Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the population of the United States. The principal source of these data is the Bureau of the Census, which conducts a decennial census of the population and a monthly current population survey and also prepares periodic population estimates. For a listing of specific publications issued, see the Guide to Sources.

Decennial censuses.—The Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first Census in 1790, the census organization was a temporary one. In 1902, the Bureau of the Census was established as a permanent agency of the Government, responsible not only for enumerating the population but also for compiling statistics on other subjects and at other times.

In the 1960 Census, as in previous Censuses, each person was counted as an inhabitant of his usual place of residence (the place where he lives and sleeps most of the time). While this place is not necessarily his legal residence, voting residence, or domicile, the use of these different bases of classification would usually produce substantially the same statistics.

In the last 3 decennial Censuses, some data were obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, and 25 percent in 1960. Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence where large numbers are involved and may be assumed to indicate patterns and relationships where small numbers are involved.

Current Population Survey.—This is a monthly nationwide survey conducted with a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 357 areas comprising 701 counties and independent cities with coverage in every State. About 40,000 housing units and other quarters are designated for the sample at any time, of which about 35,000 (containing 80,000 persons 14 years old and over) are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview. For a discussion of the reliability of estimates based on the sample, see text, p. 215.

Population estimates.—National estimates are derived by use of decennial census data as benchmarks and of data reflecting components of population change available from various agencies as follows: Births and deaths (Public Health Service); immigrants and emigrants (Immigration and Naturalization Service); the Armed Forces (Department of Defense); net migrants (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission). State estimates are based on similar data and also on school statistics from State Departments of Education and parochial school systems.

Standard Metropolitan Statistical Areas (SMSA).—The entire territory of the United States has been classified by the Bureau of the Budget as either (*a*) metropolitan, or "inside SMSA's," and (*b*) nonmetropolitan, or "outside SMSA's." An SMSA is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition, other contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metro-

politan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are used in defining SMSA's. Central cities are those named in the titles of the areas. For a more detailed explanation and a listing of the component areas of each SMSA, see Bureau of the Budget, *Standard Metropolitan Statistical Areas, 1964*. Data on metropolitan-nonmetropolitan residence obtained from the Current Population Survey relate to SMSA's as defined at the time of the 1960 Census of Population.

Urban and rural areas.—According to the 1960 Census definition, the urban population comprises all persons living in (*a*) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (*b*) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (*c*) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (*d*) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (*e*) unincorporated places of 2,500 inhabitants or more.

Substantially the same definition was used for the 1950 Census, the major difference being the designation in 1960 of urban towns in New England and urban townships in New Jersey and Pennsylvania. In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different rules relating to population size and density. In all definitions, the population not classified as urban constitutes the rural population.

Changes in the size of the urban population from one census to another are affected by 2 components: (*a*) Growth in areas classified as urban at the beginning of the decade; and (*b*) reclassification of rural territory as urban. Between censuses, it is possible only to obtain measures of the first component from the Current Population Survey (see p. 1). Measures of the second are too costly. Since about 60 percent of the urban population growth between 1950 and 1960 was attributable to expansion of urban territory, data on the urban population from the Survey may be misleading. Consequently, regular publication of data on urban-rural residence from the Current Population Survey has been discontinued.

Farm and nonfarm residence.—The rural population is divided into "rural-farm," comprising all persons living on farms, and "rural-nonfarm," comprising the remainder. According to the definition used in the 1960 Census, the farm population consists of all persons living in rural territory on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year. In the 1950 Census, farm population was determined by answers to the question, "Is this house on a farm (or ranch)?" However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm.

Color and race.—The concept of race as used by the Census Bureau is derived from that which is commonly accepted by the general public as reflected in the action of legislative and judicial bodies of the country. It does not, therefore, reflect clear-cut definitions of biological stock, and several categories refer to nationality. "Color" divides the population into white and nonwhite. The nonwhite population consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and all others not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are counted as white. Persons of mixed parentage are classified by the race or color of the nonwhite parent.

Mobility status.—Classification of the population by mobility status is based on comparison of an individual's place of residence at the survey or census date with that of a specified earlier date. *Mobile persons or movers* includes all persons living in different houses in the United States at the beginning and at the end of the period. According to their new location, they may be "same county movers" or "different county movers, or migrants." Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons living in the same house in the United States at the beginning and end of the period. *Persons abroad* includes all persons living outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or a possession of the United States. It also includes persons born in a foreign country or at sea who have at least one parent born in the United States. Persons whose place of birth was not reported are assumed to be native unless their census report contains contradictory information, such as an entry of a language spoken prior to coming to the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Household.—A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the head of the household, others in the housing unit related to the head, and also the unrelated persons, if any, such as lodgers, foster children, wards, or employees who regularly live in the house. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. Prior to 1960 a household was defined as all the persons occupying a "dwelling unit." See text, p. 734, for definitions of "housing unit" and "dwelling unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A house with at least 5 lodgers, an institution, a college dormitory, or a military barracks.

Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or group quarters (other than such groups among inmates of institutions) and related to each other.

