This documentation was prepared within the Data Access and Use Staff, under the direction of James P. Curry, Chief, and Barbara J. Aldrich, Chief of its Technical Information Section. Annette Ralston was the coordinator for this file. It was partially adapted from materials prepared by Thomas Scopp, Delana Kametani, and Marie Pees of Population Division, and Richard Warren and John Murphy of Decennial Planning Division. Support was provided through content review by staff members from Decennial Planning Division and Population Division. Data entry support was provided by Joann Sutton and Mary G. Thomas.

User Note No. 1

Subject: Aggregate Income Fields

Users should be aware that negative numbers may appear in some of the aggregate income fields. They appear most frequently in aggregate nonfarm self-employment and aggregate farm self-employment income fields; however, they may also appear in other aggregate income fields, such as aggregate earnings in 1979 in Tabulation 1, table 11 and Tabulation 2, table 7. These negative income cells will have a "-" in the leftmost position, followed by leading zeros in the aggregate figure.

Subject: Zero-data Cells

In Tabulation 3 (EEO by Age), cells that contain no data are filled with blanks instead of the conventional zeros. Tabulations 1 and 2 do contain zeros.

ABSTRACT

Census of Population, 1980: Special Tabulations for the Department of Defense [machine-readable data file] / prepared by the Bureau of the Census. --Washington: The Bureau [producer and distributor], 1984.

TYPE OF FILE:

Summary statistics.

UNIVERSE DESCRIPTION:

All civilian noninstitutional persons 16 years and over in the United States in tabulations 1 and 2; civilian labor force 16 years and over in tabulation 3.

SUBJECT-MATTER DESCRIPTION:

The file comprises three tabulations. Tabulation 1 (Mobilization Analysis), containing 15 tables, provides data for 503 occupations and specified labor force status groups. Each detailed occupation is cross-classified by age, sex, Spanish origin and race, years of school completed, veteran status, labor force status and hours worked last week, earnings in 1979, work disability status, and public transportation disability status.

Tabulation 2 (Recruitment Analysis), containing 18 tables, features major occupation groups and labor force status by age, sex, Spanish origin and race, years of school completed, veteran status, and earnings in 1979.

Tabulation 3 (EEO by Age), containing 1 table, features detailed occupations (504 categories) for the civilian labor force by sex. This table appears for six age groups for each of the following race/Spanish origin categories: White, not Spanish origin; Black, not Spanish origin; Other races, not Spanish origin; and Spanish origin.

GEOGRAPHIC COVERAGE:

Tabulation	Geographic Areas
1	United States, census regions, census divisions
2	50 States, the District of Columbia, counties, and recruiting areas
3	50 States, the District of Columbia, and counties

TECHNICAL DESCRIPTION:

FILE SIZE:

Tabulation	Number of Logical Records	Record Length (Characters)
1	14,140	8,184
2	3,434	49,104
3	3,188	8,100

Each logical record in tabulations 1 and 2 is divided into a number of 2,046-character segments. Each logical record in tabulation 1 comprises 4 segments and each logical record in tabulation 2 comprises 24 segments. Charts showing the arrangement of tables within segments are provided in the technical documentation. Tabulation 3 is not divided into segments.

FILE SORT SEQUENCE:

Tabulations 1,2, and 3 are sorted by level of geographic hierarchy. For a further explanation of the sort sequence, see the section in the technical documentation entitled "Geographic Coverage."

FILE DESCRIPTION

Provided on the file are occupation data cross-classified by social, economic, and demographic characteristics of the civilian noninstitutional population. The file comprises three tabulations, each containing one or more tables. Tabulation 1, containing 15 tables, provides data for 503 occupations and specified labor force status groups cross-classified by the following characteristics: age, sex, Spanish origin and race, years of school completed, veteran status, labor force status and hours worked last week, earnings in 1979, work disability status, and public transportation disability status.

Tabulation 2, containing 18 tables, features major occupation groups and labor force status by age, sex, Spanish origin and race, years of school completed, veteran status, and earnings in 1979. The first 9 tables provide data for males and the second 9 tables provide data for females. This is different from tabulations 1 and 3 in which data are presented for male and female within the same table.

Tabulation 3, containing 1 table, features detailed occupations by sex. This table appears for six age groups for each of the following race/Spanish origin categories: White, not Spanish origin; Black, not Spanish origin; Other races, not Spanish origin; and Spanish origin.

Geographic Coverage

Tabulation 1. Data are provided for the United States, four census regions, and nine census divisions as shown below.

File Segmentation (Tabulations 1 and 2 only)

Each logical record is divided into segments of 2,046 characters in length. In tabulation 1, each logical record comprises 4 segments and in tabulation 2, each logical record comprises 24 segments. These segments are identified within the geographic information section repeated at the beginning of each segment. The following charts show the arrangement and beginning character location of tables and geographic information within the segments.

Computation of Medians

Minimum and maximum values have been determined for each computed median. Any computed median falling outside these ranges will be set to these values. Listed below are the ranges for each type of median.

1. Median Years of School Completed (1 implied decimal)

Value	Description
000000079	Median years of school completed was determined to be 8 years or less and set to 7.9.
000000171	Median years of school completed was determined to be 17 years or more and set to 17.1.

2. Median Earnings (Median rounded to the nearest dollar; median calculated only for persons with income.)

000004999	Median earnings was determined to be $5,000 or less and set to $4,999.
000050001	Median earnings were determined to be $50,000 or more and set to $50,001.

SUPPRESSION

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions to make sure that its public data do not disclose information about particular individuals or housing units; therefore, the Bureau suppresses tabulations of characteristics for very small groups of people or housing units.

