The Geographic Areas Reference Map Series for Washington includes three map types:

1. *State-Based County Outline Map* - This small-scale outline map shows and labels all of the county or county-equivalent entities within a state or state equivalent. County-equivalent entities include independent city, parish, borough, city and borough, municipality, and census area.
2. *County Reference Map* - This small-scale reference map shows and labels geographic entities that are wholly or partially within the subject county or county equivalent. Geographic entities shown include American Indian/Alaska Native areas, Hawaiian home lands, county subdivisions, consolidated cities, incorporated places, and census designated places.
3. *American Indian Tribal Subdivision Map* - This small-scale reference map shows and labels all American Indian tribal subdivisions located partially or wholly within the subject state for a given American Indian area. American Indian tribal subdivisions are legal administrative subdivisions of federally recognized American Indian reservations and off-reservation trust lands or are statistical subdivisions of Oklahoma tribal statistical areas (OTSAs). Not all reservations, off-reservation trust lands, and OTSAs have tribal subdivisions.

All legal and statistical area boundaries and names are as of January 1, 2020. The boundaries shown on these maps are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.

U.S. Census Bureau, 2020 Census

Geographic Areas Reference Map Series

## County-Based Map Legend

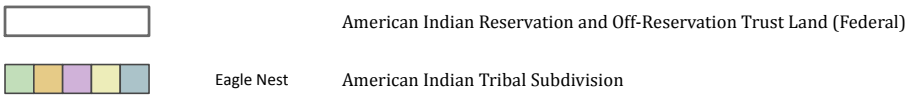

[1] A '*' following an American Indian area name indicates that tribal subdivisions are defined for that area. The tribal subdivision boundaries are displayed on the tribal subdivision map(s) immediately following the county-based maps.

[2] A '*' following a place name indicates that the place is coextensive with a separate county subdivision. The county subdivision name is shown only if different than the name of the place.

Note: Where international, state, county, independent city, and/or county subdivision boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The county and independent city boundaries are always shown. Where a county subdivision boundary symbol coincides with a place boundary, the map does not show the place boundary symbol. Where American Indian Reservation (Federal), American Indian Reservation (State), State Designated Tribal Statistical Area, and/or Tribal Designated Statistical Area boundaries coincide with a county subdivision boundary, the map does not show the county subdivision boundary symbol. Any geographic entity name may include '(pt)' if some portion of the entity extends beyond the limits of the subject county, or if multiple discontiguous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts)' if many discontiguous pieces exist for that entity that cannot be discretely labeled.

Data Vintage: All legal and statistical area boundaries and names are as of January 1, 2020.

