COMBINED TEXTILES

Introduction ........................................... 3

Table 1.—Combined textiles—comparative summary, by industries: 1890 to 1905. 4

Number of establishments. 5

Table 2.—Capital, by industries: 1840 to 1905. 5

Wage-earners and wages

Table 3.—Average number of wage-earners and wages, by industries: 1905 and 1900. 6

Table 4.—Average number of wage-earners, and per cent each class is of total, by industries: 1880 to 1905. 7

Materials used

Table 5.—Consumption of raw textile fibers: 1840 to 1905. 7

Table 6.—Raw fibers consumed, by industries: 1905. 8

Table 7.—Yarns consumed, by industries: 1905. 8

Products

Woven goods: 1905. 9

Table 8.—Value of products, by industries: 1890 to 1905. 9

Table 9.—Cost of materials used, value of products, and cost of materials per $100 of products, by industries: 1889 to 1905. 9

Consumption of domestic and foreign goods

Table 10.—Value of domestic products, exports, consumption of domestic products, imports for consumption, and total consumption of textiles, with per cent of imports to total consumption: 1905 and 1900. 10

The rank of the United States in textile manufactures

Combined textiles 11

Cotton 11

Cotton consumption in United States and Europe: 1830 to 1905. 11

Cotton consumption, by countries: 1905 and 1900. 11

Table 11.—World’s cotton spindles, by countries: 1900-6. 12

Wool

Estimated amount of wool retained for consumption in principal textile manufacturing countries 12

Silk

Table 12.—Raw silk consumption, by countries—average for the years 1902, 1903, and 1904. 13

Conclusion 13

Table 13.—Combined textiles, not including flax, hemp, and jute products—comparative summary, by states and geographic divisions: 1850 to 1905. 13

COTTON MANUFACTURES

Cotton goods

Introduction 19

The foreign trade in cotton goods

Table 1.—Annual imports of manufactures of cotton: 1821 to 1905. 21

Table 2.—Annual exports of foreign manufactures of cotton: 1821 to 1905. 22

Table 3.—Annual exports of manufactures of cotton: 1850 to 1905. 23

Table 4.—Cotton goods—comparative summary, with per cent of increase: 1880 to 1905. 24

Value of cloth exported. 25

The general progress of the industry 26

Geographic distribution of the industry

Number of establishments in Southern states: 1880 to 1905. 27

Producing spindles, by geographic divisions: 1905 and 1900. 27

Spindles in Southern states: 1905 and 1900. 27

Spindles in Southern mills, and their consumption of cotton: 1880 to 1905. 28

Capital 28

Employees and wages 28

Number 28

Table 5.—Cotton goods—wage-earners, average number of men, women, and children, by geographic divisions: 1880 to 1905. 29

Table 6.—Cotton goods—wage-earners, percentage of men, women, and children, by geographic divisions: 1880 to 1905. 29

Skilled operatives 30

Wages 30

Miscellaneous expenses 30

Table 7.—Cotton goods—miscellaneous expenses, with per cent of total: 1890 to 1905. 30

Materials used ......................................................................... 65

Products ...................................................................................... 66

Table 4.—Products, by kind, quantity, and value, with per cent of increase: 1890 to 1905 ................................................................. 66

Hosiery manufactured: 1905 and 1906 .................................. 67

Table 5.—Hosiery and knit goods—comparative summary, by states and geographic divisions: 1890 to 1906 ................................................................. 68

Table 6.—Hosiery and knit goods—detailed summary, by states: 1905 ................................................................. 74

Table 7.—Hosiery and knit goods—detailed summary of materials and products, United States totals: 1905 ................................................................. 82
CONTENTS.

WOOL MANUFACTURES.................................................. Page

Introduction ......................................................................... 85
Scope of the inquiry.......................................................... 86

Table 1.—Wool manufactures—comparative summary, with per cent of increase: 1860 to 1905 .. 87

Rank of states according to value of products........................................ 87

Table 2.—Wool manufactures—rank of ten states leading in aggregate value of products in 1905, distributed by industries: 1890 to 1905 .. 87

Rank of three leading cities according to value of products: 1890 to 1905 .. 88

Ownership of mills............................................................ 88

Capital ............................................................................. 89

Table 3.—Capital, with per cent of increase: 1890 to 1905 .. 89

Employees and wages.......................................................... 89

Table 4.—Average number of wage-earners, and proportion of men, women, and children: 1890 to 1905 .. 90

Power .............................................................................. 90

Table 5.—Horsepower, number of wage-earners, and average horsepower per wage-earner, by industries: 1880 to 1905 .. 90

Machinery................................................................. 90

Machinery, by kinds: 1880 to 1905 .. 91

Cards ............................................................................. 91