Subfamily.—A "subfamily" is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or group quarters such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or group quarters.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 3. Population, by Age and Sex: 1960 and 1965, and Projections, 1970 to 1985

[**In thousands.** As of July 1. Includes Armed Forces abroad. Projections based on current estimates of the population by age, color, and sex for July 1, 1965, and imply an annual net immigration of 400,000 for all classes. The underlying projections of fertility were computed by the "cohort" method and imply that completed fertility of all women (i.e., the average number of children per 1,000 women at end of childbearing) moves gradually toward the following levels: Series A, 3,350; Series B, 3,100; Series C, 2,775; and Series D, 2,450. Series A results do not differ substantially from those obtained by assuming that the average annual level of fertility in the 1962–65 period will persist throughout the projection period]

Trust Territory of the Pacific Islands [15]	(16)	[17] 54,843	[18] 70,724	[19] 8,484
Population abroad [20]	[21] 118,933	[22] 481,545	1,374,421	(X)
Members of the Armed Forces	118,933	301,595	610,174	(X)
Civilian citizens employed by the U.S. Government		26,910	35,325	(X)
Families of Armed Forces personnel or of civilian citizen employees	(NA)	107,350	505,752	(X)
Crews of merchant vessels	(NA)	45,690	32,464	(X)
Other citizens	(NA)	(NA)	[23] 190,706	(X)

NA Not available. X Not applicable. Z Less than 0.5 square mile.

[1] Includes estimated population of the Philippines (16,356,000), not shown separately.

[2] Census taken as of Oct. 1, 1939.

[3] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[4] Not enumerated.

[5] Enderbury Island uninhabited at time of enumeration.

[6] Sand Island uninhabited at time of enumeration.

[7] Little Swan Island uninhabited at time of enumeration.

[8] Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukulailai, Nurakita, Palmyra, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands not inhabited in 1950 and 1960. Quita Sueño Bank, Roncador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

[9] Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

[10] Not enumerated or uninhabited at time of enumeration.

[11] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (combined area 3 square miles), and Palmyra (4 square miles). Excludes Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square mile); area of other islands listed in footnote 8 not available.

[12] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[13] Leased (1914) from the Republic of Nicaragua for 99 years.

[14] Figures from Government of Nicaragua. Little Corn Island uninhabited at time of enumeration.

[15] Under the United Nations Trusteeship System with the United States as administering authority since July 18, 1947.

[16] Population 1940, 131,258 (Census of Japan).

[17] Estimated civilian population as of June 30, 1950; see *Current Population Reports*, Series P-25, No. 238, for derivation of estimates.

[18] Census of 1958 conducted by the Office of the High Commissioner. Civilian population; see *Census Report, 1958: Trust Territory of the Pacific Islands*, Office of the High Commissioner, Agana, Guam, June 1959.

[19] *See references in footnotes 17 and 18, above. Comprised of 687 square miles of land area and 7,797 square* miles of water area.

[20] Excludes United States citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of households.

[21] Excludes dependents of Federal employees and crews of merchant vessels.

[22] Based on 20-percent sample of reports received.

[23] Represents U.S. citizens abroad for extended periods of time. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

[1] Base is 1960 total population.
[2] Comprises both net immigration from abroad and net interdivisional or interstate migration according to the area shown. Includes movements of persons in the Armed Forces.

Source: Dept. of Commerce, Bureau of the Census; *Current Population Reports*, Series P-25, No. 324.

No. 9. Estimated Population—States and Puerto Rico: 1957 to 1965

[**Population in thousands.** As of July 1. Includes Armed Forces stationed in area. For explanation of methodology, see source. For enumerated population, 1910 to 1960, see table 10. Minus sign (–) denotes decrease]

Z Less than 0.1 percent.

[2] For United States, population of U.S. has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted, except that 1930 figures are based on revised land areas used for 1940.

No. 11. Center of Population: 1790 to 1960

["Center of population" is that point which may be considered as center of population gravity of the U.S. or that point upon which the U.S. would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

Year	North latitude			West longitude			Approximate location
	°	′	″	°	′	″	
CONTERMINOUS U.S.[1]							
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1800	39	16	6	76	56	30	18 miles west of Baltimore, Md.
1810	39	11	30	77	37	12	40 miles northwest by west of Washington, D.C. (in Virginia).
1820	39	5	42	78	33	0	16 miles east of Moorefield, W.Va.[2]
1830	38	57	54	79	16	54	19 miles west-southwest of Moorefield, W.Va.[2]
1840	39	2	0	80	18	0	16 miles south of Clarksburg, W.Va.[2]
1850	38	59	0	81	19	0	23 miles southeast of Parkersburg, W.Va.[2]
1860	39	0	24	82	48	48	20 miles south by east of Chillicothe, Ohio.
1870	39	12	0	83	35	42	48 miles east by north of Cincinnati, Ohio.
1880	39	4	8	84	39	40	8 miles west by south of Cincinnati, Ohio (in Kentucky).
1890	39	11	56	85	32	53	20 miles east of Columbus, Ind.
1900	39	9	36	85	48	54	6 miles southeast of Columbus, Ind.
1910	39	10	12	86	32	20	In the city of Bloomington, Ind.
1920	39	10	21	86	43	15	8 miles south-southeast of Spencer, Owen County, Ind.
1930	39	3	45	87	8	6	3 miles northeast of Linton, Greene County, Ind.
1940	38	56	54	87	22	35	2 miles southeast by east of Carlisle, Haddon township, Sullivan County, Ind.
1950	38	50	21	88	9	33	8 miles north-northwest of Olney, Richland County, Ill.
1960	38	37	57	88	52	23	4 miles east of Salem, Marion County, Ill.
UNITED STATES							
1950	38	48	15	88	22	8	About 3 miles northeast of Louisville, Clay County, Ill.
1960	38	35	58	89	12	35	6½ miles northwest of Centralia, Ill., and approximately 50 miles east of East St. Louis, Ill.