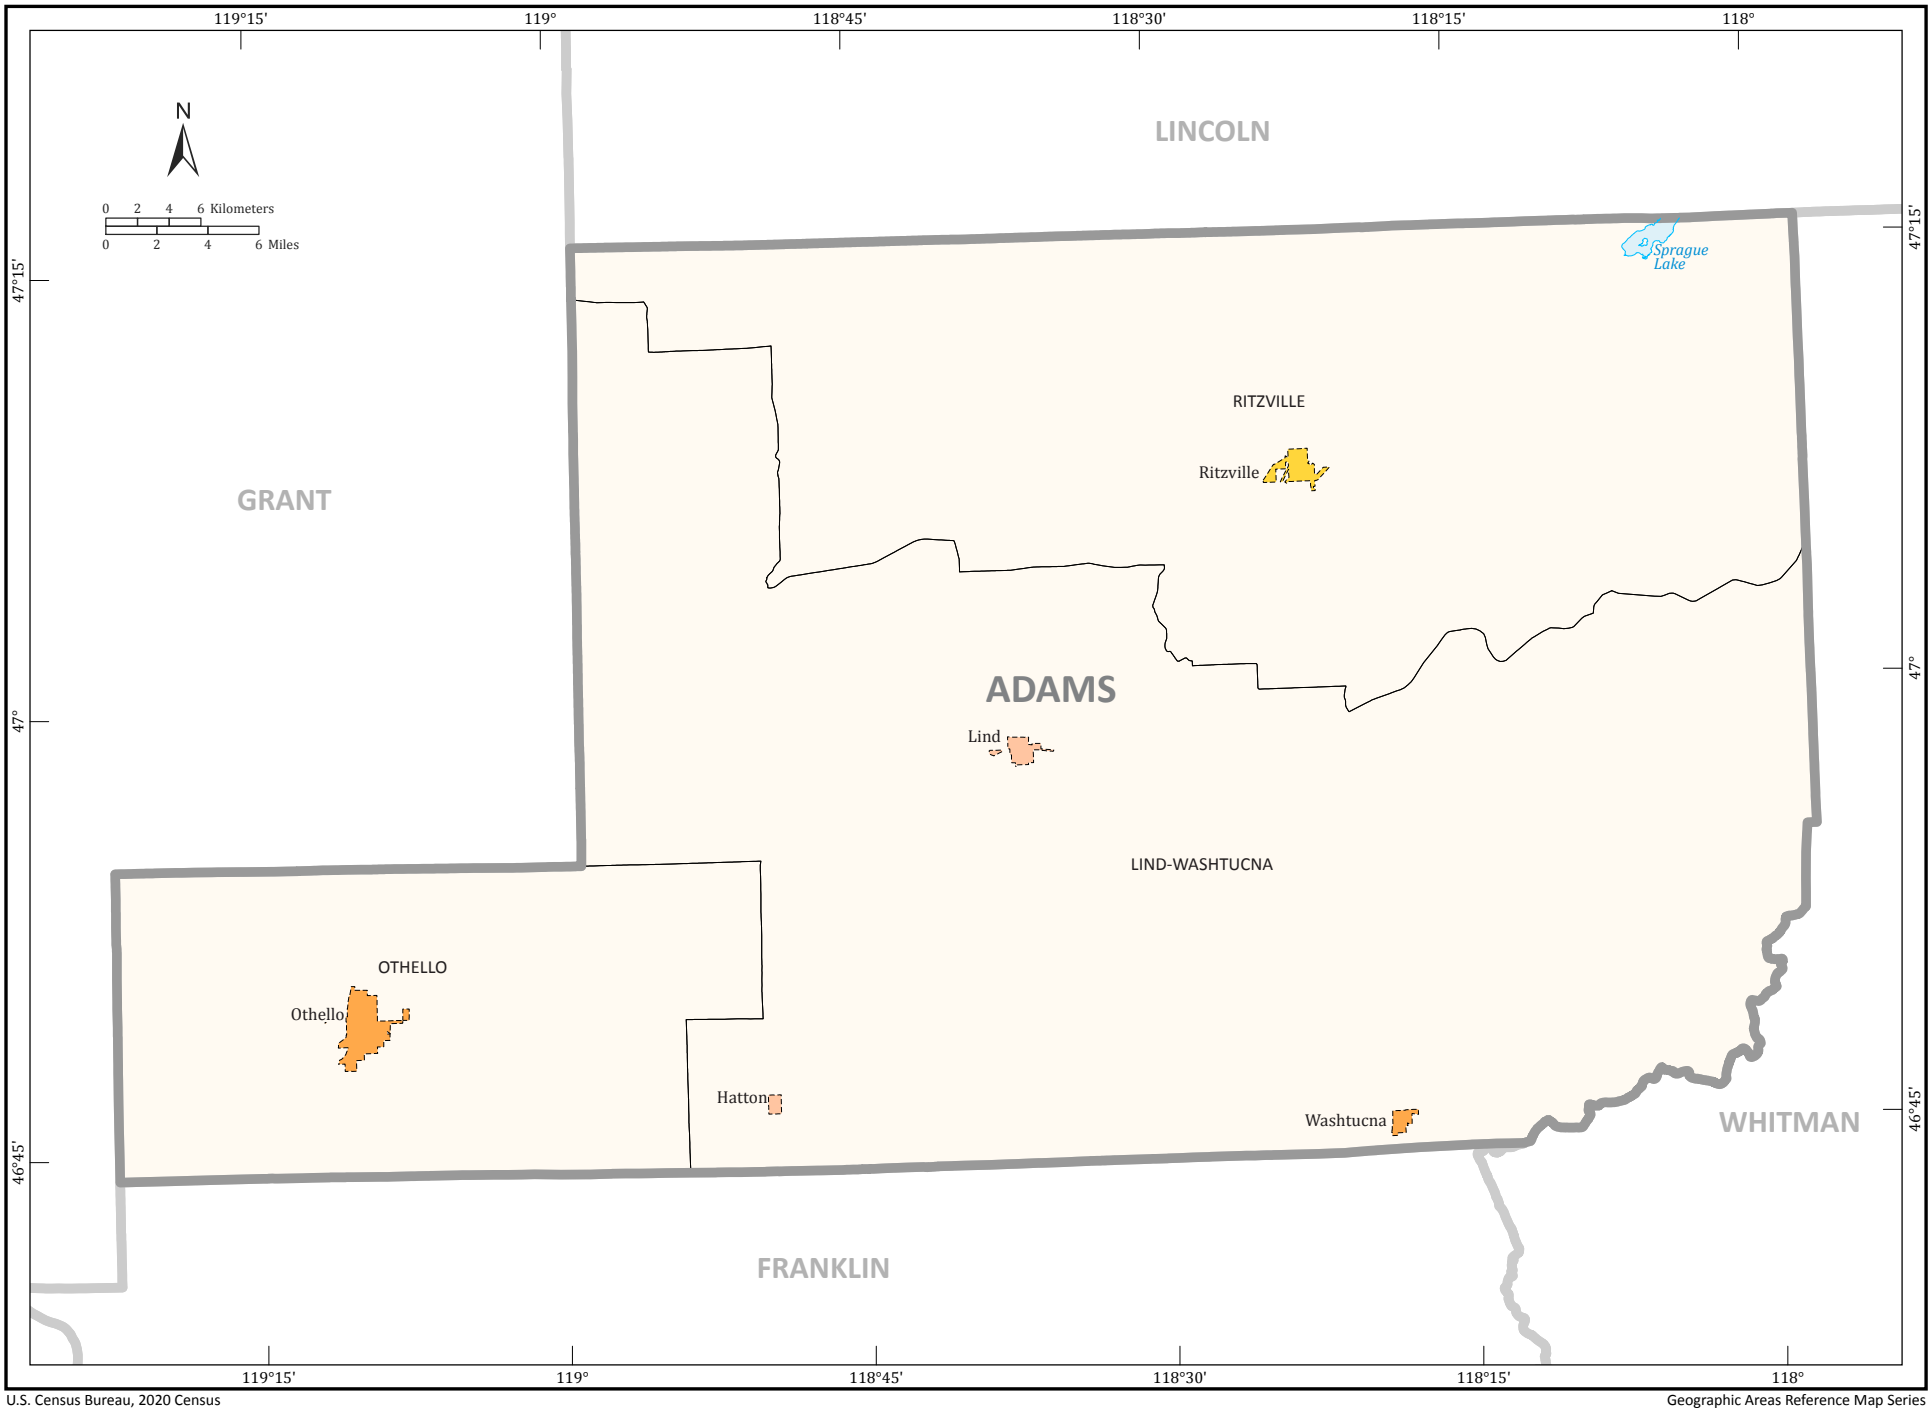

## American Indian Reservation and Off-Reservation Trust Land, Tribal Subdivisions Map Legend

Note: Where the boundaries coincide, the map shows the boundary symbol for the American Indian Reservation and/or Off-Reservation Trust Land. Any geographic entity name may include '(pt)' if some portion of the entity extends beyond the limits of the map area displayed on the page, or if multiple discontiguous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts)' if many discontiguous pieces exist for that entity that cannot be discretely labeled.

Data Vintage: All legal and statistical area boundaries and names are as of January 1, 2020.
