Preface

This report is one of several publications of Volume 6, Topical Studies, of the 1977 Census of Governments.

The periodic census of governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. This 1977 census, similar to those taken since 1957, covers four major subject fields—governmental organization, taxable property values, public employment, and governmental finances.

Plans and specifications for this census were developed by the Governments Division in consultation with other offices and divisions of the Bureau, other Federal Government agencies, and with numerous other organizations and

individuals concerned with the structure and administration of local government.

This report was prepared by the Finance Branch, headed by **Vance Kane**, Chief, under the supervision of **John Coleman**, Assistant Division Chief for Economic Statistics. Research data were compiled by **Marshall W. Moore**, **David Kellerman**, **John R. Kennedy**, **David F. Patching**, and **Henry Wulf**. Editing and compilation were completed by **Margaret Seymour** and **Mary Thomason**. **Maurice Criz**, Senior Advisor, was responsible for planning and review of this publication.

The Publications Services Division provided advice and service in the preparation of copy for publication. Publication copy was prepared in part within the Governments Division, under the super-

vision of **Corrine Davis**. **Helen D. Files** also contributed to the planning of publication copy.

State officials throughout the country provided information for this phase of the 1977 Census of Governments. Their cooperation is most gratefully acknowledged.

Introduction

The 50 State governments paid \$61.1 billion to local governments in fiscal 1977, or \$283 per capita. This marks a 65 percent rise in State intergovernmental expenditure since 1972, when the total was \$36.8 billion, or \$177 per capita. Other State expenditure was going up at a similar pace, so that the proportion of total State general expenditure represented by distributive payments to local governments decreased from 37.2 percent in 1972 to 36.8 percent in 1977.

During the 20-year period from 1957 to 1977, the annual amount of State payments to local governments increased annually, moving up from \$7.4 billion to \$61.1 billion. Throughout this period, however, such payments made up a fairly consistent fraction of the annual nationwide total of State general expenditure. Since 1948, this percentage relationship ranged between 34.4 and 38.0. During the past decade, the proportion of all general revenue of local governments supplied by State distributive payments also has shown limited variation, ranging between 32.7 and 35.7 percent.

Definition of State Intergovernmental Expenditure

As used in this report, the term State payments to local governments is synonymous with the term State intergovernmental expenditure which appears in recurrent Census Bureau reports on governmental finances. Such expenditure includes not only grants-in-aid and State-collected locally shared taxes, but also reimbursements paid to local governments by States for services rendered by them for State governments. Examples of services for which States often reimburse local governments are collection of taxes, care of prisoners, hospital care for the

needy, and construction of public improvements. State intergovernmental expenditure also includes extension of contingent loans and advances, which provide that repayment by local governments is conditional.

By definition, State intergovernmental expenditure involves the actual payment of money to local governments. It thus excludes State transactions or activities which benefit localities without involving the flow of funds to local governments. Examples include the following:

1. Nonfiscal assistance by a State to local governments in the form of advisory or other services or aid in kind (e.g., free provision of commodities or textbooks, or the loan of equipment);
2. Assumption by a State of direct operating responsibility for functions customarily performed by local governments (e.g., direct maintenance of local public schools by the State of Hawaii and, in several States, provision of local streets and highways or of general relief);
3. Joint State-local activities involving State expenditure of the State's share of costs directly for goods, services, or public assistance payments rather than in the form of payments to local governments;
4. Contribution by a State to trust funds it administers for financing of retirement benefits to local government employees; and
5. Shares of State-imposed taxes which are collected and retained by local governments. (Such retained amounts are classed, in Census Bureau reports, as local tax revenue.)

On the other hand, certain transac-

tions involving the flow of funds from States to local governments are excluded from Census reporting of intergovernmental expenditure, as follows:

1. Unconditional State loans to local governments, and State purchases of local government securities;
2. Transactions in which a State acts as an agent for local governments (e.g., collecting and returning to them locally imposed taxes, including State prescribed taxes imposed at local rates);
3. State payments for commodities, property, or utility services purchased from local governments; and
4. Taxes levied by local governments on facilities or property owned by the State. (However, State payments in lieu of taxes are classified as intergovernmental expenditure.)