[1] Excludes Alaska and Hawaii.
[2] West Virginia was set off from Virginia Dec. 31, 1862, and admitted as a State June 19, 1863.

No. 12. Urban and Rural Places and Population, by Size of Place: 1910 to 1960

[Prior to 1960, excludes Alaska and Hawaii. "Previous urban definition" refers to the definition used prior to 1950 when a number of large and densely settled places were not included as urban because they were not incorporated. In 1950, the Bureau of the Census adopted the concept of the urbanized area and delineated boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition. See also *Historical Statistics, Colonial Times to 1957*, series A 181-209]

No. 16. Population—Metropolitan and Nonmetropolitan Residence: 1960 and 1965

[In thousands, except percent. As of April]

RESIDENCE	1960 [1]	1965	Percent increase, 1960 to 1965 [1]	Average annual percent increase: 1950 to 1960 [2]	Average annual percent increase: 1960 to 1965 [1]
Total	178,458	192,185	7.7	1.7	1.5
Standard metropolitan statistical areas [3]	112,323	123,813	10.2	2.3	1.9
Central cities	57,790	59,612	3.2	1.0	0.6
Outside central cities	54,533	64,201	17.7	4.0	3.3
Nonmetropolitan areas	66,135	68,372	3.4	0.8	0.7

[1] For comparability with data from the Current Population Survey, figures from the 1960 Census have been adjusted to exclude members of the Armed Forces living in barracks and similar types of quarters.
[2] Based on total population. [3] Covers 212 areas as defined in 1960. See text, p. 1.

No. 17. Cities With 100,000 Inhabitants or More in 1960—Population, 1910 to 1960, and Area, 1960

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin. Land area figures, generally supplied by city engineers, have been revised to agree with those in the Bureau of the Census, *Area Measurement Reports*, Series GE-20, where available]

[1] The cities of Madison, Wis., and Rockford, Ill., share the same rank of 96. In order to have the lowest rank equal to the number of cities presented, the number 97 is omitted.

[2] Population shown is for New York City as now constituted.

[3] Revised population figure for Norfolk is 304,869.

[4] Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1910: 150,355.

[5] Not incorporated in 1910.

1940 (Apr. 1)	34,949	504	1.56	3.77	31,680	3,142	127	90.6
1950 (Apr. 1)	42,857	791	2.06	3.52	39,044	3,633	149	91.2
1960 (Apr. 1)	53,021	1,016	1.92	3.38	47,868	5,153		90.3

X Not applicable. [1] Computed by compound interest formula.
[2] Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.
[3] Includes small number of hotels, institutions, and other quasi-households. [4] Estimated.

No. 39. Households, Families, and Married Couples: 1965 and Projections to 1980

[**In thousands, except average size.** Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Data for 1965 based on current definition of a household; projections based on 1950 definition. (See text, pp. 3 and 734.) Figures take account of 1960 Census information on age and sex composition of the population. Projections based on Series II population projections from *Current Population Reports*, Series P-25, Nos. 241 and 251. (See also table 3.) Series A and B assume, in different degrees, increases in the proportion married in each age group. Given the initial projection of marital status for each series, the general method of projection for that series was as follows (except for the number of male primary individuals): A—average annual change from 1950 to 1956-58 in the proportion of persons in each age group who were household heads of a given type was assumed to continue to 1965; one-half assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980. B—one-half the average annual change from 1950 to 1956-58 was assumed for 1957 to 1965; one-quarter assumed for 1965 to 1975; it was assumed that no change would occur thereafter. Projections of the number of male primary individuals were based on average annual change from 1950 to 1960-62. See *Current Population Reports*, Series P-20, No. 123]

No. 45. Religious Bodies—Church Membership, Number of Pastors, and Sunday School Enrollment

Prior to 1959, excludes Alaska and Hawaii. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of the Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental illness, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the Public Health Service in the annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births and deaths.—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas[1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the Public Health Service. From 1951 to 1954, and for 1956 and subsequent years, the figures were based on a 50-percent sample of all registered births. Adjustments shown for underregistration of births are based on the results of nationwide tests of registration completeness in 1940 and 1950. Such adjustments in the published data were discontinued in 1960.

