BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

Alphabetically indexed by subject, this bibliography contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. Non-recurrent publications presenting compilations or estimates for several years or new types of data not available in regular series are also included.

Much valuable information may also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right-hand side of each page indicate where data from the report cited appear in the Statistical Abstract. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. It should not be assumed that all of the subjects from the original source are summarized in the Abstract.

Publications listed under each subject are divided into two groups in the main: "United States Government" and "Other." Publications of the Board of Governors of the Federal Reserve System are included under the "United States Government" category, although the Board is a quasi-governmental agency. The location of the publisher of each report is given except for Federal governmental agencies located in Washington. Major reports, such as the Census of Population which consists of many volumes, are listed by their general, all-inclusive titles rather than their specific volume numbers and subtitles. The final reports of the 1950 Censuses which include those on the Censuses of Agriculture, Population, and Housing, are listed at the end of the bibliography together with the final reports of the 1948 Census of Business and the 1947 Census of Manufactures.
