# Population Estimates and Projections

Series P-25, No. 1028  
Issued July 1988

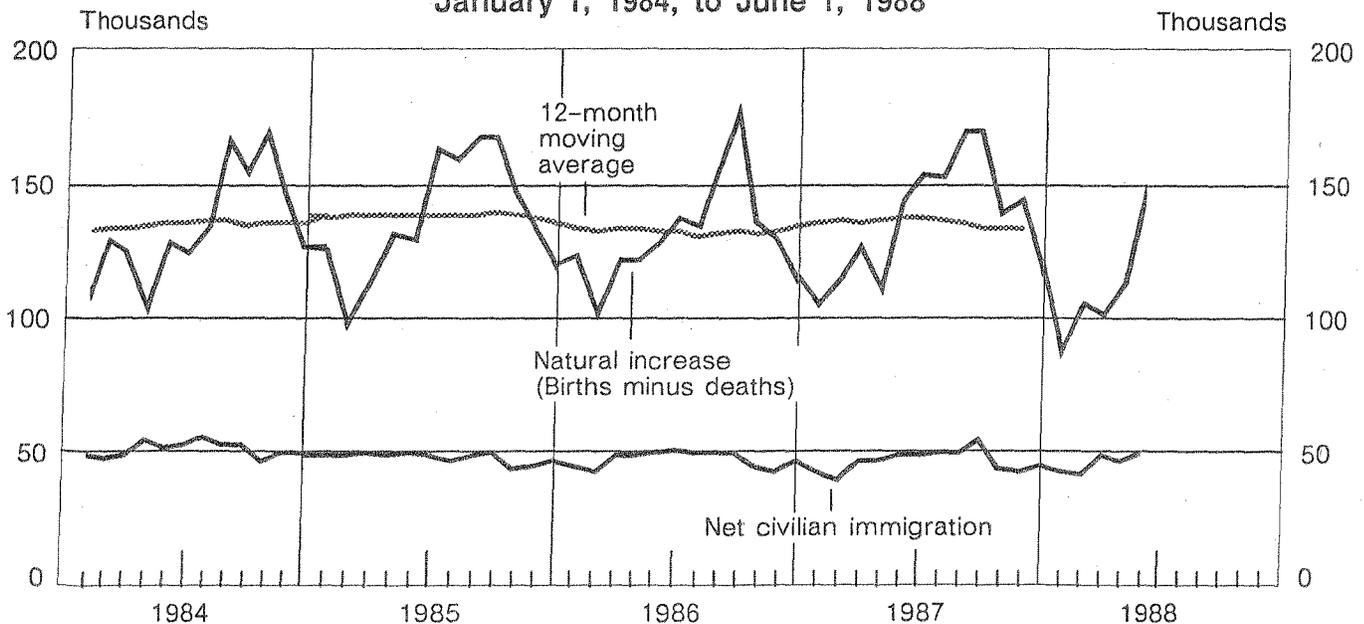

## Estimates of the Population of the United States to June 1, 1988

The total population of the United States (including Armed Forces overseas) was estimated to be approximately 245,898,000 on June 1, 1988. This figure represents an increase of 2,187,000 or 0.9 percent over the estimate for the corresponding month a year ago, and an increase of 202,000 over the previous month. The monthly gain was the result of a natural increase of 153,000 (excess of births over deaths) and estimated net civilian immigration of 50,000. (See chart below. Data are adjusted for number of days in the month.) The June 1, 1988, total population represents an increase of 18,837,000 over the population counted on April 1, 1980, which serves as the beginning point for the estimate.

This report presents estimates for months back to April 1, 1980, of the (1) total population including Armed Forces overseas, (2) resident population,

and (3) civilian population. The estimates are based on data from the decennial census; statistics on births and deaths provided by the National Center for Health Statistics, U.S. Public Health Service; statistics on immigration provided by the Immigration and Naturalization Service, Department of Justice; data on Federal civilian employees abroad and their dependents provided by the Department of Defense and the Office of Personnel Management; data on movement between Puerto Rico and the 50 States (including the District of Columbia) provided by the Puerto Rico Planning Board; and data on the Armed Forces provided by the Department of Defense. For a complete discussion of the estimating procedure used in deriving these estimates, see Current Population Reports, Series P-25, No. 1022.

**Components of Population Change, by Month:  
January 1, 1984, to June 1, 1988**

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Estimates of the Population, by Type: April 1, 1980, to June 1, 1988

(In thousands. Includes Alaska and Hawaii in all years. Estimates for each month from January 1, 1950, to January 1, 1985, are given in Current Population Reports, Series P-25, No. 1006)
