few wage earners might have hours differing from those of the majority. All the wage earners of each establishment are therefore counted in the class within which the establishment itself falls. In most establishments, however, practically all the wage earners work the same number of hours, so that the figures give a substantially correct representation of the hours of labor.

Capital.—The instructions on the schedule for securing data relating to capital were as follows:

"The answer should show the total amount of capital, both owned and borrowed, on the last day of the business year reported. All the items of fixed and live capital may be taken at the amounts carried on the books. If land or buildings are rented, that fact should be stated and no value given. If a part of the land or buildings is owned, the remainder being rented, that fact should be so stated and only the value of the owned property given. Do not include securities and loans representing investments in other enterprises."

These instructions were identical with those employed at the censuses of 1914 and 1909. The data compiled in respect to capital, however, at both censuses, as well as at all preceding censuses of manufactures, have been so defective as to be of little value except as indicating very general conditions. In fact, it has been repeatedly recommended by the census authorities that this inquiry be omitted from the schedule. While there are some establishments whose accounting systems are such that an accurate return for capital could be made, this is not true of the great majority, and the figures therefore do not show the actual amount of capital invested.

Materials.—The statistics as to cost of materials relate to the materials used during the year, which may be more or less than the materials purchased during the year. The term "materials" covers fuel, rent of power and heat, mill supplies, and containers, as well as materials which form a constituent part of the product.

Rent and taxes.—The taxes include certain Federal taxes and state, county, and local taxes. Under "Federal taxes" there are included the internal-revenue tax on manufactures (tobacco, beverages, etc.), excise taxes when included in values reported for products, corporation capital stock tax, and corporation income tax, but not the income tax for individuals and partners.

Value of products.—The amounts given under this heading represent the selling value or price at the factory of all products manufactured during the year, which may differ from the value of the products sold.

Value added by manufacture. The value of products is not always a satisfactory measure of either the absolute or the relative importance of a given industry, because only a part of this value is actually created by the manufacturing processes carried on in the industry itself. Another part, and often by far the larger one, represents the value of the materials used. For many purposes, therefore, the best measure of the importance of an industry, from a manufacturing standpoint, is the value created by the manufacturing operations carried on within the industry. This value is calculated by deducting the cost of the materials used from the value of the products. The figure thus obtained is termed in the census reports "value added by manufacture."

Cost of manufacture and profits.—The census data do not show the entire cost of manufacture, and consequently can not be used for the calculation of profits. No account has been taken of depreciation or interest, rent of offices and buildings other than factory or works, insurance, ordinary repairs, advertising, and other sundry expenses.

Primary horsepower.—This item represents the total primary power generated by the manufacturing establishments plus the amount of power, principally electric, rented from other concerns. It does not cover the power of electric motors taking their current from dynamos driven by primary power machines operated by the same establishment, because the inclusion of such power would obviously result in duplication. The figures for primary horsepower represent the rated capacity of the engines, motors, etc., and not the amount of power in actual daily use.

Fuel.—Statistics of the quantity of fuel used are shown only for anthracite and bituminous coal, coke, fuel oils, gasoline and other volatile oils, and gas—natural and manufactured—and represent the quantity used during the year. As only the principal kinds of fuel are shown, comparison as to the total cost of all fuel is impracticable. A comparison, however, of the total quantities of the several kinds of fuel used in 1919 and 1914 is given.

GENERAL STATISTICS.

General character of the state.—Kentucky has a gross area of 40,598 square miles, of which 40,181 represent land surface. Its inhabitants in 1900 numbered 2,147,174; in 1910, 2,289,905; and in 1920, 2,416,630. The number of inhabitants per square mile in 1910 was 57, the corresponding figure for 1920 being 60.

In 1920 there were eight cities in the state—Ashland, Covington, Henderson, Lexington, Louisville, Newport, Owensboro, and Paducah—having more than 10,000 inhabitants. The combined population of these cities in that year was 431,920, forming 17.9 per cent of the total for Kentucky. These cities in 1919 reported 72.7 per cent of the value of the state's manufactured products.

Importance and growth of manufactures (Table 1).—The large increases in salaries and wages, cost of materials, and value of products, from 1914 to 1919, as presented in Table 1, are largely due to the change in industrial conditions brought about by the World War, and therefore can not properly be used to measure the growth of manufactures during the census period 1914 to 1919.

Statistics for the state, by counties (Table 2).—Figures are not available for comparison of county totals for 1919 with those for prior censuses. Of the 120 counties in the state, Jefferson County alone, which contains the city of Louisville, reported 53.1 per cent of the total value of products in the state in 1919 and 44.6 per cent of the average number of wage earners.

Principal industries, ranked by value of products (Table 3).—The ranking of industries by value of products is not always satisfactory as indicating their importance from a manufacturing standpoint. Their ranking would change materially if based upon the average number of wage earners or value added by manufacture.

Persons engaged in manufacturing industries (Table 4).—The age classification of the average number of wage earners in this and other tables is an estimate obtained by the method described in the "Explanation of terms." The classification by sex for 1919 was reported separately, but for 1914 and 1909 was obtained in the same manner as the distribution by age. Figures for individual industries will be found in Table 30.

