NEW RESIDENTIAL CONSTRUCTION IN FEBRUARY 2010

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for February 2010:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in February were at a seasonally adjusted annual rate of 612,000. This is 1.6 percent ($\pm 1.0\%$) below the revised January rate of 622,000, but is 11.3 percent ($\pm 1.8\%$) above the February 2009 estimate of 550,000.

Single-family authorizations in February were at a rate of 503,000; this is 0.2 percent ($\pm 1.0\%$)* below the revised January figure of 504,000. Authorizations of units in building with five units or more were at a rate of 89,000 in February.

HOUSING STARTS

Privately-owned housing starts in February were at a seasonally adjusted annual rate of 575,000. This is 5.9 percent ($\pm 10.0\%$)* below the revised January estimate of 611,000, but is 0.2 percent ($\pm 9.8\%$)* above the February 2009 rate of 574,000.

Single-family housing starts in February were at a rate of 499,000; this is 0.6 percent ($\pm 10.6\%$)* below the revised January figure of 502,000. The February rate for units in buildings with five units or more was 58,000.

HOUSING COMPLETIONS

Privately-owned housing completions in February were at a seasonally adjusted annual rate of 700,000. This is 5.4 percent ($\pm 20.2\%$)* above the revised January estimate of 664,000, but is 15.5 percent ($\pm 13.6\%$) below the February 2009 rate of 828,000.

Single-family housing completions in February were at a rate of 458,000; this is 4.3 percent ($\pm 13.7\%$)* above the revised January rate of 439,000. The February rate for units in buildings with five units or more was 236,000.

New Residential Construction data for March 2010 will be released on Friday, April 16, 2010, at 8:30 A.M. EDT.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 4 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ($\pm 3.2\%$) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about two percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
