

Disclosure Review Board Minutes  
1/9/06

1. AsocA Proposal from (b) (6)

This was approved.

2. ACS ST058

This was approved. The data will be rounded as all ACS special tabulations.

3. (b) (6) data broker workgroup

DSEP has formed a committee to review the Census Bureau's position with regard to data brokers. There are issues surrounding the protocol that is employed in the transaction (primarily "footprint" and camouflaging the records of interest). Are we corporately sharing our evaluations of the quality of various brokers' data and are we getting a good deal? The initial stage is to inventory practices. Due to the generality of the accounting category, instances may not be well recorded. Members will be asked to assist in identifying missed cases.
