## Data on housing vacancies and housing characteristics

U.S. Department of Commerce
BUREAU OF THE CENSUS

## CURRENT DATA ON HOUSING

### HOUSING VACANCIES (SERIES H-111):

Current statistics on housing vacancies, based on a scientifically selected sample. This series of four quarterly reports and one annual report provide rental vacancy rates and homeowner vacancy rates for the United States, each of the four regions, and inside and outside standard metropolitan statistical areas. The statistics for the current quarter are compared with data for the same quarter in the preceding year. Percent distributions are presented for rental vacancies and homeowner vacancies by the following housing characteristics:

- Number of rooms
- Number of bedrooms
- Number of housing units in the structure
- Duration of vacancy
- Plumbing facilities
- Monthly rent and sale price asked
- Year structure built

Also shown are percent distributions of all vacant housing units by year-round and seasonal status, figures on occupancy and vacancy rates based on the total housing inventory, and the home ownership rate. The annual report, in addition to the above, presents percent distribution of housing characteristics for both renter- and owner-occupied units.

### HOUSING CHARACTERISTICS (H-121)
