**QUARTERLY SUMMARY OF STATE
AND LOCAL TAX REVENUE,
OCTOBER-DECEMBER 1963**

GOVERNMENTS DIVISION
Allen D. Manvel, Chief

G-TR63-No. 4

APRIL 1964

During the calendar year 1963, tax revenue received by State and local governments totaled \$46.0 billion, as compared with \$42.7 billion in 1962. Local tax revenue amounted to \$23.2 billion, and State taxes, \$22.7 billion. The 1963 total was distributed by type of tax as follows:

Type of tax	Amount (millions of dollars)	Percent
Total.....	45,964	100.0
Property.....	21,016	45.7
General sales and gross receipts.....	6,892	15.0
Motor fuel sales.....	4,004	8.7
Individual income.....	3,392	7.4
Motor vehicle and operators' licenses....	1,914	4.2
Corporation net income..	1,442	3.1
All other.....	7,304	15.9

This closely resembles the proportional distribution of State-local tax revenue for calendar year 1962.

State-local tax collections were 8.3 percent greater in the fourth quarter of calendar 1963 than in the same period of 1962. The trend was particularly marked for State taxes, up altogether about \$448 million or 9.8 percent from the fourth quarter of 1962. Fourth quarter local taxes increased 7.4 percent. Additional background on the diversity of collection timing for various taxes is available from a previous report.¹

Table 1 shows nationwide tax revenue amounts for the last 3 months of 1963 and for earlier quarterly intervals. These figures reflect a continuance of the upward trend in State-local taxes that has been indicated by recent annual Census Bureau reports on governmental finances.² It should be noted, however, that the

¹Tax revenue of State and Local Governments in Calendar 1962 (State and Local Government Special Study No. 46, issued August 1, 1963). That report included month-by-month nationwide totals of tax collections by level of government and by type of tax; property tax totals for each of the 123 most populous county-type areas, with a percentage distribution of such collection amounts by months; and quarterly statistics on the revenue of individual States from 5 major types of taxes.

²Statistics on State and local tax revenue are reported nationally and by States in the annual report, Governmental Finances in (year). More detailed figures on State tax revenue, with definitions of particular types of taxes, appear in various reports of the annual series on "State Finances."

statistics in those publications pertain to fiscal years (i. e., for most States and school districts the 12 months ended June 30, but for other governmental units commonly the calendar year or some other 12-month interval). Accordingly, the nationwide amounts shown in table 1 cannot be used in direct conjunction with fiscal year aggregates published for earlier periods to derive a consistent historical series of data.

Table 2 reports property tax collections of the most recent quarter and 12-month period for individual county areas that had at least 250,000 inhabitants in 1960. Table 3 shows the amounts collected by individual State governments from each of four major types of taxes. Additional background for the use and interpretation of these data appears in the report described in footnote 1.

CONCEPTS AND TERMINOLOGY

In this as well as other Census Bureau reports on governmental finances, the concept of "taxes" is intended to comprise all "compulsory contributions exacted by a government for public purposes, except employer and employee assessments for retirement and social insurance purposes, which are classed as insurance trust revenue." Outside the scope of this report, accordingly, are collections from the unemployment compensation "taxes" imposed by each of the State governments and the District of Columbia. Included, however, are all receipts from licenses and compulsory fees, including those which are imposed for regulatory purposes as well as those designed to provide revenue.

Tax revenue is defined to include related penalty and interest receipts, but to exclude protested amounts and refunds. The deduction from gross collections of amounts refunded is particularly significant with respect to motor fuel sales taxes ("gasoline" taxes).

The general nature of the several major kinds of taxes shown separately in this report will be suggested by their headings; explicit definitions appear in the report cited in footnote 1. Of the State-local collections summarized here briefly under the residual heading "All other taxes," a major portion (57 percent in the fiscal year 1962) involves selective sales taxes, such as those on cigarettes, liquor, and public utilities, with the balance involving various kinds of imposts, including death and gift taxes, severance taxes, general corporation licenses, and miscellaneous other licenses.

SOURCES OF DATA, AND LIMITATIONS

The statistics in this report are based mainly upon three mail surveys, dealing respectively with State-administered taxes, locally collected property taxes, and certain locally collected nonproperty taxes. These surveys provided a basis for 96 percent of the collection amounts summarized in table 1. The remaining 4 percent (making up 8 percent of the local government total, and representing about one-sixth of sums shown for "All other taxes" but only very small percentages of other tax classes) was imputed by reference to findings of recent annual Census Bureau surveys of local government finances.

Property tax amounts shown in table 1 are estimates based upon information about a stratified sample panel of 521 counties or county-type areas, which are served altogether by nearly 6,200 local tax collecting agencies. Month-by-month collection figures were requested by mail from all these agencies, and

reports were obtained from about 92 percent of them. Sampling variation was calculated for the property tax data thus developed from the initial sample survey, covering 1962. The sampling variation of the 12-month aggregate was determined to be less than 1 percent. That is, the chances are about 2 out of 3 that the estimated yearly total differs by less than 1 percent from the results that would have been obtained from a complete enumeration. The quarterly estimates were found subject to a sampling variability of $1\frac{1}{2}$ percent, and the single-month estimates generally showed sampling variability of about 2 to 4 percent.

A more detailed discussion of survey sources and methodology, and of data limitations, is to be found in the report cited in footnote 1.

ACKNOWLEDGMENT

Appreciation is extended to the numerous State and local officials who supplied basic data needed for the preparation of this report.

December 1962.....	42,738	21,202	21,536	19,593	6,341	3,777	3,191	1,342	1,809	6,685

Note: Because of rounding, detail may not add to totals. Property tax amounts are estimates subject to sampling variation. Of the nonproperty tax revenue shown, about 92 percent pertains to governments directly subject to survey for this report, with the remainder imputed mainly from findings of annual (fiscal year) surveys for 1962 and earlier years. See text discussion of "Sources of Data, and Limitations."
¹Revised.

Note: The amounts shown are not limited to locally imposed property taxes but are intended to include, where such an arrangement applies, any amounts of State-imposed property taxes collected on behalf of the State by local government offices. For most of the major areas listed, the reported amount pertains entirely or nearly so to locally imposed taxes, but the State tax portion makes up a significant part (generally 10 to 20 percent) of the collections shown for major counties of Alabama, Arizona, Kentucky, Nebraska, and Utah; and typically 2 to 9 percent of amounts shown for major counties of Colorado, Maryland, New Mexico, Texas, and Washington.

¹Revised.

Note: Differences between collections of successive periods may arise not only from trends in the volume of taxable items or transactions, but potentially also from any of numerous other factors, such as statutory changes in tax rate; changes (by either legislation or legal rulings) in the coverage of particular taxes; or major shifts in methods of tax collection or its timing, such as the adoption or revision of withholding procedures.

NA Signifies data not available.

¹Corporation income taxes tabulated with individual income taxes, allocation not available for individual State presentation.

²Not computed; data not strictly comparable.

³Partially estimated.

⁴Revised.

⁵Sales tax and individual income tax receipts combined; separate detail not available.

⁶Less than 0.05 percent.

⁷Increase of more than 100% reflecting major statutory or administrative changes.

QUARTERLY TAX REPORTS

STATES: FOURTH QUARTER OF 1963 AND PRIOR PERIODS
