Inventories, up four consecutive months, increased \$0.5 billion or 0.1 percent to \$616.0 billion. This was at the highest level since the series was first published on a NAICS basis in 1992 and followed a 0.6 percent September increase. The inventories-to-shipments ratio was 1.28, unchanged from September.

New Orders

New orders for manufactured durable goods in October, up five of the last six months, increased \$1.1 billion or 0.5 percent to \$217.9 billion, revised from the previously published slight increase. This followed a 9.1 percent September increase.

Machinery, up two consecutive months, had the largest increase, \$1.4 billion or 4.6 percent to \$31.3 billion.

New orders for manufactured nondurable goods increased \$2.7 billion or 1.1 percent to \$259.7 billion.

Shipments

Shipments of manufactured durable goods in October, down two of the last three months, decreased \$0.8 billion or 0.4 percent to \$222.7 billion, revised from the previously published 0.6 percent decrease. This followed a 0.5 percent September increase.

Transportation equipment, also down two of the last three months, had the largest decrease, \$0.6 billion or

1.0 percent to \$63.8 billion.

Shipments of manufactured nondurable goods, up four consecutive months, increased \$2.7 billion or 1.1 percent to \$259.7 billion. This followed a 0.9 percent September increase. Petroleum and coal products, also up four consecutive months, led the increase, up \$1.5 billion or 1.9 percent to \$78.8 billion.

Unfilled Orders

Unfilled orders for manufactured durable goods in October, up four of the last five months, increased \$2.8 billion or 0.3 percent to \$982.9 billion, revised from the previously published 0.2 percent increase. This followed a 0.1 percent September increase.

Transportation equipment, also up four of the last five months, had the largest increase, \$3.2 billion or 0.6 percent to \$576.9 billion.

Inventories

Inventories of manufactured durable goods in October, up thirty-three of the last thirty-four months, increased \$1.7 billion or 0.4 percent to \$374.5 billion, unchanged from the previously published increase. This was at the highest level since the series was first published on a NAICS basis and followed a 0.2 percent September increase.

Transportation equipment, also up thirty-three of the last thirty-four months, had the largest increase, \$1.1 billion or 1.0 percent to \$113.8 billion.

Inventories of manufactured nondurable goods, down following three consecutive monthly increases, decreased \$1.2 billion or 0.5 percent to \$241.5 billion. This followed a 1.1 percent September increase. Petroleum and coal products, also down following three consecutive monthly increases, drove the decrease, down \$1.3 billion or 2.3 percent to \$54.3 billion.

By stage of fabrication, October materials and supplies increased 0.2 percent in durable goods and decreased 0.5 percent in nondurable goods. Work in process increased 0.3 percent in durable goods and decreased 1.8 percent in nondurable goods. Finished goods increased 0.9 percent in durable goods and 0.1 percent in nondurable goods.

^b Preliminary^c Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes. See note at end of Table 2 relating to survey error and revision.

² Estimates and percent changes of shipments for the semiconductor industry are no longer shown separately, but are included in computers and electronic products, and all other applicable aggregate totals.

^P Preliminary^F Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Data on new orders are not available for the semiconductor industry. Estimates and percent changes for new orders exclude semiconductor industry data.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.

¹ The current month revisions are the difference between the advance percent change and the percent change as shown in this publication.

² The twelve month revisions are the differences between the month-to-month percent changes of the preliminary and final estimates. The monthly averages are the simple averages of the absolute values of the differences for the months specified. The advance to final percent change revisions for the durable goods industries are shown in the advance report for the month.

Survey Description

This report is compiled from results of the U.S. Census Bureau's Manufacturers' Shipments, Inventories, and Orders (M3) survey. This survey provides statistics on manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-in-process, and finished goods). The M3 includes approximately 4,300 reporting units. Units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 89 industry categories. Due to the small monthly sample, these 89 categories have been combined into 65 publication levels. The survey methodology assumes that the month-to-month changes of the total operations of those companies in the monthly survey effectively represent the month-to-month movements of all establishments that make up the category. The current coverage levels in the survey show that reported data in the monthly survey represent approximately 60 percent of the shipments estimates at the total manufacturing level. Data published represent manufacturing in a calendar month. The data collection is based on a voluntary survey authorized by Title 13 of the United States Code.

The data presented in this release are based on data obtained from a panel of 4,300 reporting units and provide an indication of the activity within the manufacturing sector. The results differ from what would be obtained from a complete enumeration of all manufacturing companies. In addition, a different panel of 4,300 companies would yield different results. The M3 panel is comprised of companies with \$500 million or more in shipments and a limited number of smaller companies. From a statistical perspective, the panel is not a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections will be published in the full report. Corrections received after the full report will be released in the next month's advance report. Any revisions made later than two months will be reflected in the annual benchmark publication.