Table 6.—Wool manufactures—number of miles, classes of cards, and kinds of cards, by geographic divisions: 1890 to 1905 .. 91

Table 7.—Woolen cards, by states: 1870 to 1905 .. 92

Table 8.—Number and width of woolen cards, by states: 1905 .. 92

Table 9.—Width of woolen carding machines: 1905 and 1900 .. 93

Combining machines.................................................................. 93

Table 10.—Number of combining machines, by states: 1870 to 1905 .. 93

Table 11.—Productive machinery (cards and combs) reduced to the card basis, with per cent of total: 1890 to 1905 .. 94

Spindles ........................................................................... 94

Table 12.—Spindles, distributed as to kind and industry: 1890 to 1905 .. 94

Looms.............................................................................. 94

1. Looms on woolen and worsted goods: 1880 to 1905 .. 94

Materials used....................................................................... 95

Table 13.—Wool manufactures—materials used, by kind, quantity, and cost: 1905 .. 96

Net wool supply .................................................................. 96

Table 14.—Wool produced and imported, domestic exports, and net supply of the United States: 1861 to 1904 .. 98

Wool consumption .................................................................. 98

Table 15.—Comparative consumption of wool in the United States: 1840 to 1904 .. 99

Scoured wool ....................................................................... 99

Table 16.—Average cost of scoured wool consumed in the wool manufacture and in each industry: 1880 to 1905 .. 99

Cotton in the wool industry .................................................. 99

Shoddy ........................................................................... 99

Table 17.—Scoured wool and shoddy consumed in the wool manufacture, with per cent of total: 1890 to 1905 .. 99

Table 18.—Scoured wool, animal hair, shoddy, and cotton consumed in the wool manufacture, with per cent of total: 1890 to 1905 .. 100

Yarns purchased ................................................................... 100

Yarns purchased: 1880 to 1905 .. 100

Table 19.—Yarns purchased, distributed by kind and industries: 1905 .. 100

Chemicals and dyestuffs.......................................................... 100

Chemicals and dyestuffs, etc.: 1890 to 1905 .. 100

Imports of wool...................................................................... 100

Table 20.—Imports of foreign wool: 1822 to 1905 .. 100

Sources of foreign wool supply.............................................. 101

Table 21.—Imports of class 3 wool, by countries of production: 1880 to 1904 .. 101

Table 22.—Imports of class 1 wool, by countries of production: 1890 to 1904 .. 102

Table 23.—Imports of class 2 wool, by countries of production: 1890 to 1904 .. 102

Table 24.—Foreign wool entered for consumption in the United States, by class, quantity, and value: 1867 to 1904 .. 103

Products............................................................................. 103

Table 25.—Wool manufactures—products, by kind, quantity, and value, with per cent of increase: 1880 to 1905 .. 103

Net value of products .......................................................... 103

Classification of products..................................................... 103

Woven goods........................................................................ 103

Table 26.—Woven goods produced in woolen and worsted mills, with per cent of increase: 1890 to 1905 .. 106

Table 27.—Woven fabrics—kinds distinguished as woolen and worsted, quantity, value, and value per square yard: 1905 and 1900 .. 106

Miscellaneous products.......................................................... 106

Carpets and rugs................................................................. 106

Table 28.—Quantity and kind of carpets produced: 1880 to 1905 .. 108

Table 29.—Carpets, by kind, quantity, value, and value per yard: 1905 and 1900 .. 109

Table 30.—Production of rugs, by kind, quantity, and value: 1880 to 1905 .. 109
WOOL MANUFACTURES—Continued.

Products—Continued. 

Felt goods. ................................................. 110

Table 31.—Felt goods, by kind, quantity, and value: 1895 and 1900. ................................. 110

Wool hats. .................................................. 110

Partially manufactured products. .................................................................................. 110

Divisions of the wool industry. ..................................................................................... 110

Worsted goods. .................................................. 110

Table 32.—Worsted goods—comparative summary, with per cent of increase: 1869 to 1905. 111

Woolen goods. .................................................. 111

Table 33.—Woolen goods—comparative summary, with per cent of increase: 1869 to 1905. 112

Carpets and rugs. ............................................. 112

Table 34.—Carpets and rugs, other than rag—comparative summary, with per cent of increase: 1869 to 1905. 112

Table 35.—Materials used in the carpet manufacture: 1890 to 1905. ............................... 113

Table 36.—Carpet manufactures—looms: 1890 to 1905. .................................................... 113

Felt goods. ...................................................... 113

Table 37.—Felt goods—comparative summary, with per cent of increase: 1890 to 1905. 114

