[1] Estimates.
[2] For definition of urban and rural, see headnote, table 7, p. 6.
[3] The 1930 and 1935 farm population comprises all persons living on farms without regard to occupation; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place. A further difference is due to the fact that the 1920 and 1935 censuses were taken in January, while the 1930 census was taken in April, when the number of persons on farms is appreciably larger. For farm population by States see table 10, p. 8, and table 574, p. 596.
[4] Data collected for 1925 are not strictly comparable with figures for other years.
[5] Includes crop land harvested, crop failure, crop land lying idle or fallow, and plowable pasture.
[6] "Improved land"; figures nominally include land available for crops and land occupied by buildings, yards, and barnyards.
[7] These figures include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.
[8] See note 1 on "livestock" table 560, p. 581.

No. 557.—AVERAGE VALUES PER FARM AND PER ACRE: By States

Note.—Averages are based on data shown in tables 558 and 560. The 1935 schedule called for the value of land and buildings only. The average value of land per acre is shown for 1920, 1925, and 1930 in the 1935 and previous issues of this publication

No. 570.—NUMBER OF MORTGAGED FARMS AND MORTGAGE DEBT: BY STATES

NOTE.—Data in the following table are partly estimated. A part of the sectional differences in changes in the proportion of farms mortgaged and the trend of mortgage debt from 1930 to 1935 is accounted for by variations among the States in the change in the number, acreage, and value of farms. The number and acreage of farms and the value of land and buildings for 1930 and 1935 are shown for all farms in tables 558 and 560 and for owner farms in tables 564, 565, and 568, respectively.

No. 579.—FERTILIZER: Estimated Sales in the United States

Note.—Data are based on fertilizer tag sales for some States and are compiled by State authorities from sales records, etc., for others, as indicated by footnotes. For 1929, census data have been used in many cases. Other figures are estimates made by State authorities or the office of the National Fertilizer Association. Estimates for a few States for 1933 to 1935 have been revised and differ from those previously published
