The Geographic Areas Reference Map Series for New Hampshire includes two map types:

1. *State-Based County Outline Map* - This small-scale outline map shows and labels all of the county or county-equivalent entities within a state or state equivalent. County-equivalent entities include independent city, parish, borough, city and borough, municipality, and census area.
2. *County Reference Map* - This small-scale reference map shows and labels geographic entities that are wholly or partially within the subject county or county equivalent. Geographic entities shown include American Indian/Alaska Native areas, Hawaiian home lands, county subdivisions, consolidated cities, incorporated places, and census designated places.

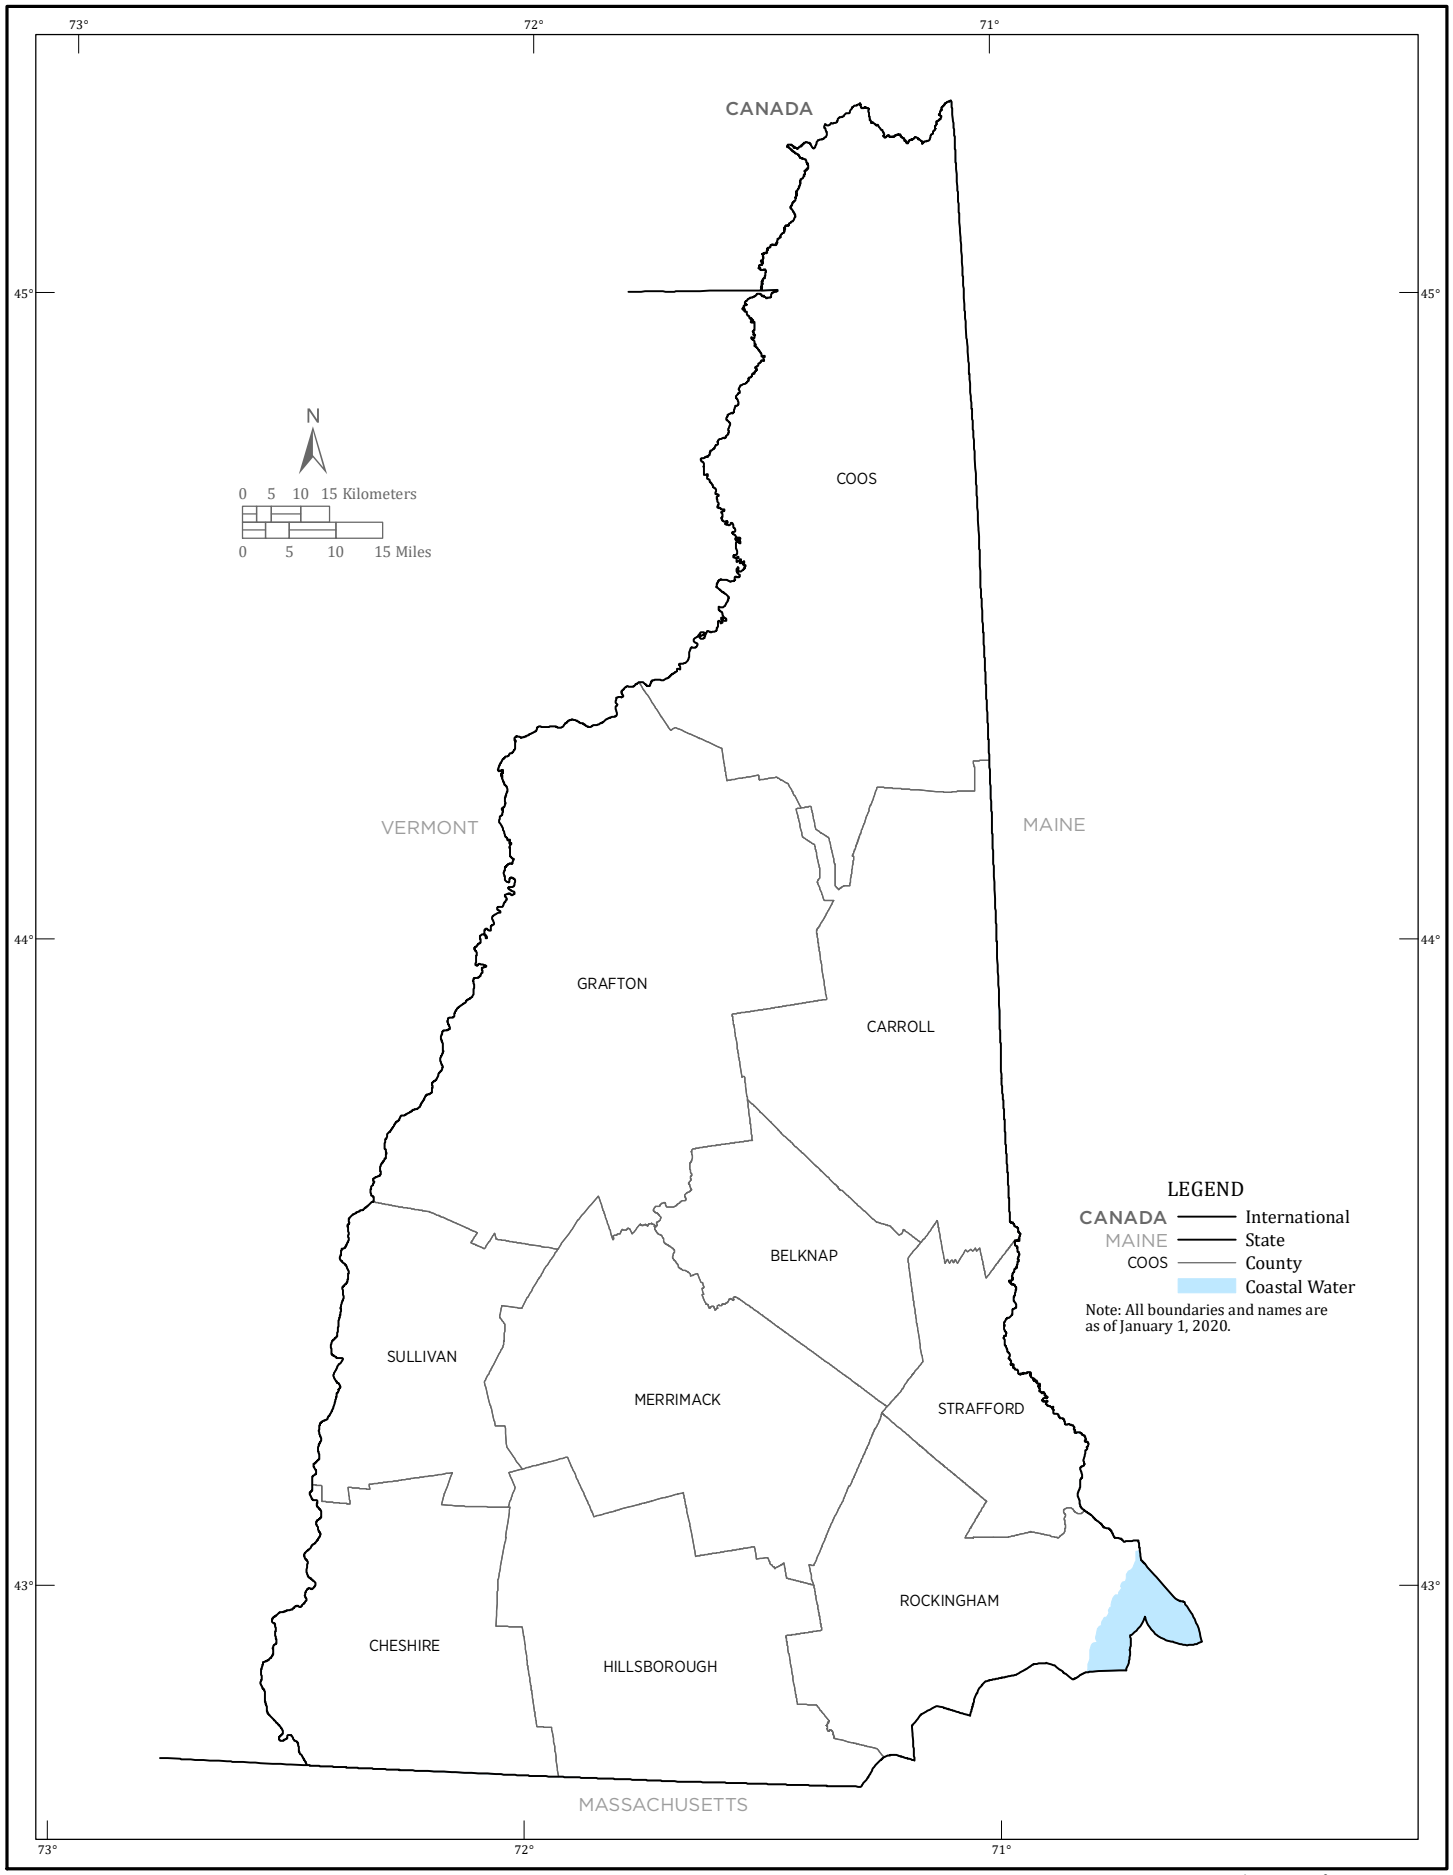

All legal and statistical area boundaries and names are as of January 1, 2020. The boundaries shown on these maps are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.

