

Disclosure Review Board Minutes

2/9/09

1. COFA Estimates

This was approved. The data will be rounded as all ACS special tabulations. There must be at least 3 unweighted people from different households for each row.

2. ATUS Incentives

This was approved.

3. Cambridge Systematics Request

They need to fix the numbering scheme for blocks and block groups. The ACS and LEHD files are not linked. (b) (6) will still check to make sure this doesn't fall under ARTS. We do not publish ACS data at the block level. They will look at larger areas such as block groups, tracts, and TAZs. If possible, they would like to release the data underlying the histograms (zeroing out cells of 1s and 2s). (b) (6) will check to make sure there is no problem with releasing unweighted data and early weights.

4. POP estimates for (b) (6)

This was approved.

5. EEO CBSA population threshold of 50,000

The threshold will apply to CBSAs.
