ESTIMATES OF THE POPULATION OF THE UNITED STATES TO SEPTEMBER 1, 1969

(All estimates in this report include Alaska and Hawaii. Estimates for each month from January 1, 1950, to December 1, 1959, and estimates for July 1 of each year from 1900 to 1949 are given in Current Population Reports, Series P-25, No. 418)

The total population residing in the United States (excluding Armed Forces abroad) was about 202,319,000 on Sept. 1, 1969, according to estimates released today by the Bureau of the Census, Department of Commerce. This figure represents an increase of 22,996,000, or 12.8 percent, since April 1, 1960, the date of the most recent census, and an increase of 2,073,000, or 1.0 percent, over the estimate for the corresponding month a year ago.

This report presents estimates for (1) the total population including Armed Forces abroad, (2) the total resident population, and (3) the civilian resident population, for selected months back to January 1, 1950.

The estimates in this report agree with the figures published in Current Population Reports, Series P-25, No. 418, which also presents data

on the components of population change (births, deaths, and net immigration) for the period 1940 to 1969.

The estimates shown here are based on the total population counts from the 1960 and 1950 Censuses; statistics on births and deaths provided by the National Center for Health Statistics, U.S. Public Health Service; statistics on immigration and emigration provided by the Immigration and Naturalization Service, Department of Justice; data on civilian citizens abroad provided by the Department of Defense and the Civil Service Commission; data on movement between Puerto Rico and the United States mainland provided by the Puerto Rico Planning Board; and data on the Armed Forces provided by the Department of Defense. For a complete discussion of the estimating procedure used in deriving these estimates, see Current Population Reports, Series P-25, No. 418.