Suppression of Population Characteristics. Characteristics of persons (e.g., age) are shown only if there are 30 or more persons in the geographic area. When the geographic area being summarized has 30 or more persons, no suppression of population characteristics will occur except possibly when tables are cross-classified by race or Spanish origin.

Suppression of Tables Cross-Classified by Race or Spanish Origin. Population characteristics cross-classified by race or Spanish origin are subject to an additional level of scrutiny. This level requires that the 30 person criteria stated above be applied to each race or Spanish origin group in the geographic area being summarized.

Programming with Suppression. Suppressed data cells contain zeroes. To distinguish between zeroes as suppression and zeroes as valid data, occurrences of suppression are identified by a flag field(s) in the geographic identification portion of each logical record. Programmers developing software should include procedures to check for a 1 in this field(s) and, if necessary, to flag the output of any cumulation which includes one or more suppressed fields.

GLOSSARY

The following definitions pertain to data items included in the special tabulations prepared for the Department of Defense and were taken, with slight modification, from the 1980 Census Users' Guide.

AGE. Age at last birthday, i.e., number of completed years from birth to April 1, 1980, based on replies to a question on month and year of birth. This item was asked on a complete-count basis.

Because of the central importance of the data on age, the question contains redundancies. The age entry on the basic tape record is derived from the FOSDIC entries of quarter and year of birth. For those persons who do not provide this information but who do provide "age at last birthday," the census enumerator or clerk uses an equivalency table to mark the appropriate FOSDIC circles. The item "age at last birthday" is used only secondarily because of the tendency of some people, in reporting their ages, to round off to "0" or "5" (and to report even rather than odd numbers). The write-in entries of month and year of birth are requested because some people have difficulty with (and therefore skip) the FOSDIC marking system in this question.

Median age. Calculated as the value which divides the age distribution into two equal parts, one-half the cases falling below this value, one-half above. Median age is computed from the age intervals or groupings shown in the particular tabulation, and thus a median based on a less detailed distribution may differ slightly from a corresponding median for the same population based on a more detailed distribution. If the median falls in the terminal category, e.g., 75 years and over, the median is shown as the initial age of the category with a plus sign.

Limitations: In previous censuses, undercoverage of the population has been associated with age. Young adults, especially Black males, were missed at a higher rate than other segments of the population. The same is true of centenarians.

Historical comparability: Age data have been collected in each census since 1790. Counts in 1970 and 1980 for persons 100 years old and over were substantially overstated.

COUNTY. The primary political and administrative subdivision of a State. In Louisiana, such divisions are called parishes. In Alaska 23 boroughs and "census areas" are treated as county equivalents for census purposes. Several cities (Baltimore, Maryland; St. Louis, Missouri; Carson City, Nevada; and 41 Virginia cities) are independent of any county organization, and thereby constitute primary divisions of their States and are treated the same as counties in census tabulations.

County boundaries are shown on most census maps. A 3-digit Federal Information Processing Standards (FIPS) county code identifies each county uniquely within State. Counties are numbered in alphabetic sequence, with independent cities numbered separately at the end of the list.

There are 3,137 counties and county equivalents included in this file.

Historical comparability: A number of changes have occurred to county boundaries since 1970. A new set of county equivalents (boroughs and census areas) has been defined for Alaska, and in some cases these county equivalents differ considerably from the census divisions recognized for 1970. In addition, there are minor changes in counties for South Dakota and Hawaii. In Virginia, county boundaries have changed as a result of the creation of new independent cities and annexations by independent cities. Most other changes represent minor adjustments of the boundaries between counties. Those counties which changed boundaries between 1970 and 1980 are noted in footnotes at the end of table 4 of the PC80-1-A report for each State.

DISABILITY. Presence of a physical, mental, or other health condition which has lasted 6 or more months and which limits or prevents a particular type of activity. Two types of disability were cited on the questionnaire--work disability, which is tabulated for noninstitutional persons 16 to 64 years old; and public transportation disability, which is tabulated for noninstitutional persons 16 to 64 years old and for noninstitutional persons 65 years old and over. This item was asked on a sample basis.

With a work disability. Persons who have a health condition which limits the kind or amount of work or prevents working at a job or business. A person is limited in the kind of work he or she can do if the person has a health condition which restricts his or her choice of jobs. A person is limited in amount of work if he or she is not able to work at a full-time (35 or more hours per week) job or business. Within this category, tabulations are frequently provided on the number of persons with a work disability who are not in the labor force.

With a public transportation disability. Persons who have a health condition which makes it difficult or impossible to use buses, trains, subways, or other forms of public transportation.

Limitations: The disability item was included in the 1980 census because of the need for local area data on the relative prevalence of work and public transportation disabled persons. The decision to include the item was made even though there was test evidence that there was likely to be a problem with data reliability. Specifically, an analysis of the 1976 National Content Test, which collected disability information in both an original interview and a subsequent reinterview, showed that the indexes of inconsistency for responses to the work and public transportation disability questions were in the moderate to high range.

Historical comparability: The 1970 disability item was concerned only with work disability and did not attempt to identify persons with a public transportation disability. The 1970 item did not contain a clause restricting disability to those resulting from a health condition which had lasted 6 or more months; however, it did contain a separate question about the duration of the disability.

DIVISION (CENSUS GEOGRAPHIC). A census geographic division is one of the nine groups of States that are subdivisions of the four census geographic regions of the United States. Census geographic divisions are identified by a 1-digit code that is also the first digit of the 2-digit census geographic code for each State in the division.