Current death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries, and Causes of Death*. The current classification, "Seventh Revision of the International Lists," has been used in the United States beginning with 1958. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. Comparability ratios which measure the net effect of changes in classifications according to the Fifth and Sixth Revisions are shown in *Vital Statistics–Special Reports*, Vol. 51, Nos. 2 and 3; and according to the Sixth and Seventh Revisions in *Vital Statistics of the United States, 1958*, Vol. 1, and in *Vital Statistics–Special Reports*, Vol. 51, No. 4. The extent of earlier changes is discussed in "The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends," *Vital Statistics–Special Reports*, Vol. 36, No. 10, and *Vital Statistics of the United States, 1958*, Vol. 1.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence of the mother or of the decedent.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1–5.

1940, and each year since 1944. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration area was established by the Public Health Service in 1957, and a divorce-registration area in 1958. At the beginning of 1966, the marriage-registration area covered 36 States and 3 independent registration areas; the divorce-registration area, 22 States and 1 independent registration area.

Vital statistics rates.—Vital statistics rates computed by the Public Health Service are based upon the enumerated population figures as of April 1 for 1940, 1950, and 1960 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. Birth and divorce rates for 1940 and 1947 to 1960, and death and marriage rates for 1940 to 1960, for the United States and the individual States are based on total population present in the area, excluding Armed Forces abroad; the population base for 1945 birth and divorce rates includes Armed Forces abroad.

Morbidity.—Annual data on notifiable diseases are compiled by the Public Health Service at its Communicable Disease Center in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report*. The data are based on reports from State health departments to the Public Health Service. The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, and the utilization of health services, are provided by the various surveys that make up the National Health Survey, conducted by the Bureau of the Census for the Public Health Service. They are published in *Vital and Health Statistics*, Series 10 to 12.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 244 and 245).

Another aspect of morbidity is provided by statistics on patients in hospitals for mental disease, psychiatric services of general hospitals, outpatient psychiatric clinics, and institutions for the mentally retarded. From 1923 to 1946, data in the field of mental health were collected annually by the Bureau of the Census. With the passage of the National Mental Health Act in 1946, the data-collecting function was transferred to the Public Health Service. Beginning with the 1947 report, the hospital data appear in the annual report, *Patients in Mental Institutions*, and beginning with 1959, the clinic data appear in *Data on Patients of Outpatient Psychiatric Clinics in the United States*, both issued by the Public Health Service.

Medical care.—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually in *Hospitals*, Guide Issue, and include only hospitals that meet the Association's requirements for listing. Institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Included are nearly all hospitals in the country that meet the following definition: A hospital is any establishment providing medical and registered nurse supervision; and offering services, facilities, and beds for use beyond 24 hours by 6 or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality, or pregnancy; and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, (b) obstetrical care, or (c) other definitive medical treatment of similar extent. Statistics supporting comprehensive, long-range plans for construction of hospitals and related medical facilities authorized under Title VI of the Public Health Service Act, as amended, are submitted annually by the Hill-Burton State Agencies to the Public Health Service. National data on hospital beds in 1948 to 1962 and detailed State

data as of January 1, 1962, appear in *Hill-Burton State Plan Data: A National Summary as of January 1, 1962,* Public Health Service Publication No. 930-F-2.

Statistics on institutional population based on the 1960 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U.S. Census of Population, 1960,* PC(2)-8A).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

Nutrition.—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation.* A discussion of methods used to compute these figures and more detailed information appear in Statistical Bulletin No. 364, *U.S. Food Consumption; Sources of Data and Trends, 1909-63,* and the annual supplements.

Statistics on Federal food distribution programs, data on the quantity and costs of the food commodities distributed, and the number of persons participating in the programs are published annually in *Agricultural Statistics.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

Fig. V. VITAL STATISTICS RATES: 1915 TO 1965

[See tables 48 and 49]

No. 48. Live Births, Deaths, Marriages, and Divorces, and Rate Per 1,000 Population: 1910 to 1965

[Prior to 1960, excludes Alaska and Hawaii. Births and deaths are registered births and deaths only; for years prior to 1933 not all States were represented (see text, p. 43). See also *Historical Statistics, Colonial Times to 1957*, series B 7-9, B 129, B 176, and B 178]

YEAR	NUMBER (1,000)				RATE [4]			
	Births [1]	Deaths	Marriages [2]	Divorces [3]	Births [1]	Deaths	Marriages [2]	Divorces [3]
1910	(5)	697	948	83	(5)	14.7	10.3	0.9
1915	776	816	1,008	104	25.0	13.2	10.0	1.0
1920	1,509	1,118	1,274	171	23.7	13.0	12.0	1.6
1925	1,879	1,192	1,188	175	21.3	11.7	10.3	1.5
1930	2,204	1,327	1,127	196	18.9	11.3	9.2	1.6
1935	2,155	1,393	1,327	218	16.9	10.9	10.4	1.7
1940	2,360	1,417	1,596	264	17.9	10.8	12.1	2.0
1945	2,735	1,402	1,613	485	19.5	10.6	12.2	3.5
1950	3,554	1,452	1,667	385	23.6	9.6	11.1	2.6
1955	4,047	1,529	1,531	377	24.6	9.3	9.3	2.3
1960	4,258	1,712	1,523	393	23.7	9.5	8.5	2.2
1961	4,268	1,702	1,548	414	23.3	9.3	8.5	2.3
1962	4,167	1,757	1,577	413	22.4	9.5	8.5	2.2
1963	4,098	1,814	1,654	428	21.7	9.6	8.8	2.3
1964	4,027	1,798	[6] 1,720	[6] 445	21.0	9.4	[6] 9.0	[6] 2.3
1965 [6]	3,767	1,825	1,789	481	19.4	9.4	9.2	2.5

[1] Beginning 1960, based on 50-percent sample.
[2] Includes estimates and marriage licenses for some States for all years.
[3] Includes reported annulments and some estimated State figures for all years.
[4] For 1940, 1950, and 1960, based on population enumerated as of Apr. 1; for all other years, estimated as of July 1. All rates are based on population excluding Armed Forces abroad, except 1945 birth and divorce rates based on population including Armed Forces abroad.
[5] Collection of birth certificates began in 1915. [6] Provisional.