The major portion of State payments to local governments consists of grants-in-aid and shared taxes—i.e., the kinds of items commonly referred to as State aid. For this reason, and for ease of reference, the terms State payments to local governments, State aid, fiscal aid, and grants are used interchangeably in the present study with the more technically exact phrase State intergovernmental expenditure, which has been defined and explained above.

Classification of State Intergovernmental Expenditure

In table 6, and in the description of distributive programs for individual States which appear in table 7, State aid amounts are shown separately for the several types of local governments which are distinguished in census reporting.

Introduction—Continued

These are as follows:¹

1. County governments (including parishes in Louisiana and boroughs in Alaska);
2. Municipalities, which consist of all incorporated places having powers of general government, thus including units known locally as villages, boroughs (except in Alaska), and towns (except in the New England States and in New York and Wisconsin) as well as cities;²
3. Townships, which include units locally called towns in the New England States and in New York and Wisconsin;
4. School districts, which include only those units of school administration that have status as independent units of local government rather than as administrative segments of State, county, city, or township governments; and
5. Special districts, which include districts and authorities established for the performance of a single function or a designated combination of specific functions, and which have status as independent units of government rather than as administrative segments of State, county, city, or township governments.

State intergovernmental expenditure is also subclassified here by function. Most of the categories so designated in this report tie directly to functions which are defined and used for census reporting of local government expenditure. For example, intergovernmental expenditure for highways is made up of State grants, shared taxes, and reimbursements paid to local governments specifically to help finance their activities with regard to the provision and maintenance of highway and street facilities. However, a distinctive kind of category also appears here as part of the functional presentation, showing State intergovernmental expenditure which is not thus restricted as to application but, instead, is made available for general local government support of the benefited types of local units.

The per capita amount of intergovernmental expenditure was higher in 1977 than in 1972 for every State but with considerable variation in the rate of change involved. During this 5-year interval, as table 2 shows, State aid per capita more than doubled in 7 States, but rose by less than 30 percent in Connecticut, Delaware, Idaho, Kansas, and Nevada.

Payments to local governments in the Nation as a whole made up 36.8 percent of all State government general expenditure in 1977. This relationship ranged widely, from 2.6 percent in Hawaii up to 54.3 percent in New York. Table 3 shows individual State percentages for 1977 and earlier census years. Following is a summary of the information shown in table 3:

Percent of all State general expenditure represented by payments to local governments	Number of States				
	1977	1972	1967	1962	1957
Total	50	50	50	50	¹ 49
40 or more	9	6	7	6	6
30 to 40	18	21	19	17	15
20 to 30	18	17	14	16	19
Less than 20	5	6	10	11	9

¹ 1957 data excludes Delaware. See "Sources and Limitations of Data" below.

¹ Detailed data on the numbers and characteristics of the several types of local governments in each State appear in **Governmental Organization** (Volume 1 of the 1977 Census of Governments), together with a detailed statement of Census Bureau criteria for the identification and classification of governmental units.

² Recognized for Census Bureau reporting of governmental statistics as municipalities rather than as counties are the following local governments which, either specifically by law or substantially in fact, operate as composite city-counties: Anchorage, Alaska, Baltimore city, Md., Baton Rouge, La., Boston, Mass., Carson city, Nev., Columbus, Ohio, Denver, Colo., Honolulu, Hawaii, Indianapolis, Ind., Juneau, Alaska, Lexington-Fayette, Ky., Nashville-Davidson, Tenn., New Orleans, La., New York City, N.Y., Philadelphia, Pa., San Francisco, Calif., Sitka, Alaska, St. Louis City, Mo., Washington, D.C., and the 38 "independent" cities of Virginia. In this report, segregable amounts of State payments to these particular units have been classified accordingly.

