Note: Based on population estimates of metropolitan areas as of July 1, 1986. Population values shown in this table are derived from the CPS sample, and may not match independently-derived estimates of the population. See "State and Metropolitan Area Populations," in appendix A for more information.

[1]The value of 1.6 times the standard error [1.6*(s.e.)], added to and subtracted from the estimated percentage, yields the 90-percent confidence interval. For further details of calculation and interpretation, see appendix B, Source and Accuracy of the Estimates.
