a Partially estimated. b No tax levied.

KANSAS.

NOTE.—The valuation is that of 1880, upon which the taxes shown were assessed. The valuation of railroad property, amounting to $20,547,803, is included in the personal-property column. There is no state or county school tax. The rate of state tax for "other purposes" is 5½ mills. The amounts are given as officially reported, though varying slightly from what the rates appear to produce. The township taxes are not included in the table. For explanation, see foot-note, page 25. The total amount of township taxes as reported by the state auditor is $564,829, which, being added to the taxes given in the table, makes the aggregate of taxation $4,979,650. Below the names of counties (and indented) are the corporations existing within them, with their valuations and local taxes. Those having 1,000 or more population are usually mentioned by name. The legal style of those aggregated "under 1,000" in Kansas is city.

Counties and cities.	Assessed valuation.			Taxation.							
	Real estate.	Personal property.	Total.	State.		County.		Minor civil divisions less than counties, exclusive of school districts.		School district.	Total.

a No tax levied. b Value of railroads.

NEBRASKA.

NOTE.—The table exhibits the assessment and taxation for 1880. The rate of state school tax is 1 mill. The rate of state tax for general revenue is 2 mills, for state university $\frac{3}{8}$ of a mill, and for sinking fund it varies, being for some counties as low as $\frac{1}{8}$ of a mill, and for others as high as $\frac{5}{8}$. The total rate formed by the union of these, upon which the tax for "other purposes" has been computed, varies from $2\frac{1}{4}$ to 3 mills. There is no county school tax. The taxes shown are wholly *ad valorem*. Below the names of counties (and indented) are the corporations existing within them, with their valuations and local taxes. Those having 1,000 or more population are usually mentioned by name. The legal style of those aggregated "under 1,000" in Nebraska is city, town, or village.

a No tax levied.

COLORADO.

NOTE.—The table is for the fiscal year ending November 30, 1880. There is no state school tax. The rate of state tax for "other purposes" is 5 mills, and the amounts have been computed in this office. Below the names of counties (and indented) are the corporations within them, with their valuations and local taxes. Those having 1,000 or more population are usually mentioned by name. The legal style of those aggregated "under 1,000" in Colorado is city or town.

TABLE III.—VALUATION AND TAXATION BY MINOR CIVIL DIVISIONS—Continued.

NEVADA.

NOTE.—The table exhibits the valuation of 1879, and the taxation based upon it (for 1880). The rate of state school tax is ½ mill, and of state tax for "other purposes" 5 mills on the dollar. The rate of county school tax varies from 2 to 5 mills. The rate of county tax for "other purposes" varies from 9½ to 26½ mills. There was a school-district tax in only five counties. The amounts of state and county taxes were computed in the Census Office from the rates officially furnished.

The taxes exhibited are entirely *ad valorem*, but the statutes provide for a poll tax of $4, one-half the revenue of which goes to the state and the other to the counties. The amount of this in 1880 is not known, and, therefore, not included, but in 1879 it was about $62,000, or $31,000 for the state and an equal amount for the counties. This tax is not devoted to school purposes. Cities and towns having 1,000 or more population are indented under counties.

OREGON.

NOTE.—The gross valuation made use of was for the year 1880. This valuation makes no allowance for the amount of indebtedness owed within the state and for exemption of household property. The indebtedness and exemptions obtained were for 1879. These were deducted from the gross valuations to secure the results shown in the table, the subtraction being made from the personal property in all counties except Clackamas, Douglas, and Jackson, where it was taken out of the real estate, the personal property not being sufficiently large to admit of such diminution. The total amount of deductions thus made was $20,554,473 for indebtedness, and $4,843,937 for exemptions.

The taxation is for the year 1880, and is based on the valuation of 1879 ($46,422,817). The rate of state school tax is 3 mills. This is locally considered a county tax, as the amounts derived from it are retained and expended by the counties. The rate of state tax for "other purposes" is 7 mills, 3 mills being to pay indebtedness and 4 mills for general revenue. The county tax for "other purposes" is both *ad valorem* and poll, the amount derived from the latter source being $23,785, and the rate one dollar. Cities and towns having 1,000 or more population are usually indented under counties.

a It will be seen that the city of Portland, in the county of Multnomah, shows a larger valuation than is given for the county. The explanation lies in the fact that the city assessors assess property at a higher rate than the county assessors.

b No tax levied.

CALIFORNIA.

