| Mountain Peak or Hill                         | ▲      |                                     |                   |

Where state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries. Where American Indian reservation and American Indian tribal subdivision boundaries coincide, the map shows only the American Indian reservation boundaries.

Entity names are followed by either their FIPS code or census code; parentheses indicate a census code.

- 1 "MCD" indicates a false MCD. These are for Census Bureau use only.
- 2 The CCD and CDP boundaries represent statistical entities only and are not updated through the BAS.
- 3 Incorporated place name color corresponds to the incorporated place fill color.
- 4 Geographic offsets and corridors are displayed directly on the road. Geographic offsets and corridors represent the road right-of-way for both or one side of a road and typically extend thirty feet from the road.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.

The Census Bureau stores primary and alternate road names, but only primary road names are used to label the roads on these maps.