No. 49. Live Births and Birth Rate Per 1,000 Population, by Color: 1910 to 1964

[**Number in thousands.** Prior to 1959, excludes Alaska, and 1960, Hawaii. Prior to 1959, data are adjusted for underregistration; 1959 data are shown for both adjusted and registered births; beginning 1960, registered births only. For total registered births, see table 48. Beginning 1959, based on 50-percent sample. See also *Historical Statistics, Colonial Times to 1957*, series B 6 and B 19-21]

YEAR	NUMBER [1]			RATE [2]		
	Total	White	Nonwhite	Total	White	Nonwhite
1910	2,777	2,401	(3)	30.1	29.2	(3)
1920	2,950	2,566	383	27.7	26.9	35.0
1930	2,618	2,274	344	21.3	20.6	27.5
1935	2,377	2,042	334	18.7	17.9	25.8
1940	2,559	2,199	360	19.4	18.6	26.7
1945	2,858	2,471	388	20.4	19.7	26.5
1950	3,632	3,108	524	24.1	23.0	33.3
1955	4,104	3,488	617	25.0	23.8	34.8
1959 (adj.)	4,295	3,622	673	24.3	23.1	34.1
1959 (reg.)	4,245	3,597	647	24.0	22.9	32.8
1960	4,258	3,601	657	23.7	22.7	32.1
1961	4,268	3,601	667	23.3	22.2	31.6
1962	4,167	[4] 3,394	[4] 642	22.4	[4] 21.4	[4] 30.5
1963	4,098	[4] 3,326	[4] 639	21.7	[4] 20.7	[4] 29.7
1964	4,027	3,369	658	21.0	20.0	29.1

[1] Includes adjustments for States not in the birth-registration area before 1933; see text, p. 43.
[2] For 1940, 1950, and 1960, based on population enumerated as of Apr. 1; for all other years, estimated as of July 1. For 1945, based on population including Armed Forces abroad; for all other years based on total population (in specific group) residing in area.
[3] Not estimated. Differences between estimated numbers of all births and white births do not give reliable estimates for nonwhite births.
[4] Excludes data for residents of New Jersey since this State did not require reporting of color.

No. 53. Live Birth Rate, by Color and Age of Mother: 1940 to 1964

[**Births per 1,000 women in each specified group.** Prior to 1959, excludes Alaska, and 1960, Hawaii. Data for 1940 to 1955 are adjusted for underregistration; 1959 data are shown for both adjusted and registered births; beginning 1960, registered births only. For 1940, 1950, and 1960, based on enumerated population as of April 1; for all other years, on estimated population as of July 1. Beginning 1959, based on a 50-percent sample. See also *Historical Statistics, Colonial Times to 1957*, series B 22–23]

[1] Rates computed by relating total births, regardless of age of mother, to women aged 15 to 44 years.
[2] Rates computed by relating births to mothers aged 45 years and over to women aged 45 to 49 years.
[3] Figures by color exclude data for residents of New Jersey.

No. 54. Birth Rate, by Live-Birth Order, Native White Women: 1940 to 1964

[**Births per 1,000 women 15 to 44 years old.** Prior to 1959, excludes Alaska, and 1960, Hawaii. Live-birth order refers to number of children born alive. Data for 1940 to 1958 are adjusted for underregistration; 1959 data are shown for both adjusted and registered births; beginning 1960, registered births only. Includes adjustments for States not in the birth-registration area prior to 1930. Figures for births of order not stated are distributed. For 1940, 1950, and 1960, based on enumerated population as of April 1; for all other years, estimated as of July 1. Beginning 1958, based on a 50-percent sample. See also *Historical Statistics, Colonial Times to 1957*, series B 10–18]

LIVE-BIRTH ORDER	1940	1950	1955	1958	1959 (adj.)	1959 (reg.)	1960	1961	1962 [1]	1963 [1]	1964

White	40.3	56.4	53.5	64.2	82.5	[2] 92.6	[2] 102.2	114.3
Nonwhite	49.2	60.9	88.1	119.2	141.8	[2] 146.7	[2] 150.7	161.3

[1] Rate per 1,000 unmarried (never married, widowed, and divorced) women aged 15 to 44 years enumerated as of April 1 for 1940 and 1950 and estimated as of July 1 for all other years.
[2] Figures by color exclude data for residents of New Jersey.