NOTE.—The fiscal year considered in the table is the one closing June 30, 1879. The valuation for the following year was: Real estate, $436,557,491; personal property, $111,065,278; total, $547,622,769, and the total valuation a year later (ending June 30, 1881) was $666,202,674. The rate of state tax for the year considered in the table was, for school purposes, $2\frac{33}{100}$ mills, and for "other purposes" $3\frac{17}{100}$ mills. The rate in the succeeding year was $2\frac{3}{8}$ mills for schools, and $3\frac{1}{4}$ mills for "other purposes". There is in California a poll tax of $2, devoted to school purposes. This is not included in the tabular exhibit, as it was found impossible to obtain the correct figures, but the amount of the collections for the year ending June 30, 1881, was $316,869. It is probable that this amount represents very nearly the revenue from this source for the year ending June 30, 1879. This sum, therefore, less $69,418 (see what is said of taxes of San Francisco further on), may properly be added to the amount of state (or county) school tax given in the table. Under the old constitution this was locally held to be a county tax, since each county retained for its own use whatever accrued therefrom. Under the new constitution it has been made a state tax proper, and is paid into the state treasury. The amount derived from poll taxes in San Francisco, being known ($69,418), is included in the $489,109 of school-district taxes. The county and city of San Francisco are identical in area, and all local taxes are embraced in the city and the school-district taxes. District taxes are not levied in all counties. Below the names of counties (and indented) are the corporations existing within them, with their valuations and local taxes. Those having 1,000 or more population are usually mentioned by name. The legal style of those aggregated "under 1,000" in California is town.

TERRITORIES.

TABLE III.—VALUATION AND TAXATION BY MINOR CIVIL DIVISIONS—Continued.

ARIZONA.

NOTE.—The valuation is given as reported by the local authorities. The rate of territorial school tax is 1½ mills on the dollar, and of territorial tax for "Other purposes" 4½ mills. The school-district tax for Yavapai county was entirely raised in district No. 1, the village of Prescott. With the exception of Maricopa and Yavapai, it was impossible to obtain any statement regarding school-district taxation. Probably little, if any, money is raised in this way in the other counties. The law prescribes that the rate of county school tax shall be "not less than 50 nor more than 80 cents on each $100 of taxable property". The amounts are given as reported by the county officials, but they are less in several instances than even the smaller of these rates would produce on the valuation. Below the names of counties (and indented) are the corporations existing within them, with their valuations and local taxes. Those having 1,000 or more population are usually mentioned by name. The legal style of those aggregated "under 1,000" in Arizona is village.

DAKOTA.

NOTE.—The table is for the year 1880. The taxes presented are *ad valorem*. There is a territorial poll tax of $1 devoted to the support of common schools, but no returns have been received showing how much was derived from this source. The rate of territorial school tax on property is 2 mills, and of territorial tax for "other purposes" 3 mills. There is no county school tax. Below the names of counties (and indented) are the corporations existing within them, with their valuations and local taxes. Those having 1,000 or more population are usually mentioned by name.

IDAHO.

NOTE.—The table is for the year ending September 30, 1880. The territorial tax is both *ad valorem* and poll. The amount coming from the latter source is $9,118, leaving $39,338 to be derived from the former, The rate necessary to produce this sum is a little over 6 mills. There is no territorial school tax. The territorial taxes are reported biennially, in gross, for the two years. One-half of those sums was taken as a just amount for a single year, nothing more exact being obtainable. The exhibit is by counties, the only corporation shown being Boisé City.

MONTANA.

NOTE.—The table is for the year 1880. There is no territorial school tax. The rate of territorial tax for "other purposes" is 3 mills on the dollar. The lowest rate of county school tax is 3 mills and the highest 5 mills. School-district taxes were levied in only four counties. The taxes shown are wholly *ad valorem*. The exhibit is by counties, the only corporation shown being Butte City.

NEW MEXICO.

NOTE.—The schedules received were very imperfectly filled out, and it was found to be utterly impossible to obtain printed documents that would assist in their interpretation or supply deficiencies. There does not appear to be any territorial school tax. The territorial tax for "other purposes" has been computed in the Census Office at the rate of 5 mills on the dollar, this being the rate indicated in several schedules.

a No report received, nor data obtainable for estimates. b Estimated.

UTAH.

NOTE.—The rate of territorial school tax is 3 mills, and of tax for "other purposes" 3 mills. There is no county school tax. The school-district tax is for 1879, while the other taxes are for a year later. Below the names of counties (and indented) are the corporations existing within them, with their valuations and local taxes. Those having 1,000 or more population are usually mentioned by name. The legal style of those aggregated "under 1,000" in Utah is city, town, or village.

TABLE III.—VALUATION AND TAXATION BY MINOR CIVIL DIVISIONS—Continued.

WYOMING.

NOTE.—The table is for the year 1880, except in regard to school-district taxation, which is for 1879. The rate of territorial school tax is 2 mills. This is considered locally a county tax, but as the rate is uniform and settled by statute it is tabulated as a territorial tax. The rate of territorial tax for "other purposes" is 4 mills. Below the names of counties (and indented) are shown the only corporations (two) from which reports were received.

Counties, cities, and towns.	ASSESSED VALUATION.			TAXATION.							
	Real estate.	Personal property.	Total.	Territorial.		County.		Minor civil divisions less than counties, exclusive of school districts.		School district.	Total.

INTRODUCTORY REMARKS TO TABLE IV.

