

## Disclosure Review Board Minutes

6/18/07

## 1. STP\_www (b) (6)

This was approved. The data will be rounded as all Census 2000 special tabulations.

## 2. ACS 2006 School District Special Tabulations

This was approved. The data will be rounded as all American Community Survey special tabulations.

## 3. (b) (6) Current Population Survey Tabulations for Sponsors

This was approved. We also noted (for (b) (6) benefit and potential future tables) that any tables that can be obtained from an approved public use microdata file do not require DRB approval.

## 4. (b) (6) explained disclosure avoidance rules applied to statistical products produced from commingled data files in econ:

Nonemployer Statistics (NE) are protected using IRS disclosure rules and Census p-percent rules. IRS was advised of the Census Bureau's disclosure avoidance procedure. Census disclosure avoidance methodology of n or less and p-percent is applied to SBO and econ census reports.

The IRS has approved the use of Census noise disclosure avoidance procedure for NE beginning with the 2005 data product, which will be released in June 2007. This method is also being considered for SBO.
