Program Overview

The Census Bureau established the 2010 Census Count Question Resolution (CQR) Program by which state, local, and tribal area elected officials may challenge their jurisdiction's 2010 Census counts. On June 1, 2011, the Count Question Resolution (CQR) Program began accepting 2010 Census challenge submissions. All challenges must be received by the Census Bureau no later than June 1, 2013.

The U.S. Census Bureau partnered with state, local, and tribal governments across the nation to help ensure a complete and accurate count in the 2010 Census. The Census Bureau's goal was to count everyone once, only once, and in the right place. There are historically a small percentage of cases where a wrong geographic boundary or coding of a housing unit was used to produce the official census population and housing counts for a local area. There may also be processing errors. The Census Bureau will not collect any additional data during the challenge process.

If a challenge results in a change, the Census Bureau will issue official revised counts to the affected governments. These changes can be used by the governments for future programs that require official 2010 Census data. They will also be used to calculate subsequent population estimates for that community.

Corrected 2010 Census Total Population, Household Population, Group Quarters Population, Total Housing Unit, Occupied Housing Unit, and Vacant Housing Unit Counts for the United States, States, and Puerto Rico

Note: Corrected counts are the result of the 2010 Census Count Question Resolution (CQR) Program.

Federal Register/Vol. 75, No.101/Wednesday, May 26, 2010 (Abstract): *The CQR program is not a mechanism or process to challenge or revise the population counts sent to the President by December 31, 2010, which are used to apportion the U.S. House of Representatives.*

This table presents census counts only when there is a CQR change that affects a state or Puerto Rico level total. In this table, the number of governmental units for the United States counted as "affected" includes any change to the totals for the United States, states, counties, functioning county subdivisions, and incorporated places. In this table, the number of governmental units for Puerto Rico counted as "affected" includes any change to the totals for the Commonwealth of Puerto Rico and any municipio. To obtain detailed geographic counts, use the GU link to go to governmental units listings, the T/B link to go to the census tract/block listings, and the AIANHH link to go to the American Indian Area/Alaska Native Area/Hawaiian Home Land listings.

For definitions, see U.S.Census Bureau, *2010 Census Summary File 1 - Technical Documentation* 2011. See also <http://www.census.gov/prod/cen2010/doc/sf1.pdf>.

Number of governmental units in the United States affected by CQR to date = 35
Number of governmental units in Puerto Rico affected by CQR to date = 0

2010 Census Redistricting Data (Public Law 94-171) Summary File Data Note 1

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel, is placed in an incorrect location. As a result of a geocoding error, the Census Bureau provided in March 2011 revised population counts for two 2010 Census tabulation blocks in Norfolk, Virginia. The geocoding error placed ships ported at the Norfolk Naval Station incorrectly in block 1000, census tract 38, Norfolk city. These ships correctly belong in block 1044, census tract 9.02, Norfolk city.

The corrected and original population counts are:

Population in corrected block 1000, census tract 38	Population in corrected block 1044, census tract 9.02	Population in original block 1000, census tract 38	Population in original block 1044, census tract 9.02

2010 Census Redistricting Data (Public Law 94-171) Summary File Data Note 2

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel, is placed in an incorrect location. We discovered a systematic error in the manner in which a few military vessels were geocoded, including an error involving Coronado city and San Diego city, California. As a result, the Census Bureau provided in March 2011 revised population counts for two 2010 Census tabulation blocks.

The corrected and original population counts are:

2010 Census Redistricting Data (Public Law 94-171) Summary File Data Note 3

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel, is placed in an incorrect location. We discovered a systematic error in the manner in which a few military vessels were geocoded, including an error involving Groton city and Conning Towers Nautilus Park census designated place (CDP), both of which are located in Groton town, New London County, Connecticut. As a result, the Census Bureau provided in March 2011 revised population counts for two 2010 Census tabulation blocks.