Source of tables 53–55: Dept. of Health, Education, and Welfare, Public Health Service; annual report, *Vital*

No. 56. Net and Gross Reproduction Rate, by Color: 1905 to 1964

[Prior to 1959, excludes Alaska, and 1960, Hawaii. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. Rates computed using annual vital statistics life tables and population estimates by age, except as noted for earlier years. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. A comparison of the net reproduction rate with the gross reproduction rate affords an indication of the loss sustained by the potential childbearing population through mortality. Data for 1951–1954 and for 1956 and subsequent years based on a 50-percent sample of births. See also *Historical Statistics, Colonial Times to 1957*, series B 31–36]

Period or year	Net rate			Gross rate		
	Total	White	Nonwhite	Total	White	Nonwhite
1905 to 1910 [1]	1,336	1,339	1,329	1,793	1,740	2,240
1930 to 1935 [1]	984	972	1,074	1,108	1,080	1,336
1935 to 1940 [1]	978	957	1,137	1,101	1,063	1,413

[1] Standards are the distribution by age, for the United States, of women ever married, 1950, and of women married, husband present, 1952.

[2] For composition of regions, see fig. I, p. XII.

[3] Includes husband in Armed Forces, not shown separately.

No. 59. Median Interval Between Births in 1930 to 1959, by Color: 1959

[In months. As of August 1959. Excludes Alaska and Hawaii. Excludes institutional population. Based on sample. For definition of median, see headnote, table 5]

Color and interval	Year of birth of child					
	1930 to 1934	1935 to 1939	1940 to 1944	1945 to 1949	1950 to 1954	1955 to 1959
White						
Median interval from—						
First marriage of mother to birth of first child	20.3	20.1	20.2	18.4	17.7	16.2
Birth of first child to birth of second child	32.2	32.0	32.8	32.9	30.7	28.2
Birth of second child to birth of third child	31.8	34.2	34.0	33.1	31.3	33.0
Birth of third child to birth of fourth child	33.1	32.8	34.4	32.5	30.0	30.4
Nonwhite						
Median interval from—						
First marriage of mother to birth of first child	11.9	12.9	10.7	11.1	12.7	11.9
Birth of first child to birth of second child	27.6	22.8	27.3	24.9	23.3	23.4
Birth of second child to birth of third child	(1)	22.6	24.1	24.6	23.4	23.3
Birth of third child to birth of fourth child	(1)	(1)	24.0	23.8	22.4	22.9

[1] Median not shown where number of children reported by women surviving to 1959 is less than 150,000.

S Does not meet publication standards because reporting less than 90 percent complete.
[1] Provisional. Represents either marriages performed, licenses issued, or intentions filed. U.S. total based on receipts corrected for observed differences between provisional and final data. State data are not corrected in this manner.
[2] Per 1,000 population. Based on total population residing in area; population enumerated as of Apr. 1 for 1950 and 1960, estimated as of July 1 for other years.
[3] Includes reported annulments. [4] Prior to 1960, excludes Alaska and Hawaii. [5] Estimated.
[6] Incomplete. [7] Marriage licenses.

No. 79. Physicians, Dentists, and Nurses—Total and Rate per 100,000 Population: 1950 to 1964

[Data for physicians as of December 31; dentists as of midyear; nurses for 1950 as of census date, and, beginning 1956, as of January 1. Data for nurses prior to 1960 exclude Alaska and Hawaii. Data for physicians and dentists include Puerto Rico and outlying areas, except as noted. See also *Historical Statistics, Colonial Times to 1957*, series B 180–185 for related data]

ITEM	1950	1955	1960	1963	1964
Physicians, total [1]	**232,700**	**255,200**	**274,800**	**289,200**	**297,100**
Doctors of medicine	220,000	241,700	260,500	276,500	284,300
Doctors of osteopathy	12,700	13,500	14,300	12,700	12,800
Population, total [2] 1,000	156,472	170,499	185,369	194,117	196,863
Physicians per 100,000 population	149	150	148	149	151
Physicians in private practice	168,100	169,900	179,200	184,800	188,400
Doctors of medicine	158,200	159,400	168,200	175,000	178,500
Doctors of osteopathy	9,900	10,500	11,000	9,800	9,900
Population, civilian [3] 1,000	153,635	167,038	182,348	190,845	193,652
Physicians in private practice per 100,000 civilians	109	102	98	97	97
Dentists, total	**87,164**	**94,879**	**101,947**	**105,952**	**107,231**
Population, total [4] 1,000	152,271	165,931	180,684	189,375	192,119
Dentists per 100,000 population	57	57	56	56	56
Dentists, active non-Federal	75,313	76,087	82,630	83,752	84,800
Population, civilian resident [5] 1,000	150,790	162,967	178,153	186,626	189,371
Dentists, active non-Federal, per 100,000 civilians	50	47	46	45	45
Nurses [6]	**375,000**	**430,000**	**504,000**	**550,000**	**582,000**
Population, resident [7] 1,000	150,697	165,931	178,729	184,598	190,169
Nurses per 100,000 population	249	259	282	298	306

[1] Includes non-Federal physicians with temporary foreign addresses.
[2] Estimated resident population, as of Jan. 1. Includes Puerto Rico, outlying areas, Armed Forces and U.S. Government civilian employees and their dependents abroad.
[3] As of Jan 1. Includes Puerto Rico.
[4] Estimated total population, as of July 1. Includes Armed Forces abroad.
[5] Estimated civilian resident population, as of July 1.
[6] Active professional graduates. Data shown in 1955 column are for 1956, and data shown in 1963 column are for 1962.
[7] For 1950 and 1960, enumerated population as of Apr. 1; for 1956, estimated population as of July 1; for all other years, estimated population as of Jan. 1. Excludes Armed Forces abroad.