Historical comparability: Census divisions have remained unchanged since the 1910 census, except for the expansion of the Pacific Division to include Alaska and Hawaii.

EARNINGS. The sum of wage or salary income and net self-employment income from nonfarm and farm sources. Earnings are those sources of income most appropriately interrelated with labor force characteristics such as hours and weeks worked in 1979 or occupation.

HOURS WORKED LAST WEEK. The number of hours actually worked at all jobs during the reference week, ascertained for all persons who reported that they worked during that week. Lunch hours, sick leave, and vacation leave are excluded, but overtime or extra hours worked in the reference week are included. Therefore, the statistics do not necessarily reflect the number of hours usually worked or the scheduled number of hours. This item was asked on a sample basis.

Limitations: The number of persons who worked only a small number of hours is probably understated since such persons sometimes consider themselves as not working. The occurrence of Passover and Good Friday in the week of April 1, 1980, should not have affected the number of reported hours worked since the reference week for most persons was the week before April 1. For those persons who completed their forms the following week, 1 or more days of the reference week may have been observed as a holiday, reducing the number of hours worked. The net effect of these holidays on hours worked statistics was probably not major nationwide, but may need to be considered in local areas where these holidays are widely observed.

LABOR FORCE STATUS. Persons 16 years old and over were classified as to their status in the labor force based on replies to several questions relating to work activity and status during the reference week. These items were asked on a sample basis.

Data on labor force status refer to the calendar week prior to the date on which respondents completed their questionnaires or were interviewed by enumerators. Since the week of enumeration was not the same for all persons, the reference week for labor force data is not entirely uniform. For many persons, however, the reference week for answering the 1980 census employment questions was the last week in March, 1980.

Labor force. Members of the Armed Forces and the civilian labor force as defined below.

Armed Forces. Persons 16 years old and over on active duty in the Army, Air Force, Navy, Marine Corps and Coast Guard, (indicated in responses to the question on industry). Members of the merchant marine and civilian employees of the Department of Defense are not members of the Armed Forces. Service in a National Guard or reserve unit for short periods of active duty for training does not count as active duty in the Armed Forces. Armed Forces members are not included in this file.

Civilian labor force. Employed and unemployed civilians.

Employed. Civilians 16 years old and over who were either (a) "at work"--those who did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business; or (b) "with a job but not at work"--those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather,

industrial dispute, vacation, or other personal reasons. Excluded from the employed persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations.

Unemployed. Civilians 16 years old and over who were neither "at work" nor "with a job, but not at work" and who were:

a) looking for work during the last 4 weeks, and b) available to accept a job.

Examples of jobseeking activities are: (1) registering at a public or private employment office, (2) meeting with prospective employers, (3) checking with friends or relatives, (4) placing or answering advertisements, (5) writing letters of application, and (6) being on a union or professional register.

Also included as unemployed are persons who did not work at all during the reference week and were waiting to be called back to a job from which they had been laid off.

The concept of experienced unemployed is discussed below under Experienced Civilian Labor Force.

Unemployed, no civilian work experience since 1975. Persons are classified as unemployed with no civilian work experience since 1975 if they reported themselves as unemployed in 1980 and one of the following: (1) their last job since 1975 was in the Armed Forces; or (2) they last worked in 1974 or earlier; or (3) they reported that they had never worked.

In addition to the above classification, the concept of Experienced Civilian Labor Force appears in certain detailed tabulations.

Experienced Civilian Labor Force. This file includes employed persons and those unemployed persons who have worked at any time in the past, i.e., "experienced unemployed." Excluding those persons in the category "unemployed, no civilian work experience since 1975," this file essentially defines the experienced civilian labor force.

Comparability with data from other sources. Because employment data from the census are obtained from respondents in households, they differ from statistics based on reports from individual business establishments, farm enterprises, and certain government programs. Persons employed at more than one job are counted only once in the census and are classified according to the job at which they worked the greatest number of hours during the reference week. In statistics based on reports from business and farm establishments, persons who work for more than one establishment may be counted more than once. Moreover, other series, unlike those presented here, may exclude private household workers, unpaid family workers, and self-employed persons, but may include workers less than 16 years of age.

Historical comparability: In 1940, 1950, and 1960, labor force data were published for persons 14 years old and over. In 1970, most labor force data

were for persons 16 years old and over to comply with the official Government definition of employed and unemployed instituted in 1967, although data on 14- and 15-year olds were furnished in 1970 to provide a comparability bridge with earlier censuses.

OCCUPATION. The kind of work the person was doing at a job or business during the reference week or, if not at work, at the most recent job or business if employed since 1975. Persons working at more than one job were instructed to describe the one at which the person worked the most hours during the reference week. Occupation is most frequently tabulated for employed persons 16 years old and over, and less often for the experienced civilian labor force, which includes both employed and experienced unemployed 16 years old and over. Occupation data were also collected but are not tabulated for persons not currently in the labor force who have worked since 1975. Occupation is not determined for persons in the Armed Forces. These data were collected on a sample basis.

The write-in responses to questions 29a and 29b were taken together to assign the respondent to one of 503 occupation categories, coded by specially trained industry and occupation coders in census processing offices. Only the code, i.e., none of the written-in information, is retained on census basic records and public-use microdata. Census occupation categories are fully defined in the Classified Index of Industries and Occupations, PHC80-R3. (Persons wishing to use the census system in coding other data bases may use the Alphabetical Index of Industries and Occupations, PHC80-R4.)