Statistical Findings

The per capita payments in 1977 were highest in Alaska (\$576) and lowest in Hawaii (\$39) with the 50 States distributed as follows:

<u>Per capita amount</u>	<u>Number of States</u>
Total	50
\$400 or more	3
\$350 to \$400	1
\$300 to \$350	6
\$250 to \$300	10
\$200 to \$250	17
\$150 to \$200	10
Less than \$150	3

During the past 10 years, as these figures show, there has been a considerable increase in the number of States devoting a relatively high percentage of their total general expenditure to distributive payments. In 1977, 27 States expended over 30 percent, compared with only 21 States in 1957.

There was substantial variation between individual States in the fraction of general expenditure devoted to local government aid between 1972 and 1977. Twenty-one States showed a decline but six States had an increase over five percent.

Tables 4, 5, and 6 give State-by-State data on the functional distribution of intergovernmental payments in 1977. Following is a brief summary of these figures:

Function	State intergovernmental expenditure, 1977			
	Amount (in millions)	Percent	Per capita amount	
			50-State average	Median State ¹
Total	\$61,074	100.0	\$283.22	\$230.91
Education	36,964	60.5	171.42	166.45
Public welfare	8,757	14.3	40.56	9.20
General local government support	6,373	10.4	29.55	19.09
Highways	3,631	5.9	16.84	14.28
Health and hospitals	1,398	2.3	6.48	3.16
Other	3,951	6.5	18.37	16.69

¹ Medians are based on those States having the specific items.

The bulk of all State intergovernmental expenditure, as this summary shows, is made available to help finance some particularly designated function or activity. In 1977, only \$6.4 billion, or 10.4 percent of the total, was provided without such functional designation—i.e., on terms that made funds available for "general local government support." There is one State with no distributive programs of this kind and, as table 4 shows, six other States where only a nominal amount (less than \$2 per capita) was thus made available in 1977. On the other hand, general support grants are highly significant in a number of States, equalling in 1977 about \$147 per capita in Wisconsin, \$77 in Alaska and Wyoming, and \$73 in Minnesota.

Grants for education made up a major portion of all States payments to local governments in most individual States as well as in the Nation as a whole. However, there is a wide variety in the scale of such State distributions, which ranged in 1977 from over \$395 per capita in Alaska down to \$47 per capita in New Hampshire. (Hawaii, where the State government administers and operates the public schools, had no educational grants). The following figures, based on table 4, summarize the 1977 amount of intergovernmental expenditure for education by the various States:

	Per capita amount	Number of States
Total		50
\$200 or more		11
\$150 to \$200		22
\$100 to \$150		13
Less than \$100		4

Public welfare ranked second only to education as a State-aided function, with payments totaling \$8.8 billion or over 14 percent of all State payments. It should be noted the administration of categorical welfare aid was changed in January 1974 when the Federal Government assumed direct payment to aged, blind and disabled recipients. Since many States directly administer the balance of the welfare programs, either no payments or token amounts for special programs are made to local governments. Nine States still have welfare grants of over \$40 per capita indicating continued local government involvement in welfare activities.

State payments to local governments for highway purposes amounted to \$3.6 billion in 1977, 6 percent of total State intergovernmental expenditure. Some such distributive payments were made by all except three States (Alaska, Hawaii,

and West Virginia), and the per capita amount ranged up to \$49 in Iowa. The States were distributed as follows in terms of 1977 State aid for highways:

Per capita amount	Number of States
Total	50
\$25 or more	14
\$20 to \$25	5
\$15 to \$20	4
\$10 to \$15	6
\$5 to \$10	12
Less than \$5	9

State aid to local governments for health and hospital purposes totaled \$1.4 billion in 1977. This was a national average of \$6.48 per capita, but the amount distributed was relatively much less in a majority of States. There were only 7 States where grants for health and hospitals equalled at least \$10 per capita.

The 1977 functional categories include two new functional headings—"Corrections and Law Enforcement" and "Sewerage." Since prior data are not available, these functions are only reported in tables 4, 5, 6, and 7.

