Population Estimates and Projections

Series P-25, No. 1073
Issued May 1991

Estimates of the Population of the United States to March 1, 1991

(The population counts set forth herein are subject to possible correction for undercount or overcount. The United States Department of Commerce is considering whether to correct these counts and will publish corrected counts, if any, not later than July 15, 1991)

The total population of the United States (including Armed Forces overseas) was estimated to be approximately 251,782,000 on March 1, 1991. This figure represents an increase of 2,748,000 or 1.1 percent over the estimate for the corresponding month a year ago, and an increase of 190,000 over the previous month. The monthly gain was the result of a natural increase of 136,000 (excess of births over deaths) and estimated net civilian immigration of 54,000. (See chart below. Data are adjusted for number of days in the month.) The March 1, 1991, total population represents an increase of 2,537,000 over the population counted on April 1, 1990, which serves as the beginning point for the estimate.

This report presents estimates for months back to April 1, 1980, of the (1) total population including Armed Forces

overseas, (2) resident population, and (3) civilian population. The estimates are based on data from the decennial census; statistics on births and deaths provided by the National Center for Health Statistics, U.S. Public Health Service; statistics on immigration provided by the Immigration and Naturalization Service, Department of Justice; data on Federal civilian employees abroad and their dependents provided by the Department of Defense and the Office of Personnel Management; data on movement between Puerto Rico and the 50 States (including the District of Columbia) provided by the Puerto Rico Planning Board; and data on the Armed Forces provided by the Department of Defense. For a discussion of the estimating procedure used in deriving these estimates, see Current Population Reports, Series P-25, No. 1045.

Estimates of the Population, by Type: April 1, 1980, to March 1, 1991

(In thousands. Estimates for each month from January 1, 1950, to March 1, 1980, are given in Current Population Reports, Series P-25, No. 1045. Estimates for months after April 1, 1980, not shown here are available on request. These are the first estimates to reflect the census of April 1, 1990, and are subject to change.)