Relation to Standard Occupational Classification. The 503 occupation categories generally are based on the Standard Occupational Classification (SOC) system, originally issued in 1977 by the Office of Federal Statistical Policy and Standards and revised in 1980. One of the major purposes of the SOC is to promote uniformity and comparability in the presentation of occupational data collected by various agencies. Public-use microdata documentation and other references will define the relationship between the 3-digit census codes and the revised 4-digit SOC codes.

Summary and major occupation categories are as follows:

Managerial and professional specialty occupations:
- Executive, administrative, and managerial occupations
- Professional specialty occupations

Technical, sales, and administrative support occupations:
- Technicians and related support occupations
- Sales occupations
- Administrative support occupations, including clerical

Service occupations:
- Private household occupations
- Protective service occupations
- Service occupations, except protective and household

Farming, forestry, and fishing occupations

Precision production, craft, and repair occupations

Operators, fabricators, and laborers:
- Machine operators, assemblers, and inspectors
- Transportation and material moving occupations
- Handlers, equipment cleaners, helpers, and laborers

This file shows major occupation categories and detailed occupations. The detailed census categories, and the Standard Occupational Classification definition for each are listed in Appendix A.

Historical comparability: Occupation has been asked in each census since 1850. The 1980 occupation question differs from its 1970 counterpart primarily by omitting a request for the respondent's job title. Because this information sometimes proved misleading, it was dropped for 1980.

The major difference in occupation data for 1970 and 1980 stems from the adaptation of census occupation coding to the new Standard Occupational Classification system, first issued in 1977. While many of the broad categories observed in the 1980 scheme have been designed to offer a general measure of compatibility with many 1970 categories, the principles governing the classification and many of the detailed categories have been altered substantially. Reference materials on the relationships of 1970 and 1980 occupation classifications are being prepared. For more information, contact Population Division, Bureau of the Census.

PUBLIC TRANSPORTATION DISABILITY. See DISABILITY

RACE. All persons were asked to identify themselves according to the following race categories on the 1980 questionnaire: White, Black or Negro, American Indian, Eskimo, Aleut, Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, Samoan, and Other. The "Other" category includes Malayan, Polynesian, Thai, and other groups not included in the specific categories listed on the questionnaire. This item was asked on a complete-count basis.

The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-identification, the data represent self-classification by people according to the race with which they identify themselves. For persons with parents of different races who could not provide a single response to the race question, the race of the person's mother was used; however, if a single response could not be provided for the person's mother, the first race reported by the person was used.

Limited edit and review operations were performed during the complete-count operations; write-in responses were reviewed in an attempt to classify entries to specific categories, where appropriate. For instance, if the "Other" circle was marked with a write-in entry "Caucasian," then the response was recoded as White. (Additional examples are noted below.) However, all such cases were not identified in the complete-count processing. During the processing of sample questionnaires, a more thorough review and additional editing was done to resolve inconsistent or incomplete responses. Also, during the processing of

sample questionnaires, write-in entries for the "Other" category were assigned specific codes, which is included on the person's basic record in the census sample detailed tape files.

Asian and Pacific Islander write-in entries, such as Indo-Chinese, Cambodian, or Polynesian, included in the "Other" category during 100-percent processing, are collectively tabulated and shown as "Other Asian and Pacific Islander" in the census sample tabulations; this group, "Other Asian and Pacific Islanders," will be included in the broader Asian and Pacific Islander category in all sample tabulations by race. This shift of "Other Asian and Pacific Islander" entries out of the "Other races" category in sample tabulations and the recoding of write-in entries in the "Other" category to specific categories where appropriate will affect the comparability between complete-count and sample data for some groups.

White. Persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but entered a response such as Canadian, German, Italian, Lebanese, or Polish. (Persons who did not classify themselves in one of the specified race categories but wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "Other races" category; in the 1970 census most of these persons were included in the "White" category.)

Black. Persons who indicated their race as Black or Negro, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Black Puerto Rican, Haitian, Jamaican, Nigerian, or West Indian.

American Indian, Eskimo, and Aleut:

American Indian. Persons who indicated theri race as "Indian (American)" or who did not indicate a specific race category but reported the name of an Indian tribe.

Eskimo. Persons who indicated their race as "Eskimo."

Aleut. Persons who indicated their race as "Aleut."

Asian and Pacific Islander. In complete-count tabulations, includes all of the groups listed below except "Other Asian and Pacific Islander." In sample tabulations, it includes all of the groups listed below.

Japanese. Persons who indicated their race as Japanese, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as Nipponese or Japanese American.

Chinese. Persons who indicated their race as Chinese, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Cantonese, Formosan, Taiwanese, or Tibetan.

Filipino. Persons who indicated their race as Filipino, as well as persons who did not classify themselves in one of the specific race

categories, but entered a response such as Filipino American or Philippine.

Korean. Persons who indicated their race as Korean, as well as persons who did not classify themselves in one of the specific race categories, but reported a response such as Korean American.

Asian Indian. Persons who indicated their race as Asian Indian, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Bengali, Bharati, Dravidian, East Indian, Goanese, Hindu Indic, Kashmiri, or South Asian.

Vietnamese. Persons who indicated their race as Vietnamese, as well as persons who did not classify themselves in one of the specific race categories, but reported a response such as Vietnam.

Hawaiian. Persons who indicated their race as Hawaiian. In the State of Hawaii, all persons who reported "Part-Hawaiian" were included in this category.

Guamanian. Persons who indicated their race as Guamanian, as well as persons who did not classify themselves in one of the race categories, but reported an entry such as Chamorro or Guam.

Samoan. Persons who indicated their race as Samoan, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as American Samoan or Western Samoan.