Corrections and law enforcement grants totaled \$782 million with a per capita average of \$3.63. Sewerage payments by the States amounted to \$496 million with a per capita average of \$2.30. Only 31 States made identifiable sewerage program grants.

Table 6 provides a cross classification of intergovernmental expenditure, by States, in terms of the major functional categories mentioned above and the various types of recipient local governments. As shown there, State intergovernmental expenditure in 1977 went to various local governments as follows:

Introduction—Continued

Type of government	Amount (in millions)	Per cent
Total	\$61,074	100.0
School districts	29,074	47.6
Counties	13,824	22.6
Municipalities	11,779	19.3
Townships	724	1.2
Special districts	666	1.1
Various units	5,007	8.2

Note: These proportions generally resemble those which were similarly reported from the 1972 Census of Governments.

Individual State Detail

Table 7 provides a summary textual description of the distributive programs of each of the 50 State governments. For brevity, certain very minor items have been omitted.

The distributive programs of each State are grouped under functional headings. For each program, the presentation indicates briefly the distributive formula and the sum paid in fiscal 1977, with a specific indication in most instances of the amount going to various types of local governments. In the presentation, the brief term "cities" has been used interchangeably with the technically more precise designation, "municipalities."

For many of the State aid items shown, the description will also make evident the source of financing involved. This is the case, for example, for allocations of particular earmarked taxes and for grant items that are payable distinctively from federally provided funds. However, it is often impossible to associate a particular distributive program with some specific financing source. This is most obvious for a grant payable from a State "general fund" that is fed by numerous revenue sources. An intermediate situation involves aid payable from a special fund which in turn is fed by two or more earmarked revenue sources. Where the main components of such multiple-source funds could be readily ascertained and briefly stated (e.g., "highway-user revenues") they usually are mentioned here in the descrip-

tion of the distributive program concerned. Also, items financed in part from Federal resources are commonly described as payable from "State and Federal funds." These features of the presentation provide background about the financing of many individual grant items, but they do not afford a basis for comprehensive classification of all State intergovernmental expenditure by source of financing.

State Aid Formulas

Particular programs of State aid to local governments involve various means by which (a) the total amount available for a particular fiscal year or biennium is established, and (b) the shares payable to various individual governments are determined.

The amount of some items of State intergovernmental expenditures is set by a specific appropriation of such a nature that a particular total sum named will be distributed without reduction or change.

At the other extreme are aid items whose total amount is not explicitly determined or even limited in advance. One example of this type is the distribution of a specified share of some particular State revenue source, with the actual current amount of aid determined by the yield of that source. Another example is the "open end" authorization of whatever amount is needed to meet the requirements of a particular distributive formula.

Between the absolutely fixed and the completely indeterminate types of aid provisions are numerous gradations and combinations of methods. Thus, a specified share of some revenue source may be authorized for a particular fiscal aid program, but with the total sum for the current period limited also by a specific-amount appropriation. Again, a definite amount may be appropriated as a maximum, subject to reduction by the operation of a distributive formula or by administrative action.

The bases for determining individual governments' shares of a particular grant or shared tax are also extremely varied.

The term "shared tax" has sometimes been applied strictly to specified portions of State taxes distributed back to local governments of origin without restriction concerning use. On the other hand, some aid thus distributed on a source basis is limited to particular functions or purposes.

More generally, aid for the support of specific local government functions is distributed with reference to some measure of local need or activity—for example, for education, school-age population, enrollment or attendance, or actual local expenditure; for highways, miles of roads, number of vehicles, or particular local requirements; for public welfare programs, actual or estimated local expenditure.

A broad measure of need is expressed in formulas based on local population and applied to the distribution or money for general local government support.

For many aid programs using a measure of local need, some standard of local financial effort or ability is also applied, aiming at a degree of "equalization" as between relatively poor and more prosperous local units. A contracting principle is applied where a "floor" is provided in terms of a minimum amount of aid payable to each local government unit involved. Finally, some aid programs provide an identical amount to all local units of a particular type.

