[1]Federal Information Processing Standards (FIPS) codes for states and counties.

[2]Based on 50 states. When states share the same rank, the next lower rank is omitted.

[3]The Population Estimates base reflects modifications to the census population as documented in the Count Question Resolution program and geographic program revisions. 1990 also has adjustment for underenumeration in certain counties and cities.

[4] Persons per square mile was calculated on the basis of land area data from the 2000 census.

Survey, Census, or Data Collection Method: Based on population estimates and the "component of population change method"; for more information, see Appendix B, Limitations of the Data and Methodology, and also <http://www.census.gov/popest/topics/methodology/>.