Other Asian and Pacific Islander. In sample tabulations only, persons who reported Cambodian, Hmong, Indo-Chinese, Laotian, Pakistani, Polynesian, Fiji Islander, Tahitian, Thai, or similar responses. Census basic records include codes for over 50 separate race groups within this category.

Other (Race n.e.c. "not elsewhere classified"). Includes all other races (except "Other Asian and Pacific Islander" groups) which were not included in the specific categories listed on the questionnaire. For example, persons reporting in the "Other" race category and providing write-in entries such as Eurasian, Cosmopolitan, Inter-racial, or a Spanish origin group (e.g., Mexican, Cuban, or Puerto Rican) were included in Race, n.e.c. Persons who did not report a specific race but wrote in entries such as "Mexican," "Cuban," "South American," "Chicano," or "La Raza" remained in the "Other races" category for complete-count tabulations, and in the "Race, n.e.c." category for sample tabulations. (STF 3, STF 4, and public-use microdata samples separately identify, as a subcategory within "Race, n.e.c.," persons who wrote in an entry implying Spanish origin. Such entries are not necessarily consistent with responses in the Spanish origin question.)

Limitations: In previous censuses, undercoverage of the population has been associated with race. The 1970 census missed Blacks at a much higher rate than Whites. The Bureau has not prepared undercoverage rates for races other than White or Black, because vital records and other sources of relevant statistics do not consistently distinguish among other races.

Historical comparability: Questions on "race" or "color" have been asked in each census since 1790. In 1970, when persons with parents of different races were in doubt as to their classification, the race of the father was used. In 1980, the race of the mother was used for persons who could not provide a single response. The 1970 category "Negro or Black" has been retitled "Black or Negro." Individual categories for Vietnamese, Asian Indian, Guamanian, and Samoan have been added. In 1970, the categories Eskimo and Aleut appeared only on questionnaires used in Alaska; they were replaced by Hawaiian and Korean in all other States. In 1980, all four categories appeared on the questionnaire. As a result of the additions, the 1980 questionnaire had 14 specific race categories instead of 8 as in 1970.

In 1970, persons who did not report a specific race but wrote in Hispanic categories such as "Mexican," "Puerto Rican," or "Cuban" in the race question were assigned to White; for 1980 these persons remain in the "Other races" category.

REGION (CENSUS GEOGRAPHIC). A large group of States which is a first-order subdivision of the United States for census purposes. The four regions--Northeast, North Central, South, and West--are identified by a 1-digit code on the tape file. Regions are divided into census divisions. The census regions have no relationship to the 10 Standard Federal Administrative Regions.

SCHOOL YEARS COMPLETED. Data on years of school completed are derived from two questions, one identifying the highest grade attended in regular school, the second determining whether the respondent finished the grade specified. These data were collected on a sample basis.

Those persons who passed a high school equivalency examination (such as GED) were marked "12" under the highest grade attended (if they had not completed or were not enrolled in a higher grade). Schooling received in foreign schools was to be reported as the equivalent grade or year in the regular American school system.

The number tabulated in each category of years of school completed includes (a) persons who reported that they had attended the indicated grade and had finished it, (b) those who had attended but did not complete the next higher grade and (c) those still attending the next higher grade. Tabulation of years of school completed in this file is restricted to persons 16 years old and over in the civilian labor force. Tabulations include persons in school as well as those who have completed their schooling. Years of school completed is reported as follows:

Elementary:	0 to 4 years
	5 to 7 years
	8 years
High School:	1 to 3 years
	4 years
College:	1 to 3 years
	4 or more years
	More than 4 years

High school graduates. Persons who have completed 4 years of high school (grade 12) or any higher level of education. Therefore, a count of high school graduates from the breakdown illustrated above, includes the categories "High school: 4 years," "College: 1 to 3 years," and "College: 4 or more years."

Median school years completed. Calculated as the value which divides the population in half. Years-of-school-completed statistics are converted into a continuous series: the first year of high school becomes grade 9, the first year of college, grade 13, etc.

Persons who have completed a given year are assumed to be evenly distributed from .0 to .9 of the year. For example, persons who have completed the 12th grade are assumed to be evenly distributed between 12.0 and 12.9. Note that this assumption is different than that applicable to other discrete variables.

Actually, at the time of enumeration, most of the enrolled persons had attended at least three-fourths of a school year beyond the highest grade completed, whereas a large majority of persons who were not enrolled had not attended any part of a grade beyond the highest one completed. The effect of the assumption is to place the median for younger persons slightly below, and for older persons, slightly above, the true median.

Historical comparability. Questions on years of school completed have been asked in censuses since 1940, as a replacement for the literacy question which had been asked from 1840 to 1930.

SEX. Ascertained on a complete-count basis.

Historical comparability: A question on the sex of individuals has been asked of the total population in every census.

SPANISH ORIGIN. Determined by a complete-count question which asks respondents to self-identify whether they are of Spanish origin or descent. If, when interviewed, the person reported a multiple origin and could not provide a single origin, the origin of the person's mother was used. If a single response was not provided for the person's mother, the first reported origin of the person was used.

Counts of the population by Spanish origin in complete-count tabulations are provisional. Final counts for Spanish origin will be determined after the sample data have been processed. The sample counts will first appear on tape in STF 3 and in print in Characteristics of the Population, General Social and Economic Characteristics, PC80-1-C reports.

Persons marking any one of the four "Spanish" categories, i.e., Mexican, Puerto Rican, Cuban, or other Spanish, are collectively referred to as "persons of Spanish origin."

