

U.S. Department of Commerce
BUREAU OF THE CENSUS

GT80 No. 2

Issued September 1980

Finances of Selected Public Employee Retirement Systems

June 30, 1980

Major retirement systems covering employees of State and local governments held \$159.1 billion in cash and investment securities as of June 30, 1980. This amount represents an increase of 4.2 percent over the March 31, 1980 holdings of \$152.7 billion.

More than 40 percent, \$65.2 billion, of this sum is in corporate bonds. Other major holdings include \$33.3 billion invested in corporate stocks and \$11.9 billion in mortgages. Corporate stocks are generally reported at cost; therefore, the amounts shown do not reflect stock market fluctuations.

Beginning with the March 31, 1978 report, holdings of Federal securities include both United States Treasury obligations and Federal agency securities. In prior reports Federal agency securities were included under "Other securities." As of June 30, 1980, U.S. Treasury obligations amounted to \$14.5 billion and Federal agency securities \$13.6 billion. State and local government securities totaled \$4.0 billion.

The total cash balance of \$1.8 billion includes interest-earning time deposits as well as demand accounts; therefore, this amount does not entirely represent uninvested funds.

Detailed data for receipts and benefit and withdrawal payments are presented by quarter in table 2. In the quarter ending June 30, 1980, receipts totaled \$10.8 billion. Of this total \$5.4 billion were from government (employer) contributions, \$3.8 billion from earnings on investments, and \$1.6 billion from employee contributions. Benefit and withdrawal payments totaled \$2.9 billion. Of this total, benefit payments were \$2.5 billion and withdrawals \$0.4 billion.

The current panel of 106 systems constitutes approximately 85 percent of total assets of the more than 3,000 public employee retirement systems identified in the 1977 Census of Governments. The proportionate share of nongovernmental securities (corporate bonds and stocks, mortgages, etc.) held by the selected funds is especially high.

The statistics in this report are based on a quarterly mail survey which covers the 106 public employee retirement systems in the United States with the largest amount of cash and security holdings. Usable replies are received each quarter from about nine-tenths of the systems canvassed. Estimates are developed for each of the remaining systems in the panel from the latest available data. Data in this report are subject to possible inaccuracies in classi-

fication, response, and processing. Every effort is made to keep such errors to a minimum through care in examining, editing, and tabulating the data submitted.

It should be noted that some systems report all or part of receipts and expenditures on an "accrued" basis, and in some

cases receipts are accrued but expenditures are on a cash basis. Therefore, the relationship between quarterly revenues and expenditures does not directly tie to an equivalent change in "Cash and security holdings." However, these differences in the quarterly series will generally be resolved in the course of the fiscal year.