In presenting the tables which follow, showing the valuation, taxation, and general financial condition of the cities, towns, and villages of the United States having a population of 7,500 and over, a few remarks are necessary to prevent misunderstanding, and to explain what otherwise might appear inconsistent. To gather and harmonize such statistics as these is a matter of peculiar difficulty, owing to the differences which pertain to the organization of municipal corporations in different states, and even in a single state. The tables exhibit certain *data* for all corporations having a specified population, whether styled legally town, city, borough, or village, the District of Columbia even being included. The functions of these four classes of corporations are not identical, nor are the functions of those of a single class always identical. In some states each city maintains its poor; in others a part of them only do so, the counties caring for the poor of the others; and in still others the matter is wholly in the hands of the counties. Again there may be incorporated poor districts strictly independent of the city or the county, and vested with the power of providing for all paupers within the district limits. The support of public schools is a matter in which even more and worse complexities for the statistician exist. School districts and boards of education often take the entire financial as well as administrative affairs of the school away from the municipality, and it is not uncommon that their jurisdiction extends over a larger area, or that two or more independent school boards exist within it, each having control of somewhat detached or separated portions of the city. In providing water supply, a variety of methods have been followed. This is done sometimes by a private corporation which sells water to the city and to individuals. In such case, of course, the city has no revenue from water rates. Oftentimes a public corporation or water-supply district is formed. This may have an existence as distinct from the city, for its specific purpose, as a village corporation is distinct for its chartered objects from that of the town in which it is situated. On the other hand, the connection may be quite intimate, the city, possibly, having guaranteed the payment of the district's bonds. In some states the revenue from licenses for the sale of liquor accrues to the city or town (seldom to the borough or village), and in others to the county. Usually it swells the general revenue, but sometimes it is set aside to specific purposes, as the maintenance of police or the support of public education. In such cases, of course, it lessens the amount of local taxation for these objects. In some states prohibition exists, and consequently there is no revenue from this source; in others, license and a revenue; and in still others, unrestricted sale without license, and therefore no revenue. In some states it is the custom to make temporary loans from banks or individuals, in anticipation of the collection of taxes, to meet municipal wants. This is especially common in New England. In others, warrants on the treasurer are issued, the present worth of which is dependent on the distance of the day when that officer will have funds for their liquidation. Similarly, in regard to almost all other items of income and outgo, though not so generally, does the specializing and distribution of powers exist.

From these remarks it may be seen what are some of the most striking points of difficulty in the matter of receipts and expenditures of municipalities that present themselves demanding consideration in the preparation of tables such as follow. By reference to the note relating to Connecticut, page 217, some of the difficulties met with in that state may be seen, and the manner of their adjustment.

It is plainly impossible, then, that the statement for cities situated in different states should always embrace the same facts, but as far as possible each state has been made harmonious with itself. In the New England states, where corporations with different functions were imposed upon each other within the town or city area, if the *data* were accessible, they were combined so as to show the condition of the community. Of course the fiscal years of the corporations thus united will not exactly agree. The date given is usually that of the circumscribing corporation. The town name is also used as having more significance. But in the western states, generally, the exhibits are for cities only, the inclosing township, though often bearing the same name, not being considered. A few exceptions are noted as they occur. So, in the southern states, the exhibits are for cities, or for towns existing in the independent New England sense, without reference to any townships, magisterial districts, etc., which may inclose them. In regard to the inclusion or exclusion of the school district throughout the West, and in those southern states where it has anything more than an administrative existence, the notes preceding Tables A, B, and C will furnish the desired information. Had it been easy of accomplishment they would have been included universally. Whenever the receipts of the school districts have been excluded, the expenditures for schools have been excluded also. The valuations and tax levies are usually the same as those given in Table III. Generally, when there is disagreement, it is owing to the inclusion of the school district taxes in Table IV, which, in Table III, are given a separate column, commonly exhibited there, however, only by county aggregates. The amounts of tax levies shown do not represent collections. They are the amounts laid on the property and polls of the municipalities. All indirect taxes, such as licenses for pursuing any occupation or profession, are excluded from the levies unless otherwise mentioned. The rates of taxation have been arrived at by computation. They do not always exactly agree with the rates reported on the schedules. It is not uncommon that the rate of taxation established by a city fails to produce the exact amount which it is theoretically efficient for, and this without reference to the fact that there will always be uncollectable taxes, owing to a variety of causes which it is hardly necessary to specify. It will be noticed that in some states there is considerable variation in the rate of state tax. Bearing in mind what has just been said, that the rates shown in the tables are the resultants of a valuation and levy first established, it is plain that whenever the local valuation differs from the state valuation the rate deduced will differ from the state rate. In some states, notably in several of the New England states, no separate levy is made for state and county taxes, a single tax only being laid, known as the town or city tax. Out of the receipts from this and other revenue the state and county taxes are paid. In these cases, therefore, they form a part of a city's or a town's receipts and expenditures, swelling the budget by so much. Such instances are noticed as they occur in the notes relating to the exhibits of states. In most states, however, such is not the case, and these amounts are excluded.

No comparison can be made between the receipts from taxes shown in Table IV—B and the tax levies of Table IV—A, since the amounts tabulated as receipts are the actual collections, and moreover, usually include dog taxes, special taxes for the improvement of certain streets assessed on the abuttors, and oftentimes taxes on occupations, banks, corporations, etc. Yet it does not always result that the receipts from all these sources in the particular year considered are more than the simple levy on property and polls. Local causes sometimes operate to postpone to another year the collection of one or more of the several classes of taxes mentioned.