In certain tabulations, persons of Spanish origin are further classified by type:

Mexican. Persons who indicated "Mexican, Mexican-American, Chicano," or wrote in an entry such as "La Raza."

Puerto Rican. Persons who indicated "Puerto Rican" or wrote in an entry such as "Boricua."

Cuban. Persons who indicated "Cuban."

Other Spanish. Persons who filled the circle for "other Spanish/Hispanic"; or persons who wrote in an origin or descent associated with Spain, the Dominican Republic, or any Central or South America country except Brazil or a nonspecific Spanish group such as "Spanish surnamed" or "Spanish speaking."

For a discussion of the reporting in the Spanish-origin item, see the 1980 census Supplementary Report, "Persons of Spanish Origin by State: 1980" (PC80-S1-7).

Historical comparability: The Spanish-origin question was asked on a 100-percent basis for the first time in 1980. A similar question was asked on the 1970 5-percent sample questionnaire. For 1980, the category "No, not Spanish/Hispanic" appeared first (the corresponding category appeared last in 1970). Also, the terms "Mexican-American" and "Chicano" are added to the term "Mexican." The category "Central or South American," included in 1970, was dropped.

Although a question on Spanish origin was included in 1970, it was not the major identifier used to classify the Hispanic population in the 1970 census as it is in 1980. Depending on the section of the country, 1970 census data for "Persons of Spanish Heritage" were variously defined as "Persons of Puerto Rican Birth or Parentage" (in New York, New Jersey, and Pennsylvania), as "Persons of Spanish Language or Spanish Surname" (in Arizona, California, Colorado, New Mexico, and Texas), and as "Persons of Spanish Language" (in the remaining 42 States and the District of Columbia). "Spanish language" referred to those persons who in 1970 reported Spanish as their mother tongue, as well as persons in families in which the household head or spouse reported Spanish as his or her mother tongue.

STANDARD METROPOLITAN STATISTICAL AREA (SMSA). A large population nucleus and nearby communities which have a high degree of economic and social integration with that nucleus. Each SMSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic units and should be substituted for "counties" where counties are cited below. SMSA's are designated by the Office of Management and Budget.

Data products from the 1980 census will report on 323 SMSA's: (1) 287 defined before January 1,1980 (including 4 in Puerto Rico); and (2) an additional 36 (including one in Puerto Rico) established as a result of 1980 census population counts. (The EEO file has no data for Puerto Rico.) The 36 new SMSA's were designated when 1980 counts showed that they met one or both of the following criteria:

1. Included a city with a population of at least 50,000 within its corporate limits, or

2. Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total SMSA population of at least 100,000 (or, in New England, 75,000).

An SMSA includes a city and, generally, its entire UA and the remainder of the county or counties in which the UA is located. An SMSA also includes such additional outlying counties which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or counties. Specific criteria governing the definition of SMSA's recognized before 1980 are published in Standard Metropolitan Statistical Areas: 1975, issued by the Office of Management and Budget.

With two exceptions, each SMSA has one or more central cities, up to a maximum of three, and the names of these cities form the title of the SMSA. The Nassau-Suffolk, NY, SMSA has no central city, and the title of the Northeast Pennsylvania SMSA does not contain the names of its three central cities: Scranton, Wilkes-Barre, and Hazleton.

SMSA's are identified by a FIPS 4-digit numeric code, which follows the alphabetic sequence of SMSA names. SMSA's are outlined on small-scale maps in several 1980 report series. SMSA data appear in most 1980 census publications and summary tape files. Many SMSA's cross State boundaries, and reports in several series provide summaries for the State parts of multi-State SMSA's, as well as SMSA totals. Summary tape files present data only for State parts of SMSA's, except for the "national" files: STF's 1C, 2C, 3C, and 4C.

Historical comparability: A comparison of 1970 and 1980 census products reveals two types of changes in metropolitan territory. First, 69 new SMSA's were created from previously nonmetropolitan territory: 36 were defined in 1981 based on 1980 population counts and 33 were defined between 1973 and 1979 based on current population estimates. (An additional SMSA--Rapid City, SD--was provisionally recognized based on population estimates, but it did not qualify according to 1980 census data.)

The second component of change to metropolitan territory between 1970 and 1980 was the redefinition of many of the SMSA's which were recognized in 1970 census tabulations. Of the 247 1970 SMSA's, 101 were redefined in 1973 based on 1970 census commuting data, most by the addition of 1 or more counties (or towns and cities in New England). In addition, one SMSA was redefined by the addition of one area and the deletion of another (Wichita Falls, Texas), one was subdivided (Nassau-Suffolk SMSA was created from a part of the New York SMSA), four pairs of SMSA's were combined into single SMSA's (for example, Dallas-Fort Worth, Texas), and four SMSA's lost area that was added to other SMSA's. In addition, the names of several SMSA's were changed in 1973, one in such a way that the SMSA code also changed (San Bernardino-Riverside-Ontario to Riverside-San Bernardino-Ontario, California).

Since SMSA's are always defined in terms of whole counties (towns or cities in New England) for which extensive data are available, users can usually compile figures for comparisons over time.

In 1982 or 1983, SMSA boundaries will be reevaluated using 1980 census data on commuting, labor force, population density, type of residence, and population growth, according to new criteria spelled out in the Federal Register, January

3, 1980 (vol. 45, no. 2, pt. VI). At that time, new outlying counties may be added or existing ones deleted, some area titles will be changed and new central cities designated, some areas may be consolidated, and a few new SMSA's may be created. Further, the term "standard metropolitan statistical area" will be shortened to "metropolitan statistical area" (MSA). These changes will not affect publication of 1980 census data for SMSA's.

