WEALTH, DEBT, AND TAXATION.

WEALTH, DEBT, AND TAXATION.

DEBT OF THE WORLD.

Official reports and returns specially furnished this office embrace 84 principal countries, 363 principal and a large number of other foreign cities, and all the departments of France and divisions of the United States. The countries represented contain, exclusive of China, four-fifths of the entire population of the world. Those not represented are mainly parts of the uncivilized interiors of Asia and Africa, where debts, if they exist, are not reported, and consequently the entire indebtedness of the world is herein closely approximated.

NATIONAL AND LOCAL DEBT OF THE WORLD (LESS SINKING FUND), JULY 1, 1890.

National debt of foreign countries	$26, 633, 016, 811
Local debt of foreign countries	1, 689, 740, 252

NATIONAL DEBT OF FOREIGN COUNTRIES.

The accompanying tables show the national indebtedness of the principal foreign countries for the years 1890 and 1880.

In some cases where an increase of indebtedness is shown such increase is due to aid given to private corporations or to the direct expenditures in the construction of railways or other public improvements, the value of which investment may be equal to or in excess of the expenditures therefor, but of which no account can well be taken in a summary of this character.

For purposes of comparison of the debt of any country between the two periods in question it has been found necessary to adopt a like monetary standard of value for each period, and the nominal value in gold of the standard in which the debt is stated has been used whenever known.

The population of the several nations is taken from the best data available and for the dates nearest 1880 and 1890 which it was practicable to obtain.

DEBT OF THE UNITED STATES.

The debt of the United States embraces in the aggregate the national, state, county or parish, municipal, and school district debts of the country; also the debts of irrigation districts in California and the debts of fire districts in Massachusetts. The term municipal, as used, embraces cities, towns, villages, townships, boroughs, and precincts, being all the subdivisions of the county or parish excepting the school districts. The aggregate stated is believed to represent the indebtedness of every political division of the United States excepting that of the poor districts of Pennsylvania, of which no satisfactory information seems obtainable at present.

NATIONAL DEBT.

The debt of the United States admits of a division into two great classes: the debt against which no reserve is held and the debt having an equivalent reserve in cash.

Of the amount of cash held in reserve, that portion held for matured debt and the interest thereon and for other matured interest is not required to be held by law; but for many years a reserve for this purpose has been recognized by the treasury, such debt and interest outstanding being treated as demand obligations of the government, which, like outstanding checks, are liable to be presented at any time.

There is also in the reserve a fund of $100,000,000 gold coin, accumulated in 1878 under the resumption act, for the redemption of legal tender notes on or after January 1, 1879, and since held inviolate for that purpose, and one of $14,465,000, legal tender notes, to secure certificates issued to national banks for clearing-house purposes.

There is also held of gold and silver coin and bullion a reserve representing certificates outstanding redeemable at sight from the deposits held.

The total debt is also divisible into bonded and floating.

STATE DEBT.

The statistics of state debt have been compiled from the reports of state officers, and they show the indebtedness for 1890 and 1880.

The indebtedness includes the amount for which bonds have been issued and are outstanding; the amount due by the state to school or other funds, whether bonds have been issued therefor or not; the arrearages of interest, and all indebtedness of a temporary nature as far as reported. The sinking fund for which credit is given consists only of such an amount of cash, bonds, or stocks as has been specifically set apart by law for the redemption of the debt at its maturity. Several of the states hold bonds and other productive assets, the income of which is applied to general purposes. A full list of such assets follows the detailed statement of state indebtedness.

The amount of the state indebtedness, less sinking fund, herein reported for 1880 is somewhat in excess of that reported by the Tenth Census. This increase arises mainly from including in this statement the indebtedness of the states to their respective school and other funds, which the states, though admitting a liability therefor, had not included in their published debt statements. No objection to thus including them has been received from any state.

SUMMARY, BY GEOGRAPHICAL DIVISIONS, OF THE DEBT LESS SINKING FUND, TOTAL AND PER CAPITA, OF THE SEVERAL STATES, TERRITORIES, AND DISTRICT OF COLUMBIA FOR 1890 AND 1880, WITH DETAILS FOR 1890.

a Tenth Census Reports, volume VII. b Rate not stated.

CASH AND PRODUCTIVE ASSETS OF THE SEVERAL STATES.

The amounts in the tables following have been compiled from official reports and verified in every case by the proper state officer. They show an aggregate of $191,257,750 for 1890. Of this amount, $45,999,213 is for sinking funds, and the remainder is generally held for schools, the income from which in some states furnishes a large portion of moneys expended for educational purposes. The total amount consists of $40,701,463 in cash and $150,556,287 in securities worth, it is thought, a premium in the market. The auditor of Virginia declares that the college funds reported for that state form no part of the assets of the state, but belong to the respective colleges holding them. As these colleges are partially supported by state appropriations, the funds are included in the tables.

The value of land is not included in the tables, except that of some small parcels acquired from foreclosure of mortgages, although several of the states own large tracts of land, generally the gift of the United States government.