Probably the receipts from water rents, given in a few instances, are really the entire receipts on account of water, including items additional to rent, such as sums derived from sale of old material, etc. Considerable of the amounts entered as unspecified debt, if properly classified, would fall into other debt columns.

In a very few instances, as will be seen by the lack of correspondence in fiscal years between Tables A, B, and C, the receipts and expenditures are for a period a year or so later than the valuations and tax levies.

In conclusion it may be said that great care has been exercised to make the statements for each city exact and truthful. The difference of function possessed by corporations led oftentimes to a misunderstanding of very simple questions, and from this and other causes the schedules as originally received contained many deficiencies and manifest inaccuracies. To supplement the former and correct the latter the printed annual reports of the officials of nearly every corporation were secured. By the aid of these the schedules were perfected. This revised statement was then sent to the local officers for approval or final correction. In some cases, owing partly to the blind and confusing methods of book-keeping in vogue, considerable correspondence was necessary before the desired fullness and accuracy were attained. But it is believed that the tables will be found as complete and correct as could be expected if regard is had to these explanatory remarks and to the various notes.

It is not necessary to call the attention of the student of municipal government to the many interesting and valuable deductions that can be drawn from a study of these tables. They illustrate the wise and the unwise tendencies that exist in municipal legislation. A single reference may, however, be made: A comparison of the receipts from the sale of new bonds, from temporary loans, and from sinking funds with the expenditures for the payment of debt, shows clearly that in some states the maximum point of indebtedness has been reached, and that the process of reduction has been begun. The receipts from water rents indicate that a part at least of the borrowed money has been used in the establishment of valuable and enduring public works. This comparison shows that in others the year's indebtedness incurred is greater than that paid, that borrowing is still a general expedient to fill exhausted treasuries, and that a public water system, that great *desideratum* of the modern city, has not yet been created.

NOTES TO TABLE IV—A.

CALIFORNIA.—The city tax levies include school district taxes.

CONNECTICUT.—The local government in Connecticut is quite complex. The transactions of the state are with the towns (townships). A town may have within it either a city or a borough, and one or several school districts. It may have both city and borough as well as several school districts (Norwalk). It may have a city with less area than itself and also several school districts (Norwich), or two boroughs and several school districts (Derby). Divided into two school districts, it may have a city coextensive with itself (New Haven), or town, city, and (a single) school district may be coextensive (New London). Each of these governments has distinct and independent functions. Their fiscal years do not usually agree. In the table the tax levies of the cities, boroughs, and school districts have been combined with those of the towns. The date of the fiscal year used is that of the town. County taxes are not levied every year. The counties in which seven of the towns are situated laid no taxes in the year tabulated. A part of the taxes of towns is for the support of schools, and the amount raised by them for this purpose is usually more than that contributed by the school districts.

DELAWARE.—There is no state tax levied in Delaware. Personal property is not taxed by the city of Wilmington; therefore no assessment is made. The city tax levy includes the school district taxes.

FLORIDA.—The schools are supported by the counties; therefore no school taxes are included.

GEORGIA.—See foot-note regarding bonds sold in Atlanta, page 237. This transaction, if included, would add $385,000 equally to the receipts and expenditures.

ILLINOIS.—The local tax levies include the school district taxes, but the columns of receipts and expenditures include no sums received or paid out for schools except in the case of Chicago. The excesses of city tax levies given here over the amounts shown in Table III, pages 159 to 164, inclusive, are the amounts of school taxes.

INDIANA.—The city tax levies include the school district taxes, but the columns of receipts and expenditures include no sums received or paid out for schools.

IOWA.—The city tax levies include the school district taxes, but the columns of receipts and expenditures include no sums received or paid out for schools.

KANSAS.—The city tax levies include the school district taxes.

KENTUCKY.—The city tax levies include the local school tax. Newport, Louisville, and Covington are exempt from county tax.

LOUISIANA.—The city tax levy of New Orleans includes the local school tax.

MAINE.—The valuations and tax levies are for a different year from those shown in Table III, pages 26 to 33, inclusive.

MARYLAND.—The city school tax is included in the city tax levy of Baltimore. The state tax of Baltimore is given as reported by the city auditor, but it differs from the amount reported by the state auditor shown in Table III, page 115.

MASSACHUSETTS.—Taxes on polls as well as bank and corporation taxes are excluded in the statement of tax levies. The amounts levied as exhibited in this table are, in nearly all cases, for the year preceding the one considered in Table III, pages 43 to 49, inclusive. Moreover, in Table III the poll taxes are included.

MICHIGAN.—The city tax levies include the school district taxes.

MINNESOTA.—The city tax levies include the school district taxes.

MISSOURI.—The city tax levies include the school district taxes.

NEBRASKA.—The city tax levies include the school district taxes.

NEVADA.—The city tax levies include the school district taxes.

NEW HAMPSHIRE.—The equalized valuation is used. See what is said on this subject in the note prefatory to the tabular presentation of valuation and taxation for this state, Table III, page 34. The city taxes or appropriations for the support of schools are included in the city levies, and the school district taxes in the city of Concord, which are additional to the city appropriation for schools, are also included.