Average number of wage earners for selected industries (Table 5).—The industries covered by this table are those which employed 500 or more wage earners in 1919, and for which statistics can be shown without the possibility of disclosing the operations of individual establishments.

Average number of wage earners, by sex and age, and value of products for cities of 10,000 inhabitants or more (Table 6).—General increases are shown in value of products for the cities for which comparative figures are available and, with the exception of Henderson, in average number of wage earners, from 1914 to 1919.

Wage earners, by months (Table 7).—The statistics for wage earners in this table are intended to show the steadiness of employment, or the reverse, in accordance with the industrial conditions existing during the several census years.

Wage earners, by months, for selected industries and for cities (Table 8).—In addition to the number of wage earners employed by months for selected industries, similar data are given for males and females for all industries combined, and also for the cities of 10,000 inhabitants and over. There were a number of industries in the state in 1919 in which the number of female wage earners predominated. The eight cities combined reported a slightly larger proportion of female wage earners than the state as a whole, 18.4 per cent as compared with 15.5 per cent for the state.

Prevailing hours of labor (Table 9).—Since 1914 there has been a marked shortening of the working-day in Kentucky. In that year 16.5 per cent of the wage earners were included in the group "48 and under" as against 32.8 per cent in 1919. In 1914 the "60" and "Over 60" groups constituted 39.6 per cent of the total wage earners, as compared with 20.6 per cent in 1919.

Size of establishments, by average number of wage earners, for selected industries and for cities (Table 10).—The predominance of small establishments, based on the number of wage earners employed, is evidenced in this table by the fact that of the total number of establishments in the state, 96.4 per cent were in the several classes having fewer than 101 wage earners, while such establishments employed but 41.4 per cent of the total number of wage earners. On the other hand, establishments employing an average of more than 100 wage earners represented only 3.6 per cent of the total number of manufacturing establishments in the state, but reported 58.6 per cent of the total number of wage earners.

Size of establishments, by value of products (Table 11).—At the censuses of 1909 and 1914 establishments with products valued at "$100,000 to $1,000,000" constituted one group, but at the census of 1919 this group was subdivided into "$100,000 to $500,000" and "$500,000 to $1,000,000." Separate figures for

the number of establishments and value of products have been compiled, however, from the returns for 1914. The table, therefore, gives combined figures for these two groups in the case of all items for 1909, and in the case of average number of wage earners and value added by manufacture for 1914.

Size of establishments, by value of products, for selected industries (Table 12).—In the preparation of this table it was necessary in several instances to combine the establishments of one group of an industry with those of some other group of that industry to avoid the possibility of disclosing the operations of individual establishments.

Size of establishments, by value of products, for cities of 10,000 inhabitants or more (Table 13).—This table strikingly illustrates the fact that the number of establishments of itself is no real index of manufacturing activities.

Character of ownership (Table 14).—The preponderance of corporate ownership is clearly brought out in this table. Although corporations owned but 29.1 per cent of the number of establishments in the state in 1919, they reported 84.9 per cent of the average number of wage earners and 85.6 per cent of the total value of products. During the five-year period 1914 to 1919 the average number of wage earners in corporations increased 8,154, or 16.1 per cent, and the value of products $142,204,441, or 72.4 per cent.

Manufactures, by population groups, in cities of 10,000 inhabitants or more (Table 15).—This table shows that the combined number of establishments in the eight cities in 1919 represented 34.5 per cent of the total in the state. They reported in that year 65.4 per cent of the average number of wage earners and 72.7 per cent of the total value of products.

Principal industries in Covington and Louisville, with per cent of total for state (Table 16).—This table includes all industries in Covington having a product of $300,000 and over, and in Louisville having a product of $1,000,000 and over, the figures being given for those which can be shown without disclosing the operations of individual establishments.

It is deemed of first importance to present the statistics of the state as a whole for all industries which can be shown without disclosing the operations of individual establishments. In so doing, however, it sometimes happens that quite important industries can not be shown in the city.

Number and horsepower of types of prime movers (Table 17).—The total horsepower reported in 1919, as compared with that for 1914, shows an increase of 9,259 horsepower, or 3.9 per cent. This increase is due to the gain in rented power which amounted to 37,088 horsepower, or 177.5 per cent. The owned power decreased 27,829 horsepower, or 12.8 per cent, during the five-year period.

Fuel consumed (Table 18).—This table shows the principal kinds of fuel used by the manufacturing plants in the state in 1919 and 1914, and gives separately for 1919 the amounts consumed by a number of important industries which use considerable quantities of fuel. There was a decided increase in the quantities of each of the several kinds of fuel used in 1919 as compared with 1914, except in anthracite coal, which decreased. In 1919, of the total anthracite coal consumed, 50.3 per cent was used in steam-railroad repair shops, flour and grist mills, and breweries; two industries combined—coke and clay products—consumed 50.5 per cent of the bituminous coal, while blast furnaces consumed 85 per cent of the coke.

TABLE 1.—COMPARATIVE SUMMARY: 1919, 1914, 1909, 1904, AND 1899.