The large and increasing value of these funds has given to them no little importance as a factor in the financial condition of the several states where they exist.

Several of the funds report among their productive assets bonds of the state on which they draw interest as on other securities. These bonds are sometimes the ordinary negotiable bonds of the state; sometimes they are obligations issued for the specific use of the funds and are not negotiable, and in other cases the amounts reported represent only obligations of the state implied by the constitution or laws. Nonnegotiable obligations issued to the funds and implied obligations have been treated as floating debt, and in cases where funds have claimed them as part of their assets the obligations have been so reported to show the true condition of the funds.

COUNTY, MUNICIPAL, AND SCHOOL DISTRICT DEBT.

COUNTY DEBT.

The statistics of county indebtedness for 1890 have been compiled from reports received at this office from county officers. They embrace the indebtedness of 2,793 counties, being all in the United States organized on June 1, 1890. The figures for 1880 are from the reports of the Tenth Census without change.

MUNICIPAL DEBT.

The statistics of municipal indebtedness show the amount by counties of indebtedness of every city, village, borough, town, township, fire, water, or irrigation district, precinct, and plantation in the United States, being, as far as known to this office, every political division of the state less than the county having power to contract debt, except the school district and the poor district of Pennsylvania and in detail municipalities having 4,000 or more population.

On June 1, 1890, there were in the United States 26,822 municipalities. Of these places 7,719 reported debt as herein given, 19,089 reported no debt, and 14 failed to make any return. The latter are small places, and probably had no debt to report.

SCHOOL DISTRICT DEBT.

The statistics of school district indebtedness for 1890 have been compiled by this office from special or annual reports of the principal educational officer of each state furnishing such information or from special returns received from school districts, to which 150,000 schedules of inquiry were sent.

Several of the states, having adopted the town or county system for schools, make no separate report of school indebtedness.

The figures for 1880 are from the reports of the Tenth Census.

a The auditor of the board of education of the city of Chicago, in a letter to this office dated November 16, 1891, alleges that this amount includes a duplication of $1,156,500, that amount being reported both in school district and municipal indebtedness; making the true aggregate indebtedness for Cook county $18,724,413 and for the municipal indebtedness of Cook county $12,260,436 in 1880.

b Of this amount $200,000 of county debt, declared illegal in 1888 by the supreme court of the state, is not included in the debt of 1890.

ANNUAL INTEREST CHARGE IN 1890 AS COMPARED WITH THAT OF 1880.

The annual interest charge upon the combined state and local bonded debt in 1880 as shown herein was computed at the rates and upon the amounts shown upon pages 676 and 677 of volume VII of the Tenth Census Reports. Of the total bonded debt therein shown $1,068,979,204 was at specified rates ranging from 2 to 15 per cent; $48,084,144 was unspecified as to rate and $42,198 bore no interest. The average rate upon the $1,068,979,204 was found to be 6.17 per cent, and at this rate the interest upon the amount unspecified was calculated, producing altogether the sum of $68,935,807 as the charge in 1880.

The interest charge in 1890 was computed upon the combined bonded debt of the several states and counties and municipalities of 4,000 or more population at the rates shown in the detail tables of interest rates; upon the bonded debt of municipalities having less than 4,000 population at the average rate found by an examination and classification of the reports from those places, and upon the school district debt less sinking fund at an average rate, estimated and assumed to be the same as the average rate for municipalities having less than 4,000 population, producing altogether the sum of $65,541,776 as the charge in 1890. No account is taken of the floating debt. Some of it is represented by arrearages of interest or called bonds, neither bearing interest, and against the whole amount is the sinking fund of about equal amount, neutralizing to its extent the burden of debt.

Included in the combined bonded debt of the several states and counties and municipalities of 4,000 or more population in 1890 is the sum of $5,333,716 upon which interest has ceased, and in the calculation of the average rate this amount was not included in the principal. The total principal of 1890 also included the sum of $7,873,709, which was unspecified as to rates, and in the computation of the charge the average rate upon amounts specified as to rate was assumed to be the rate which the $7,873,709 bore.

PERCENTAGE OF TOTAL INTEREST CHARGE, BY GEOGRAPHICAL DIVISIONS: 1890 AND 1880.

DIVISIONS.	PERCENTAGE OF TOTAL ANNUAL INTEREST CHARGE ON COMBINED STATE AND LOCAL BONDED DEBT.	
	1890	1880
North Atlantic	47.32	52.85
South Atlantic	13.01	11.92
North Central	26.40	22.73
South Central	9.78	10.35
Western	3.49	2.15

During the 10 years ending in 1890 the total national, state, and local bonded debt has decreased $872,517,137, or 30.86 per cent; the total interest charge has decreased $53,610,409, or 36.19 per cent; the average interest rate has decreased from 5.24 per cent to 4.85 per cent, and the per capita charge has decreased from $2.95 to $1.51, as shown by these figures. For each $1,000 of assessed valuation the total interest charge in 1880 was $8.76; in 1890 it was but $3.81.