NEW JERSEY.—The valuations, in some instances, are for a year earlier or later than is indicated. The city tax levies include the school district taxes.

NEW YORK.—The valuations as equalized by the county boards of supervisors are given. The city tax levies include the school district taxes. The villages of Jamestown and New Brighton each have a population exceeding 7,500, but by an inadvertence they were omitted from the list until it was too late to secure a statement sufficiently full in all the items considered in Tables A, B, and C. Rather than insert a partial statement it is thought best to leave them out altogether.

OHIO.—The city tax levies include the school district taxes.

OREGON.—The city tax levies include the school district taxes.

PENNSYLVANIA.—Included in the valuations of personal property are the "valuations of salaries, emoluments of office, posts of profit, trades, occupations, and professions". The valuations of personal property proper can be seen by reference to Table III, pages 83 to 114, inclusive. The tax levies for the county and city include the amounts laid on salaries, emoluments of office, etc. The school district taxes are included in the city levies.

RHODE ISLAND.—The city tax levies include the school district taxes. There is no county tax in this state. The county exists only for judicial purposes, and has no tax-levying power.

SOUTH CAROLINA.—The city tax levy of Charleston includes the local school tax.

VIRGINIA.—The city tax levies are for 1879, and include the local school taxes. The state levies are for 1880, and are the sums laid on property only. Therefore the amounts shown in this table differ somewhat from those in Table III. The cities and towns exhibited in the table have a corporate existence wholly independent of the counties within which they geographically lie; therefore they bear no share of the burden of county taxes.

WEST VIRGINIA.—The city tax levy includes the school district taxes.

TABLE IV.—FINANCIAL CONDITION OF CITIES, ETC., HAVING A POPULATION OF 7,500 AND

SUMMARY BY STATES.

	States and Territories.	No. of cities, etc.	Population.	Assessed valuation.				Taxation.

NOTES TO TABLE IV—B.

CALIFORNIA.—Receipts for the support of schools are included.

CONNECTICUT.—The receipts of towns and of cities, boroughs, and school districts within them, are combined under the town name. See note, Table IV—A, page 217, and also foot-notes, pages 220 and 221. Receipts on account of state and county taxes are included. See what is said below as to this point in other New England states.

FLORIDA.—The schools are supported by the counties; therefore receipts on their account are not included.

GEORGIA.—The receipts for the support of schools are included.

ILLINOIS.—The receipts of the boards of education for the support of schools are not included with the city receipts except in the case of Chicago.

INDIANA.—The receipts of the boards of education for the support of schools are not included with the city receipts.

IOWA.—The receipts of the boards of education for the support of schools are not included with the city receipts.

KANSAS.—The receipts for the support of schools are included.

KENTUCKY.—The receipts for the support of schools are included.

LOUISIANA.—The receipts for the support of schools are included.

MAINE.—The receipts and expenditures include those on account of state and county taxes. Towns and cities in Maine pay such taxes out of their general revenue, no independent tax for these purposes being levied. The total receipts, therefore, are swelled by so much, although it is impossible to assert that the amounts are included in any particular column. No licenses for the sale of liquor were granted. The receipts for the support of schools are included.

MARYLAND.—The revenue from liquor licenses does not go to the city treasuries. In the city of Baltimore the receipts for the support of schools are included. In Cumberland and Frederick the schools are not under city control.

MASSACHUSETTS.—Taxes on polls are included in the receipts from taxes, although excluded from the tax levies given in Table IV—A, page 225. The rate of poll-tax is regulated by the towns and cities, and is usually from one to two dollars, the latter being the *maximum*. Bank and corporation taxes are also included in the receipts from taxes. The receipts and expenditures include those on account of state and county taxes. Towns and cities in Massachusetts pay such taxes out of their general revenue, no independent tax for these purposes being levied. The total receipts, therefore, are swelled by so much, although it is impossible to assert that the amounts are included in any particular column. A few towns have incorporated fire districts within them, which lay taxes for the support of a fire department, improvement of streets, etc. The receipts and expenditures of such districts have been combined with those of the town. One large town (Attleborough) still retains the school district system in managing the financial affairs of its schools. In this case the receipts and expenditures of the districts are combined with those of the town. The water supply is often controlled by partially or wholly independent corporations. In all such cases, when correct figures could be obtained, they have been combined with the receipts and expenditures of the town or city. The city of Boston receives the income and pays the expenses of the county of Suffolk, the income amounting to $71,516, and the expenditures to $296,113. These are excluded in the table, the exhibit being for the city only. The cash on hand at the beginning of the year, as reported by the treasurer, was $2,489,784, and at the close of the year, $3,981,882; but these sums are on account of city and county combined. The amounts for the city only being separately reported, no figures are entered under the head of cash on hand from the preceding year; therefore the volume of transactions is lessened to this extent.

MICHIGAN.—The receipts for the support of schools are included.

MINNESOTA.—The receipts for the support of schools are included.

