Where International, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest ranked of these boundaries.

1 A " " following a place name indicates that the place is also a false MCD; the false MCD name is not shown.

2 In 1990, the crew-of-vessels population of ships at sea was allocated to census tracts with a "0" suffix. As another shipyard on the 1990 maps locates a crew-of-vessel tract, these maps show a very small area symbolized as a census tract with the census tract number shown next to the area.

3 A " " following a block number indicates that the block number is repeated elsewhere in the block.

The diagram illustrates various types of boundaries and features in a landscape, categorized into six groups:

- Highway:** Represented by a solid black line.
- Secondary Road:** Represented by a dashed black line.
- Jeep Trail/Walkway/Ferry:** Represented by a line with cross-ticks.
- Ridge/Physical Feature:** Represented by a line with small circles or bumps.
- Property/Fence Line:** Represented by a line with small squares or rectangles.
- Railroad:** Represented by a line with cross-ticks and a central dashed line.

On the right side, there are three stylized landscape features:

- Stream/Shoreline:** A blue line with a wavy, irregular shape.
- Intermittent Stream:** A blue line with a wavy, irregular shape, similar to the Stream/Shoreline.
- River:** A blue line with a wavy, irregular shape, similar to the Stream/Shoreline.
- Glacier:** A blue line with a wavy, irregular shape, similar to the Stream/Shoreline.

At the bottom, there are three rectangular boxes representing different types of areas:

- Mudflat:** A box with a blue background and small white dots.
- Inset:** A box with a gray background and a black border.
- Out Area:** A box with a white background and a black border.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- ¹ A "+" following a place name indicates that the place is also a false MCD; the false MCD name is not shown.
- ² In 1990, the crews-of-vessels population of ships at sea was allocated to census tracts with a ".99" suffix. An anchor symbol appeared on the 1990 maps locating a crews-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.
- ³ A "*" following a block number indicates that the block number is repeated elsewhere in the block.