Sources and Limitations of Data

This report represents a comprehensive updating of the kind of information about State payments to local governments that was most recently presented in a similarly titled report of the 1972 Census of Governments (Volume 6, Number 4). Figures shown here for 1972 and prior years are repeated directly from that publication. Amounts appearing in tables 1 to 3 for 1973 through 1976 are from the Census Bureau's annual reports on State government finances for the years specified. The basic 1977 amounts in tables 1 to 5 are directly from **State Government Finances in 1977**.

Introduction—Continued

For numerous States, the aggregates shown in table 6 for particular classes of local governments are consistent with the type-of-government presentation initially given in table 10 of **State Government Finances in 1977**. Special research work was undertaken to develop the information about particular grant programs of individual States which is presented in table 7 of this report. However, the two sets of figures do not exactly agree. This is mainly because of certain distributive items which in regular annual Census Bureau reports are treated as "Combined and unallocable" amounts going to two or more types of local governments. In **State Government Finances in 1977** the data are developed from financial records which do not necessarily identify individual grant programs. For table 7, additional research was necessary from other source materials. This resulted in additional detail by function and program but does not in all cases total exactly to the figures presented in table 6 either by type of government or function. The difference may be related to variations in accounting and reporting systems by State agencies, refinements in classification or the lack of reconciliation between the source documents utilized.

Most North Carolina amounts provided to finance local schools are now classed as State payments to local governments (for county-administered schools) for education. In Bureau of the Census reports on governments before 1961, most such amounts were treated as direct State expenditure for local schools and, therefore, were not included in intergovernmental amounts. Figures shown here for 1957 and subsequent years have been accordingly revised.

Delaware statistics also are affected by a change in classification applied to Delaware school systems, effective with reports of 1962 data. "State Board Unit" schools there, formerly treated as a direct State government activity, are now classed as local school district govern-

ments. Financial support provided by the State for these schools, as well as for all other local public schools in Delaware, is now classed as intergovernmental rather than direct State expenditure. Prior-year figures for Delaware have not been revised.

All local public school systems in Vermont were classed as independent school districts, effective in fiscal 1967. In prior years, most had been classed as dependent city or town systems. Prior-year figures for Vermont have not been revised.

Information used in the preparation of this study has been obtained primarily from Census Bureau records and worksheets used in the compilation of data for the Bureau's annual series of reports on State government finances.

These records have been supplemented by reference to statutes and by the study of numerous official reports, special studies, and articles concerning particular States. Some use also has been made of publications of organizations and agencies concerned with certain major functional fields—e.g., for highways, reports of the Federal Highway Administration.

The description here of particular distributive programs is designed to cover arrangements that governed allocations in fiscal 1977.

It has not been considered within the scope of this report to provide full explanatory detail concerning each item of intergovernmental expenditure for each of the 50 States. Descriptions of the bases for distributing aid are stated in summary terms, with uniform phrasing for common patterns. In many cases, however, the descriptions omit specific amounts, ratios, and limitations that may enter into the actual computation of distributed shares.

In the case of some items for which an amount is allocated by a simple mathematical formula, an apparent discrepancy may appear between the sum imputed by

the formula and the figure appearing in the amount column. Such differences generally result from carry-over or adjustment of aid transactions between one fiscal period and another.

For Census Bureau reporting of governmental statistics on a nationwide basis, uniform terminology and concepts for classification of the data are essential. Thus, treatment of State intergovernmental expenditure in this report sometimes will differ from the practice of individual States in the classification of certain transactions as State aid to local governments, the terminology applied to purposes for which aid is granted, or the designation of types of government receiving State aid.