County-Based Map Legend

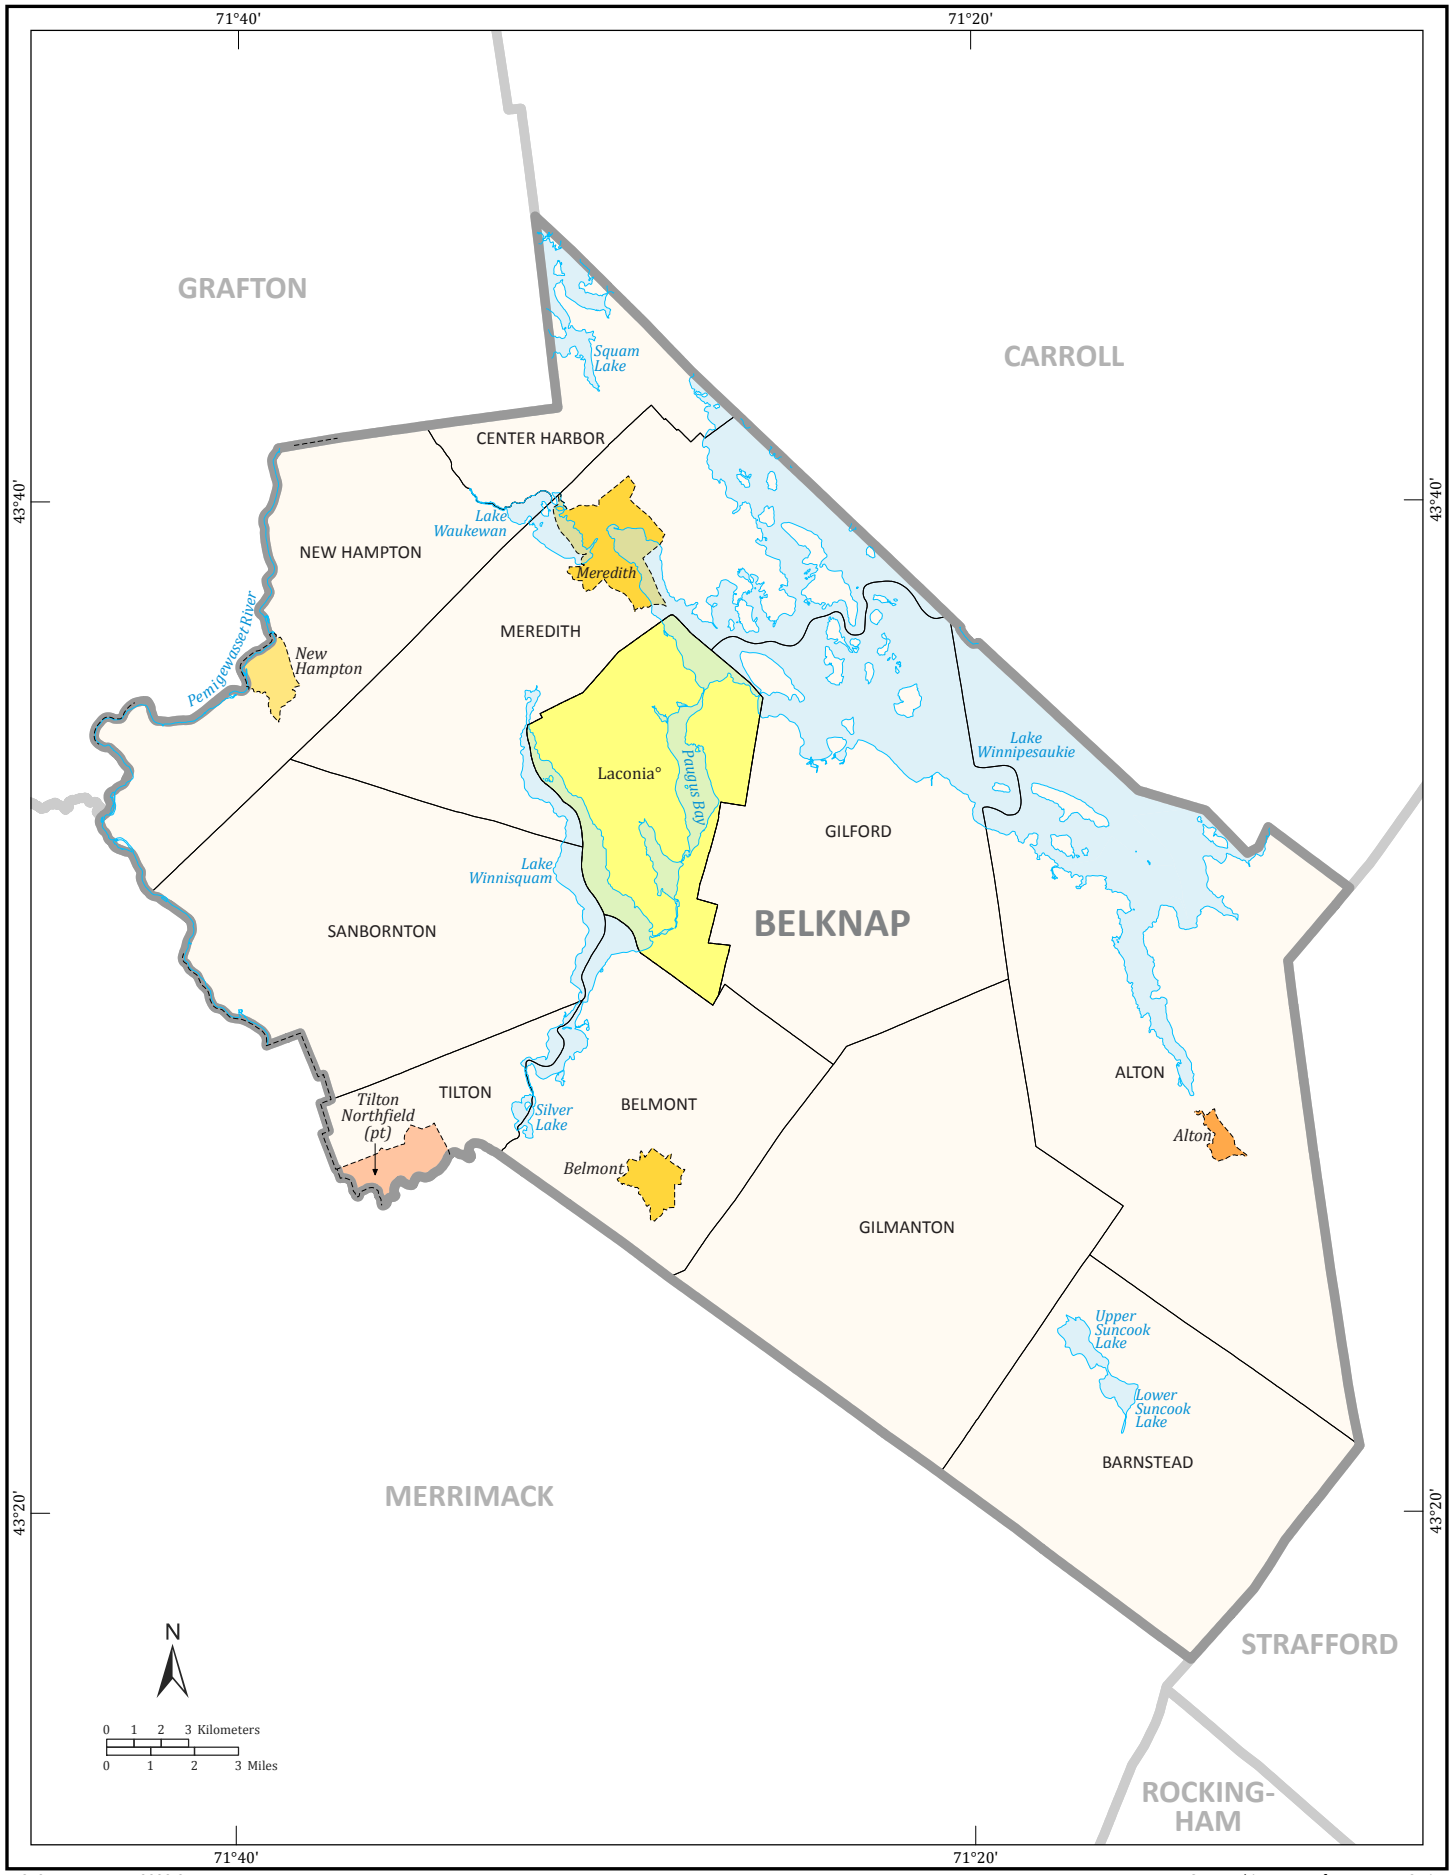

[1] A '°' following a place name indicates that the place is an independent place or independent city. An independent place is not part of any legal county subdivision and thus serves as the statistical equivalent of a legal county subdivision. An independent city is not part of any county or legal county subdivision and thus serves as both the statistical equivalent of a county and a legal county subdivision. The name for the county subdivision is always the same as that of the place and never shown separately on the map.

Note: Where international, state, county, independent city, and/or county subdivision boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The county and independent city boundaries are always shown. Where a county subdivision boundary symbol coincides with a place boundary, the map does not show the place boundary symbol. Any geographic entity name may include '(pt)' if some portion of the entity extends beyond the limits of the subject county, or if multiple discontiguous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts)' if many discontiguous pieces exist for that entity that cannot be discretely labeled.

Data Vintage: All legal and statistical area boundaries and names are as of January 1, 2020.