No. 90. Personal Health Services—Gross Family Medical Charges, Health Insurance Benefits Covering Charges, and Charges Per Family by Residence, by Type of Service or Goods: 1958 and 1963

[1958 data are for year ending June 30 and exclude Alaska and Hawaii; 1963 data are for calendar year. Based on a national survey conducted by the National Opinion Research Center and the Center for Health Administration Studies, University of Chicago. This survey consisted of a sample ("area probability" type) of 2,941 families comprising 9,546 persons in 1958 and 2,367 families comprising 7,803 persons in 1963. Excludes health insurance premiums]

Service or goods	Gross charges incurred, amount (billion dollars)	Insurance benefits covering charges incurred		Charges per family (dollars)			
		Amount (billion dollars)	Percent charges covered by benefits	Urban: Areas of 1,000,000 inhabitants or more	Urban: Other	Rural nonfarm	Rural farm
1958							
Total	**16.2**	**3.1**	**19**	**340**	**284**	**297**	**211**

NA Not available.
[1] Includes patients in private hospitals or institutions, not shown separately.
[2] Patients per 100,000 population estimated as of July 1. Total population used for 1935; civilian, thereafter.
[3] Includes veterans with mental disorders resident in VA hospitals and public health service hospitals at Fort Worth, Tex., and Lexington, Ky.
[4] Includes patients in State-operated psychopathic hospitals and, through 1950, in city hospitals (which ceased to exist thereafter).
[5] Includes patients in city institutions through 1945. Last city institution was transferred to State auspices in 1948.

Source: Dept. of Health, Education, and Welfare, Public Health Service; *Patients in Mental Institutions, Mental Health Statistics—Current Reports; Annual Statistical Report of Outpatient Psychiatric Clinics, Data on Patients of Outpatient Psychiatric Clinics in the United States; Veterans with Mental Disorders Resident in Veterans Administration Hospitals;* and unpublished data.

No. 102. Admissions and Releases of Mental Patients and Mentally Retarded: 1963

Type of facility	Number of facilities		Resident patients, beginning of year	Total admissions [1]	Deaths in hospital	Resident patients, end of year	Net live releases [2]
	Total	Reporting					
State and county mental hospitals	284	284	515,810	283,591	49,052	504,604	245,745
Private mental hospitals	250	172	12,819	75,157	1,654	12,981	73,341
General hospitals with psychiatric services	578	366	8,689	212,705	1,246	8,791	[3] 211,357
Outpatient psychiatric clinics [4]	1,724	1,431	[5] 240,316	364,391	–	[5] 281,306	[6] 323,401
Public institutions for the mentally retarded	128	128	173,261	14,909	3,498	176,516	8,156
Private institutions for the mentally retarded	200	95	7,231	1,297	164	7,348	1,016

– Represents zero.
[1] Excludes transfers. [2] Excess of patients released alive from hospital over those returning to hospital.
[3] Discharged directly. [4] Excludes Veterans Administration clinics.
[5] Number on clinic rolls. [6] Number terminated from clinic rolls.

NA Not available.
[1] Prior to 1950, includes State hospitals only.
[2] Includes estimates.
[3] Based on average daily resident patient population of hospitals reporting personnel by occupation.
[4] Includes clinical directors, psychiatrists and psychiatric residents, and other staff physicians and residents excluding medical interns.
[5] Includes salaries and wages, purchased provisions, fuel, light, water, etc.
[6] Total maintenance expenditures divided by average daily resident patient population of institutions reporting expenditures.
[7] Full-time equivalents of full-time, part-time, and trainee personnel; excludes trainees of VA clinics.

- Represents zero. NA Not available.

[1] Excess of patients released alive from hospital (direct discharges plus leave placements) over those returning to hospital. National data on placements and returns from extramural care are not available, but net releases may be computed from less detailed movement data as follows: Net release equals resident patients beginning of year, plus all admissions excluding transfers, minus deaths in hospital, minus resident patients end of year.

– Represents zero.
D Withheld to avoid disclosing figures for individual producers.
[1] Excludes alicyclic and heterocyclic compounds for 1960 and 1961; excludes methionine for 1964.
[2] Excludes benzenoid compounds.
[3] Excludes small amounts of benzenoid barbiturates.
[4] Includes most, but not all, choline salts.
[5] For human or veterinary use only through 1961. Sales include both diluted and undiluted forms.
[6] Excludes derivatives. [7] Excludes derivatives other than salts.
[8] Includes benzenoid skeletal muscle relaxants; excludes small amounts of nonbenzenoid tranquilizers.
[9] Excludes K vitamins through 1961.