Wool hats ....................................................... 114

Table 38.—Wool hats—comparative summary, with per cent of increase: 1890 to 1905. 114

Felt hats ......................................................... 114

Table 39.—Felt hats—comparative summary: 1895 and 1900. .......................................... 115

Shoddy ......................................................... 116

Table 40.—Shoddy—comparative summary, with per cent of increase: 1869 to 1905. ........ 116

Table 41.—Shoddy—principal materials and products: 1903. ......................................... 116

Total production of shoddy and mangle: 1869. ................................................................. 117

Table 42.—Shoddy—comparative summary, by states: 1869 to 1905. ................................. 117

Wool scouring and wool pulling. ..................................................................................... 118

Table 43.—Wool scouring—comparative summary, with per cent of increase: 1905 and 1900. 118

Table 44.—Wool pulling—comparative summary, with per cent of increase: 1905 and 1900. 118

Table 45.—Wool manufactures—comparative summary, by states and geographic divisions: 1860 to 1905. 120

Table 46.—Wool manufactures—summary, by industries: 1905. ...................................... 128

Table 47.—Worsted goods—detailed summary, by states: 1905. ........................................ 136

Table 48.—Woolen goods—detailed summary, by states: 1905. ........................................ 138

Table 49.—Carpets and rugs, other than rag—detailed summary, by states: 1905. ............ 138

Table 50.—Felt goods—detailed summary, by states: 1895. ............................................ 148

Table 51.—Wool hats—detailed summary, by states: 1905. .............................................. 150

Table 52.—Felt hats—detailed summary, by states: 1905. ................................................ 152

Table 53.—Shoddy—detailed summary, by states: 1905. .................................................. 154

Table 54.—Wool scouring—detailed summary, by states: 1905. ........................................ 156

Table 55.—Wool pulling—detailed summary, by states: 1905. ......................................... 157

SILK MANUFACTURES. ....................................... 161

Table 1.—Comparative summary, with per cent of increase: 1860 to 1905. .......................... 161

Materials and products twice included. ........................................................................ 161

Materials and products twice included: 1905. ................................................................. 162

Table 2.—Materials and products twice included, and materials and products exclusive of duplications, by states: 1890 to 1905. 162

Imported silk materials and finished fabrics. ................................................................. 162

Table 3.—Imports of silk material and silk goods, and domestic production: 1890 to 1905. 163

Materials and products. ......................................................................................... 163

Table 4.—Materials used, by kind, quantity, and cost: and products, by kind and value, with per cent of increase: 1890 to 1905. 163

 Throwsters. ........................................................................ 164

Table 5.—Total consumption of raw silk, and raw silk thrown under contract, by states: 1905. 164

Table 6.—Throwing spindles in commission throwing plants and silk mills: 1905. ............... 165

Throwing spindles: 1905 and 1900. ................................................................ 165

Table 7.—Establishments classified by number of throwing spindles, by states: 1905. ........ 166

Interchange of fibers in the textile industries. ............................................................... 166

Table 8.—Silk yarn used by cotton, wool, and hosiery and knit goods manufacturers: 1890 to 1905. 166

Table 9.—Materials used, by kind, quantity, and cost, with per cent of total: 1890 to 1905. 167

Sewing silk and machine twist. ................................................................................ 167

Table 10.—Machine twist, sewing, and fringe and floss silks—quantity and value of production, by states: 1905 and 1900. 168

Broad silk production. ......................................................................................... 168

Table 11.—Production of piece-dyed silks, by states: 1905 and 1900. ............................... 169

Table 12.—Production of silk broad goods, by classes: 1905. .......................................... 169

Table 13.—Power looms in silk mills, by states: 1905 and 1900. ....................................... 170

Table 14.—Broad silk weaving mills, classified by number of broad looms, by states: 1905. 171

LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF THE CENSUS,
Washington, D. C., November 1, 1907.

Sir:

I have the honor to transmit herewith Part III of the Report on Manufactures for the census of 1905. This census was taken in conformity with the act of Congress of March 6, 1902, and the statistics cover the calendar year ending December 31, 1904.

This volume is a compilation of the bulletins for a number of the leading industries of the United States which were published as rapidly as the compilation of the data was finished. The monographs are bound together because it is the only way they can be permanently preserved and made convenient for general reference. The statistics contained in these reports are combined with those for all other industries, thus giving the totals for all branches of manufactures in the United States and in each state and territory which are published in Parts I and II of the census of 1905. The fieldwork, the compilation of the statistics, and the preparation of the text have been done by the regular force of the Office, working under the supervision of Mr. William M. Stewart, chief statistician for manufactures.

Very respectfully,

[Signature]

Director.

Hon. OSCAR S. STRAUS,
Secretary of Commerce and Labor.