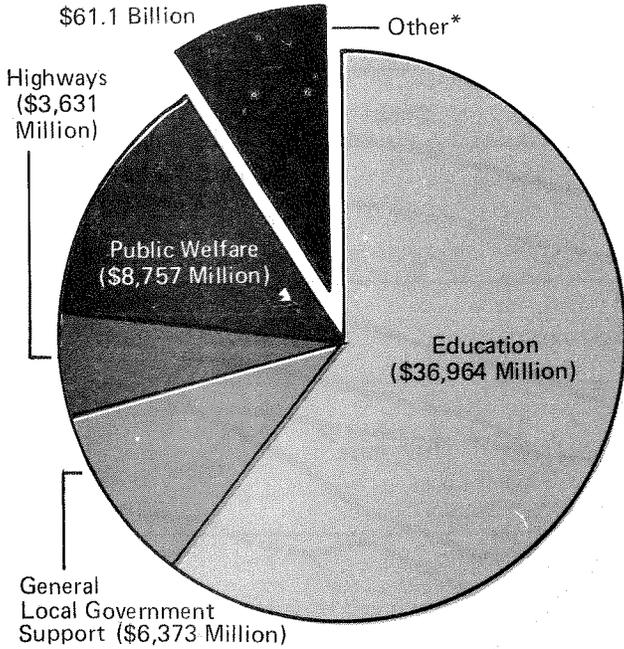

For similar reasons, amounts shown here, although compiled from detailed official records of the State, will in some instances differ from amounts shown for related items in certain published State reports.

The statistics presented in various tables of this report afford a basis for comparing amounts of aid to local governments provided by individual States. It is important that such comparisons take adequate account of the concept of intergovernmental expenditure that has been described above, and of the great variations which exist in the pattern of State-local responsibility for particular governmental functions throughout the Nation. Thus, State A directly provides public schools, local highways, or public assistance; State B grants to its local governments funds for local performance of these functions under State supervision. The total cost to each State government may be similar, although involving a different form of State expenditure in the two instances. Hasty conclusions and interpretations must therefore be avoided in this area, and interstate comparisons can be made only with caution and often with some qualification.