No. 106. Days of Disability—Total and Per 100 Persons, by Acute Condition Group: 1965

[For year ending June 30. Data refer to civilian noninstitutional population and contain some duplications, since time lost because of several concurrent conditions is counted under each contributing condition. Based on a sample and subject to sampling variability; see source for detailed explanation]

Acute condition group [1]	Cases		Total disability days				Days per 100 persons			
	Number (millions)	Per 100 persons	Restricted activity [2]	Bed disability [3]	Work loss [4]	School loss [5]	Restricted activity [2]	Bed disability [3]	Work loss [4]	School loss [5]
Infective and parasitic	51.9	27.5	217.2	104.0	18.1	57.7	115.3	55.2	25.6	138.9
Respiratory	219.4	116.4	680.8	321.1	100.9	98.9	361.3	170.4	143.1	238.1
Digestive	21.0	11.2	81.9	33.6	14.7	5.2	43.5	17.9	20.8	12.6
Injuries	56.4	29.9	318.1	84.1	74.5	11.8	168.8	44.6	105.7	28.5
All other	52.2	27.7	270.2	115.2	32.4	15.6	143.4	61.2	46.0	37.5

[1] Excludes all conditions involving neither restricted activity nor medical attention.
[2] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.
[3] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.
[4] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.
[5] A day when a child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.

No. 117. Nutrition—Nutrients Available for Civilian Consumption Per Capita Per Day: 1930 to 1965

[Prior to 1960, excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data include quantities of iron, thiamine, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine and milk of all types; quantities of ascorbic acid added to fruit juices and drinks. See also *Historical Statistics, Colonial Times to 1957*, series G 546–551]

X Not applicable.

[1] Represents cost to the Federal Government of the commodity as delivered to the State distributing agency; includes cost of purchase, handling, warehousing, and transportation, but excludes administrative costs.

[2] For 1940, represents School Milk Program, which was merged with indemnity plan in July 1943. See also headnote, table 120. Cost refers to subsidy payments by the Federal Government; excludes administrative costs.

[3] Initiated in September 1954 to increase the consumption of fluid milk in schools and child-care institutions authorized under the Agricultural Act of 1954, as amended.

Source: Dept. of Agriculture; annual report, *Agricultural Statistics*.

No. 120. School Lunch Program (Indemnity Plan)—Schools and Children Participating, States and Other Areas: 1965

[Comprises elementary and secondary schools. The indemnity plan is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Federal Government for local purchases of food on a basis of quality and quantity of meals served]

Section 3
Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Immigration statistics are prepared from entry documents. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compilations of data from alien address report cards.

The continuous record of immigration into the United States began in 1819, under the Act of March 2. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Information on immigration and naturalization has been included in annual reports issued by the Office of Immigration from 1892 to 1932, the Secretary of Labor from 1933 to 1940, the Attorney General for 1941, and the Immigration and Naturalization Service since then.

Immigration.—Since 1820 the official immigration statistics (see table 123) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904. Prior to 1868, arriving alien passengers were recorded; thereafter, aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895–1897 when the reporting of arrivals was resumed.

Immigrant.—An immigrant is defined as an alien, other than a returning resident alien, admitted for permanent residence. Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that, beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas. The Immigration and Nationality Act of 1952 simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. Quotas revised by Presidential proclamation now total 158,561.

Act of 1965.—Effective December 1, 1965, quotas established under the 1952 Act continue but are subject to a new preference system. Moreover, at the end of each fiscal year the numbers allocated to each country which are not used are transferred to an immigration pool and made available to preference immigrants who cannot obtain visas because the quota for their country is exhausted. The allocations from the pool and from existing numbers may not exceed 170,000.

Also effective December 1, 1965, the "quota immigrant" of the 1952 Act is called "immigrant" and the "nonquota immigrant" is called "immediate relative" or "special immigrant."

Immediate relatives of United States citizens are parents (if the citizen is over age 21), spouses, and children under age 21. They are exempted from the numerical ceilings.

Special immigrants include returning resident aliens (although these are often classed as nonimmigrants for statistical purposes), certain former citizens, and certain other specified groups. The spouses and children under age 21 of the following groups are included if they are accompanying or following to join such immigrants: Western Hemisphere natives, retired employees of our government abroad, and ministers of religion. Special immigrants are also exempt from the numerical ceilings.

Effective July 1, 1968, a limit of 170,000 is set for immigrants who are natives of countries outside the Western Hemisphere, with a 20,000 maximum on natives of any one country. Selection is made on the basis of preferences favoring family reunification and persons with skills and talents needed here. Also effective then is a ceiling of 120,000 on Western Hemisphere natives on a first-come first-served basis with no limitation on the number from any one country. "Immediate relatives" and "special immigrants" other than those in the latter category because of Western Hemisphere birth continue to be exempt from numerical ceilings.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants, and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; students; and others. Resident aliens returning from a temporary stay abroad are often classed as nonimmigrants, although they are legally special immigrants. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948 was the first of eight special acts passed between 1948 and 1960 that provided for the admission of refugees from Communist-dominated countries, victims of natural calamities, and orphan children without regard to the usual numerical ceilings.

Alien registration.—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the post offices of the United States or the local offices of the Immigration and Naturalization Service.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.
