MAP
SHOWING THE PROPORTION OF DEATHS FROM
INTESTINAL DISEASES
TO DEATHS FROM ALL CAUSES
compiled from the Returns of Mortality at the Ninth Census
OF THE UNITED STATES 1870
BY
FRANCIS J. WALKER.

Explanations:
1st. The areas indicate the proportion of deaths from Intestinal Diseases to the whole mortality.
2d. Figures in blue, 1-2-4-6-8-24, express the number of inhabitants in the square mile.
3d. Darker lines in blue indicate the parish line of a population of 10,000 or 20,000.
4th. The shading indicates the proportion of deaths from Intestinal Diseases in each county.

Scale:
100 miles = 1 inch.
