## Estimates of the Population of the United States to July 1, 1979

The total population of the United States (including Armed Forces overseas) was about 220,415,000 on July 1, 1979 according to estimates released today by the Bureau of the Census, Department of Commerce. This figure represents an increase of 1,867,000 or 0.9 percent over the estimate for the corresponding month a year ago, and an increase of 169,000 over the previous month. The monthly gain was the result of a natural increase of 129,000 (excess of births over deaths), and estimated net civilian immigration of 40,000. (See chart below. Data are adjusted for number of days in the month.) The July 1, 1979 total population represents an

increase of 16,080,000 over the population on April 1, 1970, the date of the census upon which the estimates are based.

This report presents estimates for (1) the total population including Armed Forces overseas, (2) the resident population, and (3) the civilian population for selected months back to January 1, 1970. Justice; data on civilian citizens abroad provided by the Department of Defense and the Civil Service Commission; data on movement between Puerto Rico and the United States mainland provided by the Puerto Rico Planning Board; and data on the Armed Forces provided by the Department of Defense.
