Using \textit{data.census.gov}: Basic Mapping

Click on ‘MAPS’ in the upper-left part of the window to switch from tables to maps.
Using `data.census.gov`: Customize Map

Click on the CUSTOMIZE MAP button in the upper-right corner of the window.
Left-click on any state and hit ‘Select’ to add a state.
Alternatively, left-click on any state and hit ‘Deselect’ to remove the state.
Click on the Rectangle Selection Tool in the lower part of the window. Right-click on one of the states and hold the mouse to draw over all states you would like to add.
This is a quick way to select multiple geographies at one time. Please note that any geography that touches the rectangle will be added.
To remove a state, remember to left-click on the state and hit ‘Deselect’. 
In this example, South Dakota has been deselected.
You can quickly switch between Data Variables, Products, and Geographies by using the dropdown menu.
Switching between Data Variables
Switching between Products
Switching between Geographies
Another way to adjust the filters is to select the Filter button located in the upper left of the screen. This will open the filters menu.
To customize a map, click on the CUSTOMIZE MAP button located in the upper-right corner.
To apply further customizations, select the cog icon located beneath the legend.
You can change the color palette, change the number of data classes, and choose a different classification type.
To generate a table from the map view, click on the VIEW TABLE button.
This gives you a preview of the map table. To view the full table, click on the GO TO FULL TABLE button. You can also select the HIDE button to hide the preview screen.