	MANUFACTURING INDUSTRIES.					PER CENT OF INCREASE.[1]			
	1919	1914	1909	1904	1899	1914–1919	1909–1914	1904–1909	1899–1904

Poultry, killing and dressing, not done in slaughtering and meat-packing establishments	18	97	0.1	858	0.2	121	0.1
Clothing, women's	10	266	0.4	835	0.2	399	0.3
All other industries [1]	355	9,152	13.2	65,421	16.5	24,489	15.3

[1] Among the industries for which statistics can not be shown separately without the possibility of disclosing the operations of individual establishments are a number having products in excess of some for which figures are shown in the table. Of these industries, the most important are the following: "Automobiles"; "cement"; "house-furnishing goods, not elsewhere specified"; "musical instruments, pianos"; "oil and cake, cottonseed"; "oil, not elsewhere specified"; "petroleum, refining"; "plumbers' supplies, not elsewhere specified"; "shirts"; "tin foil"; "varnishes"; "watchcases"; and "wood preserving."

TABLE 4.—PERSONS ENGAGED IN MANUFACTURING INDUSTRIES: 1919, 1914, AND 1909.

CLASS.	Census year.	Total.	Male.	Female.	PER CENT OF TOTAL. Male.	PER CENT OF TOTAL. Female.
All classes	1919	83,954	70,676	13,278	84.2	15.8
	1914	77,865	67,521	10,344	86.7	13.3
	1909	79,060	67,860	11,200	85.8	14.2
Proprietors and officials	1919	7,781	7,500	281	96.4	3.6
	1914	7,157	6,946	211	97.1	2.9
	1909	7,979	7,781	198	97.5	2.5
Proprietors and firm members	1919	4,003	3,850	153	96.2	3.8
	1914	4,148	4,002	146	96.5	3.5
	1909	5,050	4,893	157	96.9	3.1
Salaried officers of corporations	1919	1,486	1,426	60	96.0	4.0
	1914	1,272	1,235	37	97.1	2.9
	1909	1,304	1,274	30	97.7	2.3
Superintendents and managers	1919	2,292	2,224	68	97.0	3.0
	1914	1,737	1,709	28	98.4	1.6
	1909	1,625	1,614	11	99.3	0.7
Clerks and other subordinate salaried employees.	1919	6,833	4,592	2,241	67.2	32.8
	1914	6,122	4,794	1,328	78.3	21.7
	1909	5,681	4,443	1,238	78.2	21.8
Wage earners (average number)	1919	69,340	58,584	10,756	84.5	15.5
	1914	64,586	55,781	8,805	86.4	13.6
	1909	65,400	55,636	9,764	85.1	14.9
16 years of age and over	1919	68,957	58,373	10,584	84.7	15.3
	1914	64,299	55,582	8,717	86.4	13.6
	1909	64,567	55,072	9,495	85.3	14.7
Under 16 years of age	1919	383	211	172	55.1	44.9
	1914	287	199	88	69.3	30.7
	1909	833	564	269	67.7	32.3

TABLE 5.—AVERAGE NUMBER OF WAGE EARNERS FOR SELECTED INDUSTRIES, WITH PER CENT, BY SEX AND AGE: 1919 AND 1914.

INDUSTRY.	Census year.	Wage earners (average number).	PER CENT OF TOTAL. 16 years of age and over. Male.	PER CENT OF TOTAL. 16 years of age and over. Female.	PER CENT OF TOTAL. Under 16 years of age.
All industries	1919	69,340	84.2	15.1	0.7
	1914	64,586	86.1	13.5	0.4
	1909	65,400	84.2	14.5	1.3
Agricultural implements	1919	773	98.3	1.6	0.1
	1914	660	98.9	0.8	0.3
Automobile repairing	1919	614	99.6	0.3	.....

SPECIAL STATISTICS.

For a number of important industries the Census Bureau collects, by means of special schedules, certain details which do not appear on the general schedule. Data for seven of these industries in Kentucky are here presented.

Flour-mill and gristmill products (Table 19).—This table shows the kind, quantity, and value of the various products of these mills during 1919, 1914, and 1909.

Large increases are shown in the value of the several products, which do not harmonize, however, with the corresponding increases in quantities.

The total value of products for the industry from 1914 to 1919 increased $24,544,595, or 115.6 per cent. Wheat flour was the principal product, forming 66.2 per cent of the total value of products in 1919 and 65.4 per cent in 1914. Although there was an increase of $16,437,060, or 118.4 per cent, in value during the five-year period, the quantity decreased 38,673 barrels, or 1.4 per cent. Similar conditions are found for bran and middlings and feed and offal, increases of 82.9 per cent and 111.1 per cent in value while in quantity there was a decrease of 16.5 per cent and an increase of four-tenths of 1 per cent, respectively.

TABLE 19.—FLOUR-MILL AND GRISTMILL PRODUCTS (MERCHANT MILLS): 1919, 1914, AND 1909.