The corrected and original population counts are:

Population in corrected block 1001, census tract 7026, Groton city, CT	Population in corrected block 1020, census tract 9800, Conning Towers Nautilus Park CDP, CT	Population in original block 1001, census tract 7026, Groton city, CT	Population in original block 1020, census tract 9800, Conning Towers Nautilus Park CDP, CT

2010 Census Redistricting Data (Public Law 94-171) Summary File Data Note 4

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel, is placed in an incorrect location. We discovered a systematic error in the manner in which a few military vessels were geocoded, including an error involving Pascagoula city, Mississippi. As a result, the Census Bureau provided in March 2011 revised population counts for two 2010 Census tabulation blocks.

The corrected and original population counts are:

Population in corrected block 1305, census tract 429, Pascagoula city, MS	Population in corrected block 1278, census tract 429, Pascagoula city, MS	Population in original block 1305, census tract 429, Pascagoula city, MS	Population in original block 1278, census tract 429, Pascagoula city, MS

Arkansas (05)

Hiwasse CDP (32535), Benton County (007)

Hiwasse CDP FIPS Place Code (PLACE) should be 32530; it is incorrectly shown as 32535.

Vaugine township (93783), Jefferson County (069)

Vaugine township should not contain Block 3012 in Census Tract 3.02; this block should be in Washington township (93918). The change for this block removes White Hall city (75170) from Vaugine township. The affected area contains 0 population, 0 housing units, and a land area of 1,027 square meters (rounds to 0.000 square miles). The correct land area for Vaugine township is 176,178,788 square meters (68.023 square miles).

Washington township (93918), Jefferson County (069)

Washington township should contain Block 3012 in Census Tract 3.02; it is erroneously coded to Vaugine township (93783). The change for this block makes White Hall city (75170) exist only in Washington township. The affected area contains 0 population, 0 housing units, and a land area of 1,027 square meters (rounds to 0.000 square miles). The correct land area for Washington township is 161,039,026 square meters (62.178 square miles).

White Hall city (75170), Jefferson County (069)

White Hall city should not exist in Vaugine township (93783). Block 3012 in Census Tract 3.02 (and in White Hall city) should be Washington township; it is erroneously coded to Vaugine township (93783). The change for this block makes White Hall city (75170) exist only in Washington township.

Ohio (39)

Congressional Districts 5, 9, and 13

Ohio's congressional district plan, as provided to the Census Bureau, did not provide congressional district assignments for water blocks within the Great Lakes for the 111th Congress. There are 118 water blocks that should be coded to no congressional district and are incorrectly assigned to congressional districts 5, 9, and 13. These changes occurred in the following five counties: Erie (043), Lorain (093), Lucas (095), Ottawa (123), and Sandusky (143).

Due to errors in coding, there were six blocks where no congressional district was unassigned contained polygons coded as land. The total land area where no congressional district was assigned is 13,375 square meters (0.005 square miles). One block—Block 4001, Census Tract 512, in Ottawa County—had 0 population, but 1 housing unit in a block not assigned to a congressional district.

Ohio (39)

Congressional Districts 5, 9, and 13

Ohio's congressional district plan, as provided to the Census Bureau, did not provide congressional district assignments for water blocks within the Great Lakes for the 111th Congress. There are 118 water blocks that should be coded to no congressional district and are incorrectly assigned to congressional districts 5, 9, and 13. These changes occurred in the following five counties: Erie (043), Lorain (093), Lucas (095), Ottawa (123), and Sandusky (143).

Due to errors in coding, there were six blocks where no congressional district was unassigned contained polygons coded as land. The total land area where no congressional district was assigned is 13,375 square meters (0.005 square miles). One block—Block 4001, Census Tract 512, in Ottawa County—had 0 population, but 1 housing unit in a block not assigned to a congressional district.

Amanda-Clearcreek Local School District (04684) [unified school district], Fairfield (045) and Muskingum (119) Counties

Data Note 1

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel, is placed in an incorrect location. As a result of a geocoding error, the Census Bureau is providing revised population counts for two 2010 Census tabulation blocks in Norfolk, Virginia. The geocoding error placed ships ported at the Norfolk Naval Station incorrectly in block 1000, census tract 38, Norfolk city. These ships correctly belong in block 1044, census tract 9.02, Norfolk city.

