COMPARABILITY OF CENSUS TRACTS, 1960 AND 1950

Only Hamilton County was tracted for 1950. However, the numbering system and the majority of census tracts in Hamilton County outside Cincinnati city, were completely revised since 1950. Consequently, only the tracts in Cincinnati city that are not comparable to the 1950 tracts and the 1960 tracts outside Cincinnati that were not revised, are being shown.

NOTE ON BIAS IN SAMPLE STATISTICS

Sample statistics of certain census tracts may be subject to substantial bias as the result of (a) under- or overenumeration in the sample, or (b) inadequate reporting of information for sample items. Among tracts with 1,000 inhabitants or more, there was one case where one or more component ED's (comprising more than 20 percent of the total population of the tract) had allocation rates of 50 percent or more for a majority of the sample items. In tract O-9, such ED's comprised 36 percent of the total population of the tract. The extent to which cancellation and replication of sample items may have affected the quality of sample tract statistics, however, has not been determined. Further information on editing procedures is available in the section on editing in the text of this report and that of chapters C and D of 1960 Census of Population, Volume I, Characteristics of the Population.