	1919	1914	1909
Total value	$45,773,798	$21,229,203	$22,364,950
Wheat flour:			
Barrels	2,689,791	2,728,464	2,832,288
Value	$30,317,827	$13,880,767	$15,921,025
Rye flour:			
Barrels	809	373	906
Value	$6,738	$1,985	$4,232
Corn meal and corn flour:			
Barrels	826,775	774,322	984,217
Value	$6,457,901	$2,645,405	$3,071,856
Hominy and grits:			
Pounds	18,397,250	14,535,650	7,103,217
Value	$500,635	$238,043	$127,193
Bran and middlings:			
Tons	96,433	115,442	
Value	$4,837,504	$2,644,343	144,004
Feed and offal:			$3,220,835
Tons	58,390	58,152	
Value	$3,454,981	$1,636,749	
All other cereal products, value	$86,496	$8,927	$842
All other products, value	$111,716	$172,984	$18,967

Lumber and timber products (Table 20).—This table presents statistics pertaining to the chief products of the lumber industry for 1919, 1914, and 1909. For many years Kentucky has been one of the chief producers of hardwood lumber, and in 1919 ranked sixth among the states in the production from these woods.

The total cut in 1919 decreased 14.1 per cent compared with that of 1914, and 40.5 per cent compared with that for 1909. The largest cut from all species for the state was 912,908,000 feet in 1907.

The lumber cut from the principal species in 1919 was reported as follows: Oak, 282,963,000 feet, or 55.3 per cent of the total cut from all species in the state; yellow poplar, 50,462,000 feet, or 9.9 per cent; beech, 37,459,000 feet, or 7.3 per cent; gum, 31,692,000 feet, or 6.2 per cent; and chestnut, 24,850,000 feet, or 4.9 per cent. Among other woods sawed into lumber in considerable quantities were hickory, yellow pine, hemlock, mahogany, and maple.

TABLE 20.—LUMBER, LATH, AND SHINGLES: 1919, 1914, AND 1909.

PRODUCT.	QUANTITY.[1]		
	1919	1914	1909
Lumber.....M feet b. m.	512,078	596,392	860,712
Lath.....thousands	3,288	(2)	19,776
Shingles.....thousands	2,562	(2)	55,010

[1] The output of custom mills is included in 1919 and 1909, but not in 1914.
[2] Not reported.

Blast furnaces.—This industry in 1919 was represented by four establishments with a product of 163,708 tons of pig iron valued at $4,384,076. Of this essentially 58 per cent was of basic and Bessemer grades for steel making, and 42 per cent was foundry iron.

Steel works and rolling mills (Table 21).—The output of the steel works and rolling mills for the census years 1919, 1914, and 1909 is summarized in Table 21. The large increase in value of products for 1919 as compared with 1914, 101.8 per cent, though in part due to an increase in production tonnage of 36 per cent, is chiefly due to higher values, the average ton value of all rolled, forged, and other classified iron and steel products being $65 in 1919 as compared with $31 in 1914 and $33 in 1909. The leading rolled products were blooms, billets, and slabs, for further rolling and forging (semi-finished steel constituting over 60 per cent of the tonnage) and sheets and rods.

TABLE 21.—STEEL WORKS AND ROLLING MILLS: 1919, 1914, AND 1909.

	1919	1914	1909
Products, total value	$18,318,690	$9,077,908	$7,779,320
Rolled, forged, and other classified iron and steel products:			
Tons (2,240 pounds)	261,170	191,499	216,311
Value	$16,866,019	$5,872,751	$7,119,158
All other products, including value added to iron and steel rolling-mill products, by further manufacture	$1,452,671	$3,205,157	$660,162

Slaughtering and meat packing (Table 22).—This table presents data for the slaughtering and meat-packing industry for 1919, 1914, and 1909, for the most important materials and products.

The actual production growth of the industry, which is shown by the increase in the number of animals slaughtered, was 126,344, or 74.9 per cent, from 1914 to 1919, each class of animals slaughtered showing an increase.

The increase in the total cost of materials was $6,988,042, or 190.4 per cent, and in value of products $8,844,577, or 215.2 per cent.

The cost of "All other materials" includes that for poultry, goats and kids, dressed meat purchased for curing, curing materials, seasoning, fuel, rent of power, containers, materials for making ice, mill supplies, refrigeration, and freight.

The value of "All other products" includes that for meat puddings, headcheese, etc.; hoofs, horns, horntips, strips, and waste, fertilizer materials, goat and kid skins, cattle hair, and ice. The value of dressed poultry and goat and kid meat is included with that for "Edible offal and other fresh meat."

TABLE 22.—SLAUGHTERING AND MEAT PACKING: 1919, 1914, AND 1909.

	1919	1914	1909
MATERIALS.			
Total cost	$10,658,904	$3,670,862	$5,745,858
Animals slaughtered, cost	$9,672,501	$3,387,481	$5,284,373
Beeves:

All other products, value	$325,567	$131,493	$97,172

[1] Not reported separately.

Printing and publishing (Table 23).—The number and aggregate circulation per issue of all newspapers and periodicals reported in Kentucky for the census years 1919, 1914, and 1909 are presented in Table 23.

The decrease in total number of publications and in aggregate circulation is due principally to the discontinuance of a large number of weekly news and religious papers, the reduction in circulation of one English and German monthly religious publication and of other religious and reform papers, and to the disappearance of a number of agricultural monthly and semimonthly publications.

The increase in the circulation of daily newspapers was slight for the five-year period from 1914 to 1919, but amounted to 89,671, or 39.6 per cent, for the decade. Of the 32 dailies, 20 were published in the afternoon. Their circulation, 170,191, was 53.9 per cent of the total daily circulation. The morning circulation increased 16,809, or 13 per cent, from 1914 to 1919.

