

Holdings of Selected Public Employee Retirement Systems

March 31, 1970

GR70 No.1
June 1970

U.S. DEPARTMENT OF COMMERCE/Bureau of the Census

Major retirement systems covering employees of State and local governments held \$47.0 billion in cash and investment securities as of March 31, 1970. This amount represents an increase of 2.6 percent over the \$45.8 billion holdings reported 3 months ago.

More than half, \$26.3 billion, of this sum is in corporate bonds. The continuing increase in holdings of corporate bonds indicates the reliance on this form of security as the primary area of investment by the publicly operated retirement systems. Holdings of \$4.5 billion of U.S. Government securities and \$2 billion of securities of State and local governments reflect the steady, though gradual, decrease in amounts of governmental securities held. Other major holdings include \$5.6 billion invested in mortgages and \$5.5 billion in corporate stocks.

The total cash balances of \$234 million include interest-earning time deposits as well as

demand accounts; therefore, this amount does not entirely represent uninvested funds.

The 100 systems canvassed in this survey hold approximately 90 percent of the assets of all retirement systems operated by State and local governments, although more than 2,100 such systems were counted in the 1967 Census of Governments. The proportionate share of non-governmental securities (corporate bonds and stocks, mortgages, etc.) held by the largest funds is especially high.

The statistics in this report are based on a quarterly mail survey which covers the 100 public employee retirement systems in the United States with the largest amount of cash and security holdings. Usable reports are received each quarter from about nine-tenths of the systems canvassed. Estimates are developed for the remainder of the 100 systems from the latest available data.