STATE. A major political unit of the United States. The District of Columbia is treated as a State-equivalent in all 1980 census data series.

States are identified by a 2-digit FIPS code which follows the alphabetic sequence of State names (including the District of Columbia), and by a 2-digit census geographic State code, the first digit of which identifies the census division of which the State is a part.

Historical comparability: There have been no significant changes to State boundaries in the last decade.

UNITED STATES. This designation includes the 50 States and the District of Columbia.

VETERAN STATUS. All civilians 16 years and over are classified on the basis of whether they have served in the Armed Forces of the United States, regardless of whether their service was in war or peacetime. This item was asked on a sample basis. The question was also asked of 15-year-olds and of persons currently in the Armed Forces, but these groups are excluded from the universe of tabulations.

Veteran. A person who has served but is not currently serving in the Armed Forces of the United States.

Nonveteran. Any other civilian, i.e., a person who has never served in the Armed Forces of the United States.

Historical comparability: Questions providing detailed data on veteran status have been asked since 1960. For 1980, the question included, for the first time, women as well as men.

WORK DISABILITY STATUS. See DISABILITY.

HOW TO USE THE DATA DICTIONARY

The data dictionary contains complete information regarding geographic codes, table information, and a detailed table layout. Information provided in both the geographic and table identification portions of the file is discussed below.

Geographic Identification

The first line of each geographic identification variable gives the name, size/scale, begin position, relative begin position, data type, and the variable description. Following those items, on subsequent lines, are any applicable notes and value codes. Each of these items is defined below.

1. Name. This is an arbitrarily assigned 8-character identifier. It may be a mnemonic such as "STATE" or "EDNUMBER", or a sequential identifier such as "TAB1", "TAB2", etc.

2. Size/Scale. The size of a data item is given in characters.

3. Begin. This is the location in the data record of the first character of the data item.

4. Relative Begin. This value indicates the beginning location of a data item within a specified segment of files with segmented records.

5. Data Type. The data type "A" indicates that the data item is represented by an alphabetic or numeric code.

6. Description. Following the Data Type is a description of the data item. This heading is not labeled on the data dictionary. This section provides any relevant notes or footnote references. In addition, any value codes necessary for the data item are listed and labeled here.

Table Identification

The documentation of tables begins with the name, size/scale, begin position, relative begin position, data type, and the number of cells. This information is followed by the table title, applicable suppression flags, universe definition, applicable footnotes, stratifier identification, and a listing of the cells. These items are defined on the following page.

The size/scale information is the same as defined above for geographic identification. Any scale value identified here applies to all cells of the table.

This item identifies the location of each cell in the table.

The symbol "N" denotes that an actual figure is provided. Data can be summarized or aggregated.

NAME	SIZE/ SCALE	BEGIN	RELATIVE BEGIN	DATA TYPE	NUMBER OF CELLS
TABLE 2 (TAB2)	9	3598	1552	N	180

This is an 8-character identifier of the table number. The convention used here, shown in parentheses, is to follow "TAB" with the table number, which identifies the data item as a table for CENSPAC. The "TABLE 2" is generated by the CENSPAC Documentor program.

This item identifies the location of the first cell in the table relative to the beginning of the current segment.

This item gives the total number of data items, or cells, in the table. The number of cells is the product of the number of categories in each stratifier in the table.

Table Title. The title of the table identifies the stratifiers used in the table, and the number of categories in each stratifier. For example, this title indicates that there are two categories of veteran status, six categories of age, and fifteen categories of labor force status and occupation identified in the table. Additional information pertaining to the table may follow the table title.

TAB2
Veteran Status (2) By Age (6)
By Labor Force Status And Occupation (15)

Suppression Flags. This section of the documentation identifies applicable suppression flags and the cells to which they apply.

SUPFLG01 applies to all cells

Universe. The universe identifies the unit of observation for the table. For example, the unit of observation in this table is Civilian Noninstitutional Persons 16 Years And Over.

Universe: Civilian Noninstitutional Persons 16 Years And Over

Footnotes. This section refers to footnotes listed at the end of the data dictionary which apply to the table.

SEE FOOTNOTES 2 3 4 5

Stratifiers. This section lists the stratifiers used in the table in the order in which they appear on the data tape. For example, this table begins with the first category of veteran status cross-classified by the first category of age cross-classified by the 15 categories of labor force status and occupation. This is followed by the remaining age categories cross-classified by the 15 categories of labor force status. The age and labor force and occupation categories are repeated for the second category of veteran status. Headers representing stratifiers are followed by a colon and are not counted as cells.

04 Each sample person and housing unit was assigned a weight as the result of a complex ratio estimation procedure. Sample housing units were assigned one weight each and sample persons were assigned two types of weights. The first weight for persons applies to sample data except Place of Work, Travel Time to Work, and Migration (i.e., Residence in 1975) tabulations; this weight was assigned to all sample persons. The second weight for persons, which applies to Place of Work, Travel Time to Work, and Migration data, was assigned to those sample persons who were included in the Place of Work and Migration coding operation. These weights vary from person to person and from housing unit to housing unit, but on the average they are approximately equal to the inverse of each records sample selection probability. The tabulations in this file are based on summing the weights of the appropriate persons or housing units relating to the tabulation. For specified aggregates, indicated below, the characteristic data are multiplied by the weight; for example, in aggreagate income for persons the amount of in come is multiplied by the weight. In medians, the weights are brought to bear indirectly through the distribution used to calculate the measure. For family and household tabulations (population type), only the weights of the householder are used. For subfamily tabulations, the weights used are those assigned to the subfamily reference person (i.e., the person who is the equivalent of a householder for the subfamily). The following is a listing of the weights used in producing each tabulation:

Person Weights -- Tabulations 1 through 15.