The corrected and original population counts are:

Population in corrected block 1000, census tract 38	Population in corrected block 1044, census tract 9.02	Population in original block 1000, census tract 38	Population in original block 1044, census tract 9.02

Ohio (39)

Congressional Districts 5, 9, and 13

Ohio's congressional district plan, as provided to the Census Bureau, did not provide congressional district assignments for water blocks within the Great Lakes for the 111th Congress. There are 118 water blocks that should be coded to no congressional district and are incorrectly assigned to congressional districts 5, 9, and 13. These changes occurred in the following five counties: Erie (043), Lorain (093), Lucas (095), Ottawa (123), and Sandusky (143).

Due to errors in coding, there were six blocks where no congressional district was unassigned contained polygons coded as land. The total land area where no congressional district was assigned is 13,375 square meters (0.005 square miles). One block—Block 4001, Census Tract 512, in Ottawa County—had 0 population, but 1 housing unit in a block not assigned to a congressional district.

Amanda-Clearcreek Local School District (04684) [unified school district], Fairfield (045) and Muskingum (119) Counties

Congressional Districts

Wisconsin's congressional district plan, as provided to the Census Bureau, did not provide congressional district assignments for area within parts of the Great Lakes for the 111th Congress. Due to errors in coding, 33 blocks where no congressional district was unassigned contained polygons coded as land. The total land area where no congressional district was assigned is 566,304 square meters (0.219 square miles). Four blocks contained one or more housing units and one block contained population in a block not assigned to a congressional district.

2010 Census Summary File 1
Data Note 1

Technical Note on Comparing Statistics on Same-Sex-Couple Households Between the 2010 Census and the American Community Survey

Tabulations from the 2010 Census Summary File 1 present detailed geographical information on the number of same-sex unmarried-couple households. This number combines those who initially reported that they were spouses of the householder and those who were unmarried partners of the householder.

Tables PCT15 and PCT17 in Summary File 1 show the presence of children in the household.

In the Same-Sex-Couple Households Summary File, released after Summary File 1, an additional table further specifies if the partner of the householder reported that he or she was the spouse of the householder. This is the first time such detailed data have been released from any decennial census.

Since 2005, statistics on characteristics of same-sex-couple households—both for those identified as spouses and as unmarried partners—have been released from the American Community Survey (ACS).[1] The American Community Survey is a nationally representative household survey of 3 million households that contains detailed social, economic, and housing items formerly contained on the long or sample form of the decennial census.

Data users are advised not to make comparisons of estimated numbers of same-sex-couple households between the ACS and the 2010 Census because of differences in data collection procedures. Although the majority of both ACS and census returns were collected via mail, differences occur in the data collection instruments for the households not responding by mail.

For the 2010 Census, individual enumerators were sent out to the nonresponding households and were administered a paper form for Nonresponse Follow-Up (NRFU). The ACS did not employ a paper form for follow-up but collected the information in person using a laptop computer (CAPI) or by telephone using a computerized instrument (CATI). These instruments had a key collection component that was absent from the paper form. When an interviewer recorded that a household was headed by a same-sex spouse, a message in a "pop-up box" appeared on the instrument screen that prompted the interviewer to verify the responses to the relationship and the gender items. Previous Census Bureau research has demonstrated the sensitivity of same-sex-couple estimates to different data collection procedures.[2] Subsequent analysis of 2010 Census data on same-sex-couple households will be forthcoming and will address any differences noted between the 2010 Census and the ACS in the estimates of same-sex-couple households.

Data Note 2

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel, is placed in an incorrect location. As a result of a geocoding error, the Census Bureau is providing revised population counts for two 2010 Census tabulation blocks in Norfolk, Virginia. The geocoding error placed ships ported at the Norfolk Naval Station incorrectly in block 1000, census tract 38, Norfolk city. These ships correctly belong in block 1044, census tract 9.02, Norfolk city.

The corrected and original population counts are:

Population in corrected block 1000, census tract 38	Population in corrected block 1044, census tract 9.02	Population in original block 1000, census tract 38	Population in original block 1044, census tract 9.02

Ohio (39)

Congressional Districts 5, 9, and 13

Ohio's congressional district plan, as provided to the Census Bureau, did not provide congressional district assignments for water blocks within the Great Lakes for the 111th Congress. There are 118 water blocks that should be coded to no congressional district and are incorrectly assigned to congressional districts 5, 9, and 13. These changes occurred in the following five counties: Erie (043), Lorain (093), Lucas (095), Ottawa (123), and Sandusky (143).

