## ESTIMATES OF THE POPULATION OF THE UNITED STATES TO JUNE 1, 1975

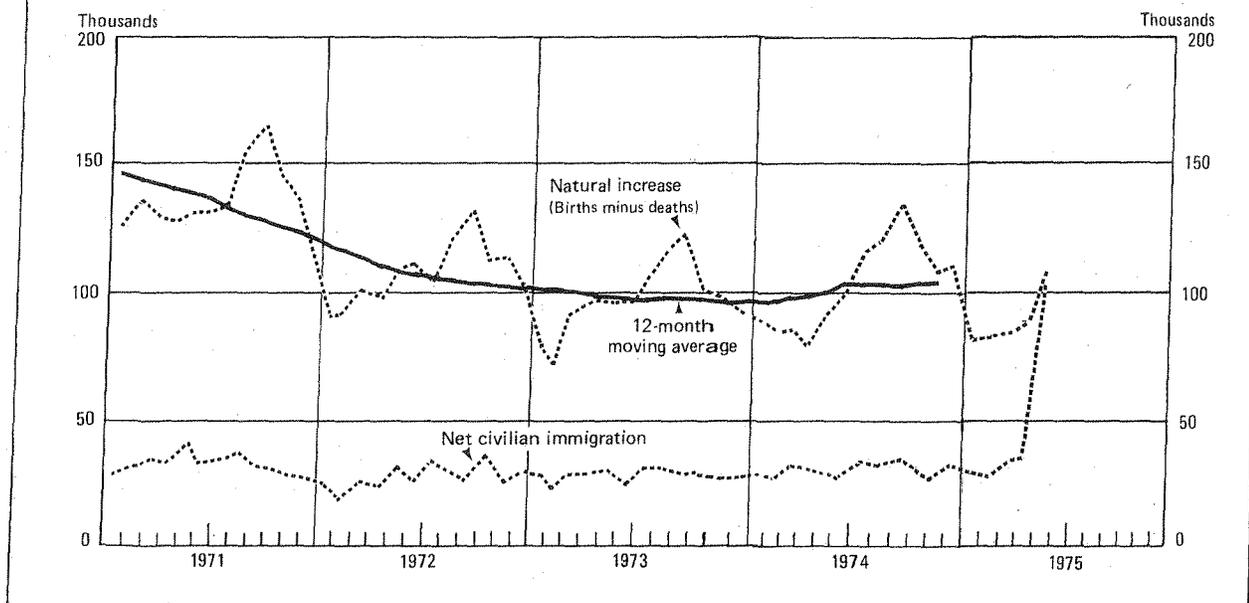

The total population of the United States (including Armed Forces overseas) was about 213,466,000 on June 1, 1975, according to estimates released today by the Bureau of the Census, Department of Commerce. This figure represents an increase of 1,702,000, or 0.8 percent, over the estimate for the corresponding month a year ago; and an increase of 208,000 over the previous month.<sup>1</sup> The monthly gain was the result of a natural increase of 108,000 (excess of births over deaths), and estimated net civilian immigration of 101,000. (See

chart below. Data are adjusted for number of days in the month.) The June 1, 1975, total population represents an increase of 9,131,000 over the population on April 1, 1970, the date of the census upon which these estimates are based.

This report presents estimates for (1) the total population including Armed Forces overseas, (2) the resident population, and (3) the civilian population, for selected months back to January 1, 1970. The population coverage shown by the Census Clock in the lobby of the Department of Commerce includes, in addition to the total population including Armed Forces overseas,

<sup>1</sup>Includes approximately 70,000 Vietnamese refugees who entered the United States during May.