MISSOURI.—The school district receipts are not included, although the district levies for schools are included with the city levies in Table IV—A, page 227.

NEBRASKA.—The receipts for the support of schools are included.

NEVADA.—The school district receipts are not included with the city receipts.

NEW HAMPSHIRE.—No licenses for the sale of liquor are granted, its sale being prohibited by statute. The schools are under city government, and, therefore, school moneys form a part of the receipts. School districts exist in the city of Concord, and the receipts of these have been combined with those of the city. The receipts and expenditures include those on account of state and county taxes. Cities in New Hampshire pay such taxes out of their general revenue, no independent tax for these purposes being levied. The total receipts, therefore, are swelled by so much, although it is impossible to assert that the amounts are included in any particular column.

NEW JERSEY.—The receipts for the support of schools are included. The receipts and expenditures include those on account of state and county taxes.

NEW YORK.—The receipts for the support of schools are included. See what is said on page 217 regarding the omission of statement for the villages of Jamestown and New Brighton.

OHIO.—The receipts of the school districts for the support of schools are not combined with the city receipts. The only exception is in the case of Cincinnati, where they were inseparably united in the schedule and are so tabulated. The city tax levies shown in Table IV—A, pages 229 and 231, have the taxes for schools and other purposes combined. No licenses for the sale of liquor were granted.

OREGON.—The school district receipts are not included with those of the city.

PENNSYLVANIA.—The receipts of the school districts are not included with those of the cities, although the tax levies given in Table IV—A, page 231, include school district levies. The city of Philadelphia is the only exception to this, the schools being controlled by the city. Licenses for the sale of liquor are granted by the counties, and not by the municipalities. The receipts from this source, therefore, go to the county treasuries. The city of Philadelphia is an exception.

RHODE ISLAND.—The receipts for the support of schools are included. The receipts and expenditures include those on account of state taxes. Cities and towns in Rhode Island pay such taxes out of their general revenue, no independent tax for this purpose being levied. The total receipts, therefore, are swelled by so much, although it is impossible to assert that the amounts are included in any particular column.

SOUTH CAROLINA.—The receipts for the support of schools are included.

VIRGINIA.—The receipts for the support of schools are included.

TABLE IV.—FINANCIAL CONDITION OF CITIES, ETC., HAVING A POPULATION OF 7,500 AND OVER: B—EXHIBIT OF RECEIPTS IN DETAIL.

Windham	Oct. 1, 1879	1,042	1,312			19,200	33,410		17,036	72,000

a No licenses for the sale of liquor were granted. b Receipts from liquor licenses go into the county treasury. c The water-works are owned by a private corporation.

DELAWARE.

Total		$26,455					$249,543	$60,029	$18,473	$354,500
Wilmington	Jan. 1, 1880	26,455					249,543	60,029	18,473	354,500

DISTRICT OF COLUMBIA.

Total		$244,859	$70,764				$1,510,421	$196,382	$1,804,365	$3,826,791
The District	June 30, 1880	244,859	70,764				1,510,421	196,382	a 1,804,365	3,826,791

a Congress appropriated $1,692,990 of this amount.

FLORIDA.

Total			$2,800				$38,685		$8,068	$49,553
Jacksonville	Apr. 3, 1880		2,100				31,685		1,808	35,593
Key West	Oct. 10, 1879		700				7,000		6,260	13,960

TABLE IV.—FINANCIAL CONDITION OF CITIES, ETC., HAVING A POPULATION OF 7,500 AND OVER: B—EXHIBIT OF RECEIPTS IN DETAIL.

GEORGIA.

Cities, towns, etc.	Year ending—	Cash balance from preceding year.	Liquor licenses.	Proceeds of bonds sold.	Sinking fund.	Temporary loans.	Taxes.	Water rents.	Other sources.	Total.
Total		$64,189	$40,731	$92,400		$152,500	$946,642	$14,695	$202,418	$1,543,575
Atlanta	Dec. 31, 1879			(a)			282,582		63,849	346,431
Augusta	Dec. 31, 1879	1,194	8,638	92,400		152,500	193,460	2,302	24,731	475,225
Columbus	Dec. 31, 1879	6,939	4,237				65,179		9,366	85,721
Macon	Jan. 1, 1880		6,500				86,614		28,500	121,614
Savannah	Dec. 31, 1879	56,056	21,356				318,807	42,393	75,972	514,584

a Bonds were sold at par to the amount of $385,000, but the schedule failed to state the amount used to pay floating debt and the amount remaining as a cash balance at the close of the year. The whole transaction is therefore omitted from the table.

ILLINOIS.

a The water-works are owned by a private corporation.
b The receipts from taxes show the collections made in 1879 from the levy of 1878 and years preceding to 1869.
c The amount received from temporary loans is inseparably combined with the receipts from bonds sold.
d Receipts from taxes for interest on registered city and county bonds sold are not included. (See foot note, page 223.)
e No liquor licenses were granted.

INDIANA.

