## **BUREAU OF THE CENSUS**

**Vincent P. Barabba, Director**  
**Robert L. Hagan, Deputy Director**

**Robert B. Voight, Chief**  
**Data User Services Office**

This report and the computerized indexing system on which it is based were prepared under the general supervision of Michael G. Garland, Chief, Data Access and Use Laboratory, Data User Services Office. Quentin Ludgin assisted in preparing the basic data files used.

This index is based on the representation of the data tables in published reports in terms of a set of numeric codes for each table's universe and stratifiers. The system itself consists of a series of FORTRAN programs which manipulate these coded documentation files in accordance with pointer files specifying the relationship among the stratifiers, restrictors, and universes. Index layout is created in a combination of FORTRAN programs and text formatting software on a PDP-10 computer. Final output is generated by means of an FR-80 computer output microfilming device.
