## ESTIMATES OF THE POPULATION OF THE UNITED STATES TO APRIL 1, 1976

The total population of the United States (including Armed Forces overseas) was about 214,850,000 on April 1, 1976, according to estimates released today by the Bureau of the Census, Department of Commerce. This figure represents an increase of 1,715,000, or 0.8 percent, over the estimate for the corresponding month a year ago; and an increase of 109,000 over the previous month. The monthly gain was the result of a natural increase of 78,000 (excess of births over deaths), and estimated net civilian immigration of 32,000. (See chart below. Data are adjusted for number of days in the

month.) The April 1, 1976, total population represents an increase of 10,515,000 over the population on April 1, 1970, the date of the census upon which these estimates are based.

This report presents estimates for (1) the total population including Armed Forces overseas, (2) the resident population, and (3) the civilian population, for selected months back to January 1, 1970. overseas civilian employees of the Federal Government, their dependents, and the dependents of the Armed Forces overseas. On April 1, 1970, this population was 204,839,000.

For a complete discussion of the estimating procedure used in deriving these estimates, see Current Population Reports, Series P-25, No. 545.
