What is data.census.gov?

data.census.gov is the new platform to access data from the U.S. Census Bureau. The vision for data.census.gov is to improve the customer experience by making data available from one centralized place so that data users spend less time searching for data content and more time using it.

This vision stems from overwhelming feedback that the Census Bureau has received to simplify the way customers get data. The Census Bureau continues to work on the customer experience so that it is not necessary for data users to know Census Bureau jargon or perform a complicated search to find the data that they need.

Our Development Depends on Your Feedback

Tell us how we can make your experience better. Send your feedback to cedsci.feedback@census.gov
