**Exploring the Intricate Layers of State and Local Governments: Idaho**

**The Governments Division of the U.S. Census Bureau**

**Importance of the Data**

Government is an intricate and perplexing subject to understand at every level. Traditional federalism is no longer the case. We now live in a time when all the layers of government are intertwined and dependent upon one another. Providing every American with the most comprehensive, comparable, and precise account of government financial activity is what the U.S. Census Bureau strives to accomplish with the release of every product. With the release of each product from the Governments Division, we provide policy analysts, researchers, and the general public with a more complete and clearer picture of the U.S. government. Whether it is public employment, government finance, or federal government grants, the picture is complete with the cooperation of thousands of federal, state, and local governments and dependent agencies who supply their data to the Census Bureau quarterly or annually for our surveys, or quinquennially for the Censuses of Governments. By providing us with these data, we can address the issues that concern state and local governments as well as their relationships to each other and the federal government.

**How the Data Are Used**

Governments Division’s data are used to account for about 12 percent of the nation’s Gross Domestic Product and are the basis for the Flow of Funds for the Federal Reserve and the National Income and Product Accounts for the Bureau of Economic Analysis. These data serve as important indicators for national economic and public policy. Governments Division’s data serve as the foundation for developing national policy and analysis by a variety of entities—

**State and Local Governments:** Policy Research and Analysis, Allocating Funds, Comparative Analysis

**U.S. Congress:** Policy Research and Analysis

**Private Sector:** Research and Comparative Analysis

**Teachers and Students:** Educational Purposes

**Academic Professionals:** Policy Research and Analysis, Public Finance

**Federal Reserve:** Development of the Flow of Funds Accounts

**Bureau of Economic Analysis:** Development of the Public Sector Component of Gross Domestic Product

**Other Federal Agencies:** Measure Government Activities, Policy Research and Analysis

**General Public:** Research and Comparative Analysis