MAINE		MAINE—Continued	
EDUCATION (CITIES, TOWNS, AND SCHOOL DISTRICTS)		EDUCATION--CONTINUED	
NOTE: IN FISCAL 1977, ABOUT 50 PERCENT OF LOCAL EDUCATION EXPENDITURE WAS FINANCED BY STATE APPROPRIATION AND 50 PERCENT BY A STATE-MANDATED UNIFORM SCHOOL PROPERTY TAX, COLLECTIONS OF WHICH WERE PRIMARILY LOCALLY RETAINED. ONLY THE PORTION OF THE TAX IN EXCESS OF THE DETERMINED LOCAL ALLOCATION WAS TRANSMITTED TO THE STATE, FOR REDISTRIBUTION AMONG SCHOOL JURISDICTIONS FOR CONSTRUCTION. THE TAX WAS REPEALED BY REFERENDUM IN NOVEMBER 1977.		13. <u>ELEMENTARY AND SECONDARY EDUCATION AID (E.S.E.A.)</u> . FEDERAL FUNDS DISTRIBUTED ACCORDING TO PARTICULAR PROGRAM, INCLUDING AID FOR LOW INCOME AREAS, SUPPLEMENTARY EDUCATION PROJECTS, AND LIBRARIES:	
		CITIES, TOWNS, AND SCHOOL DISTRICTS . . . (1)	
1. <u>BASIC ALLOCATION</u> . AMOUNT APPROPRIATED; DISTRIBUTED IN AMOUNT EQUAL TO THE DIFFERENCE BETWEEN EACH SCHOOL DISTRICT'S UNIT ALLOCATION AND ITS UNIFORM SCHOOL TAX COLLECTIONS. UNIT ALLOCATIONS ARE THE SUM OF: (A) AVERAGE NUMBER OF PUPILS MULTIPLIED BY STATEWIDE PER PUPIL COST; AND (B) 90 PERCENT OF THE ESTIMATED COST OF EXPENDITURES FOR SPECIAL EDUCATION PROGRAMS, VOCATIONAL EDUCATION PROGRAMS, TRANSPORTATION AND BASES, PLUS DEBT SERVICE COSTS:		PUBLIC WELFARE (CITIES, TOWNS AND COUNTIES)	
CITIES, TOWNS, AND SCHOOL DISTRICTS . . . 145 553		1. <u>GENERAL RELIEF</u> . AMOUNT APPROPRIATED; DISTRIBUTED AS REIMBURSEMENT OF LOCAL EXPENDITURE FOR SUPPORT OF PERSONS WITHOUT LOCAL SETTLEMENT:	
2. <u>CONSTRUCTION AID</u> . AMOUNT APPROPRIATED; DISTRIBUTED FOR APPROVED CAPITAL PROJECTS:		CITIES AND TOWNS . . . 1 612	
CITIES, TOWNS, AND SCHOOL DISTRICTS . . . 8 845		2. <u>FOOD STAMPS PROGRAM</u> . AMOUNT APPROPRIATED; DISTRIBUTED AS PARTIAL REIMBURSEMENT FOR COSTS OF ADMINISTRATION:	
3. <u>EDUCATION OF EXCEPTIONAL CHILDREN</u> . AMOUNT APPROPRIATED; DISTRIBUTED FOR APPROVED AID PROGRAMS FOR PHYSICALLY OR MENTALLY HANDICAPPED, LEARNING DISABLED, AND SPEECH OR HEARING IMPAIRED:		COUNTIES 405	
CITIES, TOWNS, AND SCHOOL DISTRICTS . . . 8 711		GENERAL LOCAL GOVERNMENT SUPPORT (CITIES AND TOWNS)	
4. <u>PUPILS FROM UNORGANIZED TERRITORIES</u> . AMOUNT APPROPRIATED; DISTRIBUTED AS REIMBURSEMENT FOR TUITION AND OTHER COSTS OF EDUCATING PUPILS FROM UNORGANIZED AREAS:		1. <u>MUNICIPAL REVENUE SHARING</u> . AMOUNT EQUAL TO 4 PERCENT OF THE REVENUE FROM GENERAL SALES AND INCOME TAXES; DISTRIBUTED ACCORDING TO STATUTORY FORMULA TAKING INTO ACCOUNT POPULATION AND LOCAL TAX EFFORT:	
CITIES, TOWNS, AND SCHOOL DISTRICTS . . . 76		CITIES AND TOWNS . . . 9 888	
5. <u>REGIONAL TECHNICAL AND VOCATIONAL CENTERS</u> . AMOUNT APPROPRIATED; DISTRIBUTED AS PARTIAL REIMBURSEMENT OF OPERATIONAL COSTS:		2. <u>PERSONAL PROPERTY TAX REIMBURSEMENT</u> . AMOUNT REQUIRED; DISTRIBUTED ON BASIS OF LOST REVENUE RESULTING FROM EXEMPTION OF CERTAIN BUSINESS INVENTORIES FROM LOCAL PROPERTY TAXATION:	
CITIES, TOWNS, AND SCHOOL DISTRICTS . . . 237		CITIES AND TOWNS . . . 1 846	
6. <u>TRANSPORTATION OF PRIVATE SCHOOL PUPILS</u> . AMOUNT APPROPRIATED; DISTRIBUTED AS REIMBURSEMENT FOR 90 PERCENT OF THE COST OF TRANSPORTING PUPILS TO NONPUBLIC SCHOOLS:		3. <u>TREE GROWTH TAX LAW</u> . AMOUNT REQUIRED; DISTRIBUTED AS REIMBURSEMENT FOR LOST PROPERTY TAX REVENUE RESULTING STATE-MANDATED REVALUATION OF FOREST LANDS; WHERE SUCH LANDS ASSESSED VALUATION WAS REDUCED BY GREATER THAN 10 PERCENT OF BASE YEAR (1972) ASSESSED VALUATION:

¹In accordance with Ohio law, employers' contributions to the State-operated Teachers Retirement System and Public School Employees Retirement System are deducted from each school district's foundation aid allocation, and paid directly into the respective retirement system funds. Amounts so deducted for 1976-77 were \$207,826,000 for the State Teachers Retirement System and \$50,839,000 for the School Employees Retirement System.

²Cincinnati.
