NUMBER 5

Graphic Summary of the 1972 Census of Governments

Issued December 1974
Preface

This report is one of several publications of Volume 6: Topical Studies, of the 1972 Census of Governments. The periodic census of governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. The 1972 Census, similar to each of those taken since 1957, covers four major subject fields—governmental organization, taxable property values, public employment, and governmental finances.

Plans and specifications for this census were developed by the Governments Division in consultation with other offices and divisions of the Bureau, other Federal Government agencies, and the Census Advisory Committee on State and Local Government Statistics.

As explained in the introduction, the charts appearing in this publication are reproduced from various other reports of the 1972 Census of Governments. The Publications Services Division, Social and Economic Statistics Administration, provided advice and service in the preparation of all charts and other copy for publication.

Grateful acknowledgement is made of the cooperation and assistance of the many thousands of local and State officials who provided data for the 1972 Census of Governments.
