

## Holdings of Selected Public- Employee Retirement Systems December 31, 1968

Major retirement systems in the United States covering employees of State and local governments held \$41.3 billion in cash and investment securities as of December 31, 1968. This amount represented an increase of 2 percent over the \$40.5 billion holdings reported 3 months earlier.

More than half of this sum, \$22.9 billion, was in the form of corporate bonds, as shown in the table below. The increase of \$0.5 billion in holdings of corporate bonds in 3 months reflects the continuing reliance on this form of security as the primary area of investment by the publicly operated retirement systems. The table also shows other major holdings of more than \$5 billion of United States Government securities, about \$5 billion invested in mortgages, and almost \$3.5 billion in corporate stocks. Investments in securities of State and local governments amounted to \$2 billion.

The total cash balances of \$358 million include interest-earning time deposits as well as

demand accounts; therefore, this amount does not entirely represent uninvested funds.

The 100 systems canvassed in this survey hold approximately 90 percent of the assets of all retirement systems operated by State and local governments throughout the United States, although more than 2,100 such systems were counted in the 1967 Census of Governments. The proportionate share of nongovernmental securities (corporate bonds and stocks, mortgages, etc.) held by the largest funds is especially high.

The statistics in this report are based on a quarterly mail survey which covers the 100 public-employee retirement systems in the United States with the largest amount of cash and security holdings. Usable reports are received each quarter from about nine-tenths of the systems canvassed. Estimates are developed for the remainder of the 100 systems from the latest available data.