Due to errors in coding, there were six blocks where no congressional district was unassigned contained polygons coded as land. The total land area where no congressional district was assigned is 13,375 square meters (0.005 square miles). One block—Block 4001, Census Tract 512, in Ottawa County—had 0 population, but 1 housing unit in a block not assigned to a congressional district.

Technical Note on Comparing Statistics on Same-Sex Couple Households Between the 2010 Census and the American Community Survey

Tabulations from the 2010 Census Summary File 1 present detailed geographical information on the number of same-sex unmarried-couple households. This number combines those who initially reported that they were spouses of the householder and those who were unmarried partners of the householder.

Tables PCT15 and PCT17 in Summary File 1 show the presence of children in the household.

Since 2005, statistics on characteristics of same-sex couple households—both for those identified as spouses and as unmarried partners—have been released from the American Community Survey (ACS).[1] The ACS is a nationally representative household survey of 3 million households that contains detailed social, economic, and housing items formerly contained on the long or sample form of the decennial census.

Data users are advised not to make comparisons of estimated numbers of same-sex couple households between the ACS and the 2010 Census because of differences in data collection procedures. Although the majority of both ACS and census returns were collected via mail, differences occur in the data collection instruments for the households not responding by mail.

For the 2010 Census, individual enumerators were sent out to the nonresponding households and were administered a paper form for Nonresponse Follow-Up (NRFU). The ACS did not employ a paper form for follow-up but collected the information in person using a laptop computer (CAPI) or by telephone using a computerized instrument (CATI). These instruments had a key collection component that was absent from the paper form. When an interviewer recorded that a household was headed by a same-sex spouse, a message in a "pop-up box" appeared on the instrument screen that prompted the interviewer to verify the responses to the relationship and the gender items. Previous Census Bureau research has demonstrated the sensitivity of same-sex couple estimates to different data collection procedures.[2] Subsequent analysis of 2010 Census data on same-sex couple households has examined the differences noted between the 2010 Census and the ACS in the estimates of same-sex couple households.[3]

Data Note 2

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel, is placed in an incorrect location. As a result of a geocoding error, the Census Bureau is providing revised population counts for two 2010 Census tabulation blocks in Norfolk, Virginia. The geocoding error placed ships ported at the Norfolk Naval Station incorrectly in block 1000, census tract 38, Norfolk city. These ships correctly belong in block 1044, census tract 9.02, Norfolk city.

The corrected and original population counts are:

Population in corrected block 1000, census tract 38	Population in corrected block 1044, census tract 9.02	Population in original block 1000, census tract 38	Population in original block 1044, census tract 9.02

Ohio (39)

Congressional Districts 5, 9, and 13

Ohio's congressional district plan, as provided to the Census Bureau, did not provide congressional district assignments for water blocks within the Great Lakes for the 111th Congress. There are 118 water blocks that should be coded to no congressional district and are incorrectly assigned to congressional districts 5, 9, and 13. These changes occurred in the following five counties: Erie (043), Lorain (093), Lucas (095), Ottawa (123), and Sandusky (143).

Due to errors in coding, there were six blocks where no congressional district was unassigned contained polygons coded as land. The total land area where no congressional district was assigned is 13,375 square meters (0.005 square miles). One block—Block 4001, Census Tract 512, in Ottawa County—had 0 population, but 1 housing unit in a block not assigned to a congressional district.

Population Count Data — American Samoa
Data Note 1

Geocoding errors can occur when a living quarter such as a house, apartment, or military vessel is placed in an incorrect location. As a result of a geocoding error, the Census Bureau provided in January 2012 revised population counts for two county subdivisions in American Samoa. The geocoding error placed populations incorrectly in Sua County. This population correctly belongs in Tualauta County. The total population count of 55,519 released on August 25, 2011, remains the same for American Samoa. All data products will reflect this correction.

The corrected and original population counts are:

Population in original Western District, Tualauta County, AS	Population in corrected Western District, Tualauta County, AS	Population in original Eastern District, Sua County, AS	Population in corrected Eastern District, Sua County, AS
20,249	20,858	3,932	3,323