Note: Tabulation 11 is an aggregate.

05 See appendix C2 for definition of inmate status (noninstitutional and institutional) and for type of group quarters codes.

06 For data tabulated on a 100-percent basis, includes all persons in the category "Other." For data tabulated from the sample, excludes those persons who have a write-in entry of an Asian and Pacific Islander group in the "Other" category.

07 This aggregate, along with the relevant count, will permit the computation of a mean. For example, the aggregate value for earnings in 1979 will yield the mean value when divided by a count of persons.

08 "Work Disability Status" is based on responses to the questionnaire item: "limits the kind or amount of work this person can do at a job."

09 "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

FOOTNOTE SECTION

01 Each sample person and housing unit was assigned a weight as the result of a complex ratio estimation procedure. Sample housing units were assigned one weight each and sample persons were assigned two types of weights. The first weight for persons applies to sample data except Place of Work, Travel Time to Work, and Migration (i.e., Residence in 1975) tabulations; this weight was assigned to all sample persons. The second weight for persons, which applies to Place of Work, Travel Time to Work, and Migration data, was assigned to those sample persons who were included in the Place of Work and Migration coding operation. These weights vary from person to person and from housing unit to housing unit, but on the average they are approximately equal to the inverse of each records sample selection probability. The tabulations in this file are based on summing the weights of the appropriate persons or housing units relating to the tabulation. For specified aggregates, indicated below, the characteristic data are multiplied by the weight; for example, in aggregate income for persons the amount of income is multiplied by the weight. In medians, the weights are brought to bear indirectly through the distribution used to calculate the measure. For family and household tabulations (population type), only the weights of the householder are used. For subfamily tabulations, the weights used are those assigned to the subfamily reference person (i.e., the person who is the equivalent of a householder for the subfamily). The following is a listing of the weights used in producing each tabulation:

Person weights -- Tabulations 1 through 9.

NOTE: Tabulation 7 is an aggregate.

02 See appendix C1 for definition of labor force status categories.

03 See appendix C3 for occupation codes.

04 Code ranges may include codes which are not used.

05 See appendix C2 for definition of inmate status (noninstitutional and institutional) and for type of group quarters codes.

06 For data tabulated on a 100-percent basis, includes all persons in the category "Other." For data tabulated from the sample, excludes those persons who have a write-in entry of an Asian and Pacific Islander group in the "Other" category.

07 This aggregate, along with the relevant count, will permit the computation of a mean. For example, the aggregate value for earnings in 1979 will yield the mean value when divided by a count of persons.

08 "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," Korean," "Asian Indian," "Vietnamese," Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

Detailed Occupation Categories

NOTE: The "Record #'s" below refer to the record numbers on the tabulations. The "1980 Codes" refer to the categories assigned in the 1980 Census Classification System. The numbers in parentheses after the category titles refer to the 1980 Standard Occupational Classification (SOC) code equivalents. "Pt." means "Part." "N.e.c." means "Not elsewhere classified." "ECLF" means "experienced civilian labor force who worked since 1975."

APPENDIX C1

1980 CENSUS LABOR FORCE STATUS CATEGORIES

Description	Code
In labor force:	
Civilian labor force:	
Employed:	
At work	1
With a job, but not at work	2
Unemployed	3
Armed Forces:	
At work	4
With a job, but not at work	5
Not in labor force	6

NOTE: a. For tabulations of Place-of-Work items, the concept "workers" is defined as code 1 and code 4 above.

b. For the derived measure, "Nonworkers per 100 workers," the denominator "worker" is defined as codes 1, 2, 3, 4, and 5 above. The numerator is defined as code 6 plus all persons under 16 years of age.

c. The concept "Workers in 1979" does not refer to the above codes.

d. Civilians 16 years and over are defined as codes 1, 2, 3, and 6 above.

The following applies only to Special Tabulation 1 (codes 4 and 5 are excluded from this tabulation):

e. "Experienced civilian labor force who worked since 1975" is defined as codes 1 and 2 and also includes code 3 if year last worked was an entry of worked since 1975 except for those whose last job was in Armed Forces.

f. "Labor reserve" is defined as code 6 if year last worked was an entry of worked since 1975 except for those whose last job was in Armed Forces.

g. "Experienced unemployed, last worked 1974 or earlier or last job in Armed Forces" is defined as code 3 if year last worked was an entry of 1974 or earlier or last job in Armed Forces.

h. "Unemployed, never worked," is defined as code 3 if year last worked was an entry of never worked.

i. "Not in labor force; last worked 1974 or earlier or last job in Armed Forces or never worked" is defined as code 6 if year last worked was an entry of 1974 or earlier or never worked or last job in Armed Forces.

APPENDIX C2

CODE LIST FOR TYPE OF GROUP QUARTERS

Note: The population is divided into "noninstitutional" and "institutional" persons. To determine the appropriate classification, the type of living quarters (i.e., housing unit, institutional group quarters, or noninstitutional group quarters) and sometimes relationship (inmate or noninmate) must be considered. All persons in housing units, all persons in noninstitutional group quarters, and persons who are not inmates but who live in institutional group quarters are classified as "noninstitutional." Only those persons in institutional group quarters with a relationship of "inmate" are classified as "institutional."

Code	Group Quarters
1-75	INSTITUTIONAL GROUP QUARTERS
1-17	Homes, Schools, Hospitals, or Wards for Juveniles
