PREFACE

Portfolio of U. S. Census Maps, 1950 is a special report bringing together a selection of statistical maps and graphs all taken from the publications of the 1950 Censuses of Population and Agriculture. An attempt was made to select some of the more significant charts, but in many instances only representative illustrations could be included within these few pages.

This report is intended to be of general interest to the public but is specially directed to business, government agencies, and schools.

Separate prints of the illustrations may be obtained at cost from the Director, Bureau of the Census, who will supply, on request, information on prices of glossy photographic prints suitable for reproduction.

The preparation of this report was made under the supervision of Clarence E. Batschelet, Chief, Geography Division. The selection of illustrations and their arrangement and editing was done by Dr. Robert C. Klove, Assistant Chief, Geography Division, assisted by Dr. Vincent M. Throop and George W. Morris. The latter, assisted by Harold J. Berger, supervised the preparation of most of the illustrations.

JUNE 1953.

SUGGESTED IDENTIFICATION

U. S. Bureau of the Census. *Portfolio of U. S. Census Maps, 1950*
