PRELIMINARY STATEMENT.

In order to meet the demand in the United States for information regarding Cuba, its population, resources, products, climate, etc., the Provisional Governor of the Republic authorized the Director of the Cuban Census of 1907, to prepare a compendium containing data compiled from the census reports of 1899 and 1907, and other reliable sources.

Under this authorization the information contained in the present volume is presented. The data have been taken, principally, from the Cuban Census reports referred to above, and from the Handbook on Cuba prepared by Señor Gonzalo de Quesada, Minister of Cuba to the United States, which was published in 1905 by the International Bureau of the American Republics, at Washington, D. C.