Cities, towns, etc.	Year ending—	Cash balance from preceding year.	Liquor licenses.	Proceeds of bonds sold.	Sinking fund.	Temporary loans.	Taxes.	Water rents.	Other sources.	Total.
Total		$448,190	$16,838	$368,601	$11,472	$279,117	$1,509,567	$60,201	$220,437	$2,914,423

a The town of Amsterdam, in which the village of Amsterdam is situated, collects the revenue from liquor licenses.
b The water-works are owned by a private corporation.
c The amount received from liquor licenses is entered as a city receipt for the sake of uniformity, but as a matter of fact it does not pass into the city treasury, but is paid directly to the police board for the support of police.
d The town of Middletown, in which the village of Edgewater is partly situated, collects the revenue from liquor licenses.
e The receipts are for the town and village of Hornellsville combined.
f The town of Ithaca, in which the village of Ithaca is situated, collects the revenue from liquor licenses.
g Inclusive of school-district receipts from taxes and other sources.
h The town of Wallkill, in which the village of Middletown is situated, collects the revenue from liquor licenses.
i The town of Deer Park, in which the village of Port Jervis is situated, collects the revenue from liquor licenses.
j The receipts are for the town and village of Saratoga Springs combined.
k The receipts are for the town and city of Utica combined.
l The town of Watervliet, in which the village of West Troy is situated, collects the revenue from liquor licenses.
m The amount received from taxes is inseparably combined with that received from other sources.

NOTES TO TABLE IV—C.

CALIFORNIA.—The expenditures for poor are made by the counties and not by the cities. The city and county of San Francisco being coextensive, the receipts and expenditures on account of the county government are combined with those of the city. In this case, therefore, expenditures for poor appear in the table.

CONNECTICUT.—The expenditures of towns, and of cities, boroughs, and school districts within them, are combined under the town name. See note, Table IV—B, page 217, and also foot-notes, pages 220 and 221. Expenditures on account of state and county taxes are included. See what is said below as to this point in other New England states.

FLORIDA.—The schools are supported by the counties; therefore expenditures on their account are not included.

ILLINOIS.—The schools being controlled by boards of education, the expenditures on their account are not shown except in the case of Chicago. In some cases where no expenditures for water are shown they are combined with "fire" or other items. The poor are not supported by the cities. They are maintained either by the counties or townships, usually the former.

INDIANA.—The expenditures of the boards of education for the support of schools are not shown. The poor are supported by the counties.

IOWA.—The expenditures of the boards of education for the support of schools are not shown. The poor are supported by the counties.

KANSAS.—The poor are supported by the counties.

MAINE.—The receipts and expenditures include those on account of state and county taxes. Towns and cities in Maine pay such taxes out of their general revenue, no independent tax for these purposes being levied. These amounts are included in the column of expenditures for "unspecified purposes." It is manifest, however, that in the city of Rockland they were omitted by the local official preparing the schedule unless the large cash balance in favor of receipts ($29,277) indicates that payment had not been made at the close of the year.

MARYLAND.—The expenditures for schools are made by the counties and not by the cities except in the case of Baltimore, the government of which is independent of the county. The poor are supported by the counties except in the case of Baltimore.

MASSACHUSETTS.—The receipts and expenditures include those on account of state and county taxes. Towns and cities in Massachusetts pay such taxes out of their general revenue, no independent tax for these purposes being levied. These amounts are included in the column of expenditures for "unspecified purposes." A few towns have incorporated fire districts within them which lay taxes for the support of a fire department, improvement of streets, etc. The receipts and expenditures of such districts have been combined with those of the town. One large town (Attleborough) still retains the school district system in managing the financial affairs of its schools. In this case the receipts and expenditures of the districts have been combined with those of the town. The water supply is often controlled by partially or wholly independent corporations. In all such cases, when correct figures could be obtained, they have been combined with the receipts and expenditures of the town or city. For a remark concerning the receipts and expenditures of the city of Boston see note to Table IV—B, page 234.

MINNESOTA.—The poor are supported by the counties except as noted in Saint Paul.

NEBRASKA.—The poor are supported by the counties, and not by the cities.

NEW HAMPSHIRE.—The expenditures made by the school districts in Concord are combined with the city expenditures for schools. City notes paid, whether they are demand or time notes, are considered as temporary loans. The receipts and expenditures include those on account of state and county taxes. Cities in New Hampshire pay such taxes out of their general revenue, no independent tax for these purposes being levied. These amounts are included in the column of expenditures for "unspecified purposes."

NEW JERSEY.—The expenditures include those on account of state and county taxes, the amounts forming a part of the column of "unspecified purposes."

NEW YORK.—See what is said on page 217 regarding the omission of statement for the villages of Jamestown and New Brighton.

NORTH CAROLINA.—The schools are mainly supported by state funds disbursed by county treasurers. Townships sometimes levy a special school tax as an addition to the preceding. Such a tax was levied by the *township* of Raleigh, but it formed no part of the city budget. The poor are supported by the counties, except as to the amount shown.

OHIO.—The poor are supported by the counties, except as to the amounts shown.

PENNSYLVANIA.—The expenditures for schools are made by the school districts and not by the cities and boroughs. They are, therefore, excluded except in the case of Philadelphia where they form a part of the city budget. The poor are usually supported by poor districts. In the cases of Allegheny, Pittsburgh, and Philadelphia the poor districts are coextensive with the cities and the expenditures of district and city are combined.