The Sunday newspaper circulation increased 81,150, or 92 per cent, during the five-year period from 1914 to 1919.

Of all the publications, only four, with a circulation of 32,672, were either wholly or partly printed in a foreign language—German. There were one daily, one Sunday, and one weekly in German, and one monthly in English and German.

TABLE 23.—PRINTING AND PUBLISHING: 1919, 1914, AND 1909.

PERIOD OF ISSUE.	NUMBER OF PUBLICATIONS.			AGGREGATE CIRCULATION PER ISSUE.		
	1919	1914	1909	1919	1914	1909
Total	273	326	339	1,236,937	1,250,043	1,194,245
Daily	32	33	35	315,851	311,019	226,180
Sunday	11	9	12	169,396	88,246	115,855
Semiweekly [1]	17	25	27	37,810	58,584	61,248
Weekly	185	221	226	346,491	348,342	481,957
Monthly	20	28	28	94,695	159,229	136,995
All other classes [2]	8	10	11	272,694	284,623	172,010

[1] Includes in 1919, 1 triweekly; in 1914, 4; and in 1909, 2 triweekly.
[2] Includes in *1919*, 3 quarterlies, 4 semimonthlies, and 1 bimonthly; in *1914*, 2 quarterlies and 8 semimonthlies; and in 1909, 8 semimonthlies, 2 quarterlies, and 1 "all other."

Leather, tanned, curried, and finished (Table 24).—This table shows the quantity and value of products of this industry in 1919, 1914, and 1909.

TABLE 24.—LEATHER, TANNED, CURRIED, AND FINISHED: 1919, 1914, AND 1909.

	1919	1914	1909
Products, total value	$8,747,872	$4,198,575	$4,240,795
Oak sole leather:			
Sides	441,534	300,846	404,382
Value	$6,494,114	$2,698,439	$2,712,069
All other leather, value	913,024	933,523	1,209,423
All other products, value	128,376	58,720	70,569
Work on materials for others, value	1,212,358	507,893	248,734

The total value of products decreased 1 per cent during the period 1909 to 1914, but increased 108.4 per cent during the following five years. This large gain

was due partly to a larger production, but mainly to the increased cost of hides, tanning materials, and labor in 1919. Oak sole leather was the principal product, and other leather produced in lesser quantities was oak harness, chrome sole, chrome belting, and offal. Contract work on materials for others increased by $963,624, or 387.4 per cent, during the ten-year period 1909–1919.

Laundries (Table 25).—Statistics for power laundries are not included in the general tables nor in the totals for manufacturing industries. Table 25, however, summarizes the statistics for such laundries in the state of Kentucky for 1919 and 1914.

TABLE 25.—POWER LAUNDRIES: 1919 AND 1914.

	NUMBER OR AMOUNT.		Per cent of increase,[1] 1914–1919.
	1919	1914	
Number of establishments	63	75	.....
Persons engaged	2,591	2,086	24.2
Proprietors and firm members	53	54	.....
Salaried employees	244	159	53.5
Wage earners (average number)	2,294	1,873	22.5
Primary horsepower	6,762	2,655	154.7
Capital	$1,688,280	$1,116,867	51.2
Salaries and wages	1,419,503	844,170	68.2
Salaries	236,126	145,637	62.1
Wages	1,183,377	698,533	69.4
Paid for contract work	*691*	*326*	*112.0*
Rent and taxes	51,372	62,593	−17.9
Cost of materials	789,000	300,532	162.5
Amount received for work done	2,905,346	1,665,979	74.4

[1] A minus sign (−) denotes decrease; percentages are omitted where base is less than 100.

Dyeing and cleaning (Table 26).—Statistics for dyeing and cleaning establishments that were operated by mechanical power in 1919 are presented in this table.

TABLE 26.—DYEING AND CLEANING: 1919.

	Number or amount.
Number of establishments	41
Persons engaged	360
Proprietors and firm members	40
Salaried employees	61
Wage earners (average number)	259
Primary horsepower	347
Capital	$343,830
Salaries and wages	269,870
Salaries	77,180
Wages	192,690
Paid for contract work	829
Rent and taxes	54,092
Cost of materials	152,731
Amount received for work done	720,341

Statistics for dyeing and cleaning establishments are not included in the general tables nor in the totals for manufacturing industries for censuses since 1900. This presentation is the first of its kind that has been made since the census statistics were confined to manufacturing industries as distinguished from hand trades, household industries, etc.

Custom gristmills and custom sawmills (Tables 27 and 28).—Statistics for custom gristmills and custom sawmills are not included in the general tables nor in the totals for manufacturing industries. Data for these custom mills were not collected in 1914. Tables 27 and 28 summarize the statistics for such mills for 1919 and 1909. The value of products for custom gristmills represents the selling value of the grain milled, and for the sawmills the amount charged for the work performed.

TABLE 27.—CUSTOM GRISTMILLS: 1919 AND 1909.

Salaried employees	3	2	.....
Wage earners (average number)	283	626	−54.8
Primary horsepower	7,011	5,650	24.1
Capital	$351,640	$294,594	19.4
Salaries and wages	169,649	115,416	47.0
Salaries	540	653	−17.3
Wages	169,109	114,763	47.4
Rent and taxes	2,970	3,214	−7.6
Cost of materials	126,977	6,092	1,984.3
Amount received for work done	531,117	326,563	62.6

[1] A minus sign (−) denotes decrease; percentages are omitted where base is less than 100.

