## HISTORY

The United States acquired the area of Kansas from France in 1803 as part of the Louisiana Purchase. Part of the area was subsequently relinquished in a treaty with Spain in 1819, and was reacquired as part of the annexation of Texas in 1845. Kansas Territory was organized on May 30, 1854, from Missouri Territory (also identified in some statutes as Indian Country or Indian Territory), and included part of present-day Colorado. Kansas was admitted to the Union on January 29, 1861, as the 34<sup>th</sup> state, with generally the same boundary as the present state. The remaining part of the territory was included in Colorado Territory, which was organized in February 1861.

Census data for Kansas are available beginning with the 1860 census. The 1860 population includes only the population within the present state boundary; the population for the area that became part of Colorado Territory was assigned to that area even though it was not yet legally established. The population of the entire legally established Kansas Territory in 1860 was 141,483.

Data for the legally established state of Kansas are available beginning with the 1870 census.
