

Holdings of Selected Public Employee Retirement Systems

U.S. DEPARTMENT OF COMMERCE Social and Economic Statistics Administration BUREAU OF THE CENSUS

GR75 No. 1

Issued June 1975

March 31, 1975

Major retirement systems covering employees of State and local governments held \$85.3 billion in cash and investment securities as of March 31, 1975. This amount represents an increase of 2.6 percent over the December 31, 1974 holdings of \$83.1 billion.

More than half, \$48.3 billion, of this sum is in corporate bonds. The continuing increase in dollar volume of corporate bonds indicates the reliance on this form of security as the primary area of investment by the publicly operated retirement systems. Other major holdings include \$18.4 billion invested in corporate stocks and \$6.7 billion in mortgages. Corporate stocks are generally reported at cost; therefore, the amounts shown do not reflect stock market fluctuations.

Holdings of Federal securities, which includes only U.S. Treasury obligations, amounted to \$1.5 billion; other market securities that are federally supported are included under "Other securities." State and local government securities totaled \$0.6 billion.

The total cash balance of \$795 million includes interest-earning time deposits as well

as demand accounts; therefore, this amount does not entirely represent uninvested funds.

Based on findings from the 1972 Census of Governments, it was noted that the panel of 100 systems previously used was no longer as representative as desired in relation to the total assets of the more than 2,300 public employee retirement systems now in existence. As a result, a new panel of 111 systems constituting approximately 85 percent of total assets for all systems has been selected and reported for the first time for the quarter ending September 30, 1974. The proportionate share of nongovernmental securities (corporate bonds and stocks, mortgages, etc.) held by the selected funds is especially high.

The statistics in this report are based on a quarterly mail survey which covers the 111 public employee retirement systems in the United States with the largest amount of cash and security holdings. Usable replies are received each quarter from about nine-tenths of the systems canvassed. Estimates are developed for the remainder of the selected systems from the latest available data.

**Cash and Security Holdings of Major Public-Employee Retirement Systems:
March 31, 1975 and Prior Quarters
(Millions of dollars)**

Date	Cash and security holdings