GENERAL TABLES.

Table 29 gives, for 1919, 1914, and 1909, for selected industries in the state and in Covington and Louisville, the number of establishments, average number of wage earners, primary horsepower, wages, cost of materials, and value of products; and for cities of 10,000 to 50,000 inhabitants, for which comparative figures are available, similar data for all industries combined. Table 30 presents, for 1919, for the state as a whole and for Covington and Louisville, statistics in detail for each industry for which figures can be shown without disclosing the operations of individual establishments; and for all cities of 10,000 to 50,000 inhabitants, similar data for all industries combined.

TABLE 29.—COMPARATIVE SUMMARY FOR SELECTED INDUSTRIES AND FOR CITIES: 1919, 1914, AND 1909.

INDUSTRY AND CITY.	Census year.	Number of establishments	Wage earners (average number).	Primary horsepower.	Wages.	Cost of materials.	Value of products.
					Expressed in thousands.		
THE STATE—ALL INDUSTRIES COMBINED AND SELECTED INDUSTRIES.							
All industries	1919	3,957	69,340	247,573	$67,034	$235,716	$395,660
	1914	4,184	64,586	238,314	31,830	114,829	230,249
	1909	4,776	65,400	230,224	27,888	111,779	223,754
Artificial stone products	1919	18	33	85	30	43	104

[1] Includes "automobile repairing"; "hardware"; "iron and steel, welding"; "machine tools"; and "structural ironwork, not made in steel works or rolling mills," in all years; and "engines, steam, gas, and water," in 1914 and 1909.
[2] Includes "carriage and wagon materials."
[3] Includes "automobile repairing"; "gas machines"; "hardware"; "iron and steel, welding"; "plumbers' supplies, not elsewhere specified"; "structural ironwork not made in steel works or rolling mills"; and "textile machinery and parts," in all years; and "pumps, power," in 1914 and 1909.
[4] Includes "boxes, wooden packing, except cigar boxes" and "lumber, planing-mill products, not including planing mills connected with sawmills."
[5] Includes "perfumery and cosmetics" in all years but excludes "druggists' preparations" in 1919 to avoid disclosure of individual operations.
[6] Includes "bookbinding and blank-book making"; "engraving, steel and copper plate, including plate printing"; and "lithographing."
[7] Includes "trunks and valises."

Artificial limbs	2
Automobiles	2
Bags, other than paper, not including bags made in textile mills	2
Baskets, and rattan and willow ware	1
Blacking, stains, and dressings	1
Bluing	1
Bone and carbon black	1
Bookbinding and blank-book making	3
Boot and shoe findings	3
Boxes, cigar	2
Brushes	1
Carpets, rag	2
Cars, steam-railroad, not including operations of railroad companies	1
Cement	1
Chewing gum	2
Cleansing preparations	2
Clocks	1
Coffins, burial cases, and undertakers' goods	4
Cotton small wares	1
Cutlery, scissors, shears, and clippers	1
Dental goods	3
Dyeing and finishing textiles, exclusive of that done in textile mills	3
Electroplating	2
Engines, steam, gas, and water	2
Engraving and diesinking	1
Explosives	4
Flavoring extracts	1
Flax and hemp, dressed	3
Fur goods	2
Furnishing goods, men's	3
Gas and electric fixtures	1
Gas machines	1
Glass, cutting, staining, and ornamenting	3
Gloves and mittens, cloth, not including gloves made in textile mills	1
Glucose	1
Glue, other than fish	1
Hair work	3
Hats and caps, other than felt, straw, and wool	3
Hats, fur-felt	1
House-furnishing goods, not elsewhere specified	3
Ink, printing	1
Ink, writing	1
Iron and steel, nails and spikes, cut and wrought, including wire nails, not made in steel works or rolling mills	1
Iron and steel, welding	3
Iron and steel, wrought pipe	1
Jewelry and instrument cases	1
Knit goods	2
Labels and tags	3
Lime	3
Liquors, distilled, rum	1

[1] Includes water wheels and turbines (irrespective of ownership of water supply), and water motors (operated by water from city mains).
[2] Chiefly electric motors operated by rented (or purchased) current: other power included (chiefly shaft-belt or transmitted power from neighboring power plants).

COMBINED AND SPECIFIED INDUSTRIES: 1919—Continued.

[1] Includes water wheels and turbines (irrespective of ownership of water supply), and water motors (operated by water from city mains).
[2] Chiefly electric motors operated by rented (or purchased) current; other power included (chiefly shaft-belt or transmitted power from neighboring power plants).

COMBINED AND SPECIFIED INDUSTRIES: 1919—Continued.

Expenses.								Value of products.	Value added by manufacture.	Power.							
Salaries and wages.			For contract work.	Rent and taxes.		For materials.				Primary horsepower.							Electric horsepower generated in establishments reporting.
											Owned.						
Officials.	Clerks, etc.	Wage earners.		Rent of factory.	Taxes, Federal, state, county, and local.	Principal materials.	Fuel and rent of power.			Total.	Steam engines (not turbines).	Steam turbines.	Internal-combustion engines.	Water power.[1]	Rented.[2]

[3] Same number reported for one or more other months.
[4] Same number reported throughout the year.