RHODE ISLAND.—The expenditures include those on account of State taxes. Cities and towns in Rhode Island pay such taxes out of their general revenue, no independent tax for this purpose being levied. The amounts are included in the expenditures for "unspecified purposes."

TENNESSEE.—The poor are supported by the counties except as to the small amount shown.

TABLE IV.—FINANCIAL CONDITION OF CITIES, ETC., HAVING A POPULATION OF 7,500 AND OVER: C—EXHIBIT OF EXPENDITURES IN DETAIL.

a The schools are supported by the school districts.
b Supported by the town of Amsterdam, in which the village of Amsterdam is situated.
c Supported by the county of Kings, in which the city of Brooklyn is situated.
d Only $150,934 of this amount is an expenditure out of the city treasury, the balance, $63,620, being received from liquor licenses granted. This amount does not pass into the city treasury, but is paid directly to the police board.
e Supported by the town of Middletown, in which the village of Edgewater is partly situated.
f The expenditures are for the town and village of Hornellsville combined.
g Supported by the town of Ithaca, in which the village of Ithaca is situated.

TABLE IV.—FINANCIAL CONDITION OF CITIES HAVING A POPULATION

TENNESSEE.

	Cities, towns, etc.	Year ending—	DEBT. Principal of bonded debt.	Interest on bonded debt.	Temporary loans.	Sinking fund.	Unspecified.	Total.
	Total		$24,700	$97,138			$10,384	$132,222
1	Chattanooga	Nov. 1, 1879		203			8,360	8,563
2	Knoxville	Jan. 1, 1880		8,392			2,084	8,476
3	Memphis	Dec. 31, 1879						
4	Nashville	Oct. 1, 1880	24,700	90,483				115,183

a This amount was paid toward support of hospital. The yellow fever prevailed extensively in Memphis in 1879, necessitating other comparatively large expenditures on account of health, but they are inseparably combined with those for streets, drainage, and bridges.

TEXAS.

	Total		$27,000	$224,066	$49,548	$1,000	$38,112	$340,326
1	Austin	Oct. 20, 1879	4,500	9,767	663			14,930
2	Dallas	Apr. 21, 1880		26,187			9,523	35,710
3	Galveston	Feb. 29, 1880	22,500	83,529	31,530		5,269	142,828
4	Houston	Dec. 1, 1879		90,976			22,437	113,413
5	San Antonio	Feb. 29, 1880		14,207	17,349	1,000	889	33,445

a The schools are supported by the county.

UTAH TERRITORY.

	Total				$34,733			$34,733
1	Salt Lake	Nov. 30, 1879			34,733			34,733

a The expenditures for schools are made by the school districts.

VERMONT.

	Total		$1,000	$35,324	$29,850	$1,034		$67,208
1	Burlington	Dec. 31, 1879		26,836	29,850	1,034		57,720
2	Rutland (a)	Feb. 18, 1880	1,000	8,488				9,488

a The exhibit is for the town of Rutland, Rutland village, and the school districts in combination.

VIRGINIA.

	Total		$52,000	$674,912	$379,897	$43,337	$11,294	$1,161,440
1	Alexandria	May 31, 1880		41,479	1,797	13,839	11,294	68,409
2	Danville	Apr. 30, 1880		40,300				40,300
3	Lynchburg	Apr. 1, 1880	8,000	55,941	25,000	20,831		109,772
4	Norfolk	July 1, 1880		185,552	118,000			248,552
5	Petersburg	June 30, 1880		88,785	18,000	8,667		115,452
6	Portsmouth	July 1, 1880		15,278				15,278
7	Richmond	July 31, 1880	44,000	297,577	222,100			563,677

a The cost of lighting streets is inseparably included with expenditures for water.

WEST VIRGINIA.

	Total			$38,181			$71,386	$109,567
1	Wheeling	Jan. 1, 1880		38,181			71,386	109,567

a The schools are supported by the school districts.

WISCONSIN.

	Total		$66,850	$189,454	$570,423		$16,400	$843,127
1	Appleton	Apr. 9, 1880	11,350					11,350
2	Eau Claire	Apr. 1, 1880		9,675				9,675
3	Fond du Lac	Apr. 6, 1880	4,000	12,460			2,850	19,525
4	Janesville	June 1, 1880	6,000	3,124				15,400
5	La Crosse	Dec. 31, 1879	4,000	6,570				9,124
6	Madison	Apr. 10, 1880	15,500	13,160				10,570
7	Milwaukee	Dec. 31, 1879	26,000	124,865	570,423			28,660
8	Oshkosh	May 1, 1880		4,000				721,288
9	Racine	Mar. 31, 1880		19,600				4,000
10	Watertown	Mar. 31, 1880					11,000	30,600
							2,550	2,550

a The sum of $1,500 was the expenditure for only three months; the poor were supported by the county during the preceding nine months.

OF 7,500 AND OVER: C—EXHIBIT OF EXPENDITURES IN DETAIL.