MINES AND QUARRIES—KENTUCKY.

EXPLANATION OF TERMS.

Scope of census and period covered.—The census of mines, quarries, and petroleum or natural-gas wells does not cover enterprises which were idle; that is, in which neither productive nor development work was done during the entire year, or the products of which were valued at less than $500; or in the case of bituminous coal mining, producing less than 1,000 tons, or, if not productive, in which development work amounting to less than $5,000 was done. The returns relate to the calendar year 1919. When use is made of the statistics relating to character of ownership, size of enterprises, and similar subjects, it is imperative that due attention be given their limitations, particularly in connection with any attempt to show average wages, cost of production, or profits.

The enterprise.—The term "enterprise" represents one or more mines and quarries, wells or groups of wells, or natural-gas gasoline plants, all within the same state, operated under a common ownership or unified control, or for which only one set of books of account was kept, and for which a single report was secured. It may cover plants at several localities within the same state. If plants under unified control were not all located within the same state, separate reports were secured in order that statistics for the several enterprises thus defined might be included in statistics for the states in which they were located. The enterprise is further defined as being limited to a single industry.

Number of mines, quarries, wells, and plants.—Under these designations is given the number of mines, quarries, wells, and gasoline plants shown by the returns. As a rule each group of workings at a given locality in which operations were conducted as a unit or were unified by common management or joint handling of some part of the mining process, has been considered as a single mine or quarry. Many individual openings, therefore, are not counted as individual mines. The total number reported comprises those in operation or in the course of development during the year 1919. For petroleum and natural-gas wells the individual wells were counted and the total number productive December 31, 1919, is reported. The number of natural-gas gasoline plants is the total number reported in operation during the year.

Classification by industries.—The enterprises reported have been grouped by industries according to the kind of products.

Selected industries.—The detailed table gives the principal facts separately for the leading industries of the state.

Influence of increased prices.—In comparing figures for cost of supplies and materials and value of products with the corresponding figures for earlier censuses, account should be taken of the general increase in the prices of commodities during recent years.

Persons engaged in the industry.—The number of persons engaged in each industry, by occupation, sex, and, in the case of wage earners, also by age, was reported for a single representative day. In addition to the number of wage earners on the representative date, a report was obtained of the number employed on the 15th of each month, without distinction of sex or age. From these figures the average number of wage earners for the year has been calculated by dividing the sum of the numbers reported for the several months by 12.

Salaries and wages.—Under these heads are given the total payments during the year for salaries and wages, respectively.

Prevailing hours of labor.—This inquiry called merely for the prevailing practice followed in each enterprise. Occasional variations in hours from one part of the year to another were disregarded, and also where a few wage earners might have hours differing from the majority. All the wage earners of each enterprise are therefore counted in the class within which the enterprise falls.

Capital.—The instructions on the schedule relating to capital were as follows: "The answer should show the total amount of capital, owned and borrowed, invested by the operator in the enterprise on the last day of the business year reported. *Do not* include securities and loans representing investments in other enterprises." The reports received in respect to capital, however, have in so many cases been defective that the data compiled only indicate very general conditions.

Expenses.—The expenses reported in the census of 1919 include salaries and wages; the cost of supplies, materials, and fuels, including the freight on these; cost of power purchased; the cost of contract work; royalties and rents paid; and taxes paid or assessed. The census of 1909 reported in addition to the items of expenses covered by the present census all other items of expense incident to that year's business, except interest on indebtedness, dividends, and allowances for depreciation.

Supplies and materials, fuel, and power.—Statistics as to supplies and materials, fuel, and power, relate to the cost of these used during the year which may be more or less than the amount purchased during the year. The term "supplies and materials" covers mine, mill, quarry, and well supplies, and mineral purchased for treatment, resale, or distribution.

Royalties and rents.—The amounts given under this head represent the payment to fee holders or the value of share of product credited to fee holders for mineral output from leased land, and also rents paid for plants, equipment, and privileges or easements.

Taxes.—The taxes include Federal capital stock; corporation income, and excess profits tax; and also state, county, and local taxes. The data compiled in respect to Federal taxes are very defective as many mining corporations are engaged in other business and have sources of income other than from mining and do not pay taxes on mining separately.

Expenditures for development work.—In the statistics for producing enterprises that part of the expenses for salaries, wages, contract work, supplies and materials, fuel, and power credited to development work is shown as expenditures for development work. For nonproducing enterprises the total of these expenses is given as expenditure for development work.

Quantity of products.—In so far as the statistics on quantities of mineral products in 1919 are available for the states, they will be found in the reports of the United States Geological Survey.

Value of products.—The amounts given under this heading represent the selling value at point of production or f. o. b. at point of shipment, or such other value as may represent the net value or amount received for the 1919 product under the terms by which it was disposed of, and also includes the value at point of production of products used by the operating company.

Cost of mining and profits.—The data do not show entire cost of mining and well operations, and can not be used for the calculation of profits. No account was taken of depreciation or interest; rent of offices and buildings other than those for mines, quarries, and wells; insurance, selling, and other sundry expenses.

Lands controlled.—The inquiry on land tenure was confined to land pertaining to the operations covered by the report. In many of these, however, land held in reserve for future development and for other purposes not pertaining to mining was included and also a large number of more or less unsatisfactory estimates.

Power used.—The figures on power represent the rated capacity of the engines, motors, etc., and not the amount in actual daily use.

Fuel.—Statistics of fuel are shown only for anthracite and bituminous coal, coke, wood, oil, and gas. As only the principal varieties of fuel are shown, no comparison can be made with the total cost.

STATISTICS FOR THE STATE.

Kentucky, which ranks thirty-sixth among the states in size (land area, 40,181 square miles) and fifteenth in population (2,416,630 in 1920), ranked tenth in value of mineral products for 1919. The state ranked fifth in total number of persons engaged in the mining industries and in the average number of wage earners employed.

The gross value of products of all mines, quarries, and wells in Kentucky in 1919 amounted to $98,486,910. This figure includes $127,138, the amount received for mineral by-products, custom milling, power sold, and for work or miscellaneous services for other enterprises. It includes also a duplication of $41,104, the value of natural gas sold by some producers to others who used it as material or resold it and included it in the products reported by them. The increase in value of products in 1919 was more than 700 per cent compared with the value of products reported at the census of 1909. This increase and the increases in capital, wages, cost of supplies and materials and fuel and power, as shown in Table 1, although due in large part to general price increases during the census interval, nevertheless show large growth in mining, which is also reflected by increases in number of enterprises, number of individual mines, quarries, and wells operated, and average number of wage earners employed.

The mining industries reported in Kentucky in 1919, classified according to principal products and listed in order of value of products, were bituminous coal, petroleum and natural gas, limestone, fluorspar, clay, asphalt, sandstone, phosphate rock, mineral pigments, and barytes. The industries for which statistics can be shown without disclosure of individual operations are ranked by value of products in Table 2.

The principal industry in Kentucky in 1919 was the mining of coal, which embraced 635 mining enterprises, or 67.7 per cent of the total number, employed 91.3 per cent of the total number of wage earners, and reported as value of products $72,432,840, or 73.5 per cent of the total value of mineral products of the state. Kentucky ranked fifth in the United States in the production of bituminous coal. The coal-producing areas in the state extend over approximately 8,000 square miles in 22 eastern and southeastern counties, which are part of the Middle Appalachian coal fields, and approximately 5,000 square miles in 10 counties in the western part of the state, which are part of the Eastern Interior coal field. Approximately 75 per cent of the production in 1919 was from the eastern district in which Pike, Harlan, Letcher, Perry, Bell, and Floyd Counties were the most productive. Muhlenberg, Hopkins, and Webster Counties were the principal producers in the western district.

The industry second in importance was the production of petroleum and natural gas in which Kentucky ranked tenth in the United States. In this industry 196 enterprises, or approximately one-fifth of the total number in the state, employed 4.9 per cent of the total number of wage earners and contributed products valued at $23,329,521, or 23.7 per cent of the total. Production was reported from 32 counties in eastern, southern, and west central parts of the state.

Other mining industries in Kentucky were relatively small, but the Kentucky fluorspar, asphalt, and mineral pigments industries were important; the state ranked second among the states in the first two and third in the other.

A small amount of development work was done on mining properties which were unproductive in 1919. Eight petroleum enterprises and 3 coal-mining enterprises reported such work.

The mining enterprises in Kentucky in 1919 are classified according to form of operating organization in Table 3, which shows that corporations outclassed all other organizations in the number and size of enterprises operated. In all industries for the state as a whole and in the leading industries corporations employed practically all of the wage earners and contributed nearly the whole of the product, or a largely predominating share.

The relatively large number of small enterprises, as measured by the average number of wage earners employed, is shown in Table 4. Of the total number of mining enterprises in Kentucky, 89.1 per cent were in classes having no wage earners or fewer than 101. On the other hand, only 102 enterprises, or 10.9 per cent of the total number, had more than 100 wage earners each, and these enterprises employed 62.1 per cent of the total number of wage earners. The larger enterprises were in the coal-mining and petroleum and natural-gas industries and one in the asphalt industry.

Table 5 shows that in a majority of the enterprises employing wage earners and for 72.6 per cent of the total number of wage earners the hours of labor were 44 to 53 per week. These hours were reported chiefly by enterprises in the coal-mining industry for which the 8-hour day and 6-day week prevailed. Longer hours, for the most part 54 to 62, ruled in other industries. In the petroleum and natural-gas industry the hours ranged from 8 to 12 and were commonly 10 per day; in the fluorspar industry the 9-hour day and 6-day week was the rule; and in the quarrying industries the 10-hour day and 6-day week prevailed.

The statistics for wage earners presented in Table 6, showing changes in the number employed month by month, reflect conditions prevailing in the industries during the census year. The minimum in the coal industry in November was due to the great coal strike in that month. The abnormal minimum in this industry accounts for the low minimum in the same month in the combined figures for all industries.

Table 7 presents for 1919 statistics in detail for the state as a whole and for each industry that can be shown without disclosure of individual operations.

TABLE 1.—COMPARATIVE SUMMARY, PRODUCING ENTERPRISES: 1919 AND 1909.
